**OVERALL PROJECT PERFORMANCE INDICATORS**

1. Please provide the following average cost figures for your project. Please review the instructions to determine how to calculate these figures. Write "0" in the second column and "N/A" in the third column if your project does not yet have this information. Depending on whether your project contains Middle Mile and/or Last Mile components, some metrics may not apply. Please provide a narrative description if the total is different from the target provided in your baseline plan (600 words or less).

Average broadband speed provided (Middle Mile)	0	N/A
Average broadband speed provided (Last Mile)	0	N/A

2. Please provide each facility name and type, the county where the facility is located, and census tract information for any facilities funded by your project during this annual reporting period. Report only facilities for which construction has been completed.

3. Please identify (1) the total number of interconnection, peering, and/or transit agreements entered into during this annual reporting period; (2) the total number of agreements of each type that you are currently negotiating; and (3) whether you have denied any request for interconnection and if so, why. If you have not entered into any agreements, please write "N/A."

**6. What retail services are being provided by this project? Please describe below. (600 words or less). As an attachment to this report, please provide pricing plans (in \$ per month) associated with each retail service. Retail services description:**

**7a. What network management policies (e.g., bandwidth limitations, traffic prioritization) are in place for the services provided by your project? 7b. Have you ever limited or blocked consumers from accessing any lawful content, service, service provider, or application, or prevented any consumers from attaching any legal device to the network? If so, please explain why (300 words or less)?**  
Network Management will utilize 'best practices' for protection of the network. The six steps were outlined in our initial BTOP application and exceed the word limitation for this section. However, all of these capabilities are available from the appliances provided by all major providers of content filtering devices. Additionally, these capabilities are fully configured to ensure that the filtering and protection taking place is fully in compliance with the NOFA without compromising the ability of the network to provide the required services to its users.

**8. If applicable, please provide the total number and the percentage of subscribers who have dropped the broadband service provided through this project (total number of households and/or businesses and the "churn rate") and the subscribers' reasons for discontinuing their service (600 words or less).**

**12. If you do not own collocation space, please describe how and where other network providers and/or customers interconnect with your network (600 words or less).**

Network providers and/or customers requesting interconnection have 3 options:

- 1)Secure collocation at one of our current collocation facilities or point of presence.
- 2)Meet at a splice point for mid-span meet.
- 3)Instruct/Request that we build to their premise.

Please also provide the names of these SDB entities (150 words or less).**

**14. Please describe any best practices/lessons learned that can be shared with other similar BTOP projects (900 words or less).**

One of our best practices has been the selection of East Alabama Regional Planning Commission for the development of our Environmental Assessment. We had several concerns expressed from other government agencies due to this selection, however having a local representative that is very familiar with the processes and, most importantly, the personnel responsible for services throughout our state has been a large benefit to reaching our goals for the EA.
