Hardware / Software

10u. Has the project team purchased the software / hardware described in the application? (Yes ONo

10v. If yes, please list

Speed Test Tool – The underlying technology for the Speed Test web application belongs to Ookla Networks. Ookla Networks received a one time fee to customize the tool for the State of Maine speed test web site and receives a yearly license fee. Associated Cost – Customization fee: \$1,000.00; license fee for subsequent years: \$495.00 per year.

Database and Server Software Licenses – In order to host the Service Provider Data Upload web application and store the provider data submitted, licenses for Windows Server and for SQL Server, Standard Edition were acquired. To develop the provider data upload application, Adobe Flex was acquired.

Associated Cost – Windows Server & SQLServer, Standard Edition: \$4,369.92; Adobe Flex: \$498.00.

Mobile Wireless Field Collection Units – Hardware and software were purchased for the mobile wireless field collection units. The hardware included laptops with mobile wireless USB connection modems/cards and the software included Microsoft Office applications and Microsoft Streets and Trips.

Associated Cost – Laptops and software: \$2,757.04; USB wireless air cards: \$1,856.25.

Geoportal & Static Map Gallery Website - The website was implemented based on James W. Sewall's GeoPortal platform. Associated Cost – Implementation & customization fee: \$8,000.00; 2011 Hosting Fee/Support/Maintenance fee: \$3,000.00; 2012 Hosting Fee/Support/Maintenance fee: \$4,800.00; 2013 Hosting Fee/Support/Maintenance fee: \$4,800.00.

10w. Please note any software / hardware that has yet to be purchased and explain why it has not been purchased

NA

10x. Has the project team purchased or used any data sets? (•Yes (No

10y. If yes, please list

The project team licensed a third party road centerline data set for Maine. The NAVTEQ NAVSTREETS product was licensed to fill in those areas in the State of Maine that are not currently covered by the State's E911 roads data set. The Maine Office of GIS licensed product.

The project team licensed CoverageRight by State product from American Roamer for Maine. The American Roamer CoverageRight product for Maine has a 2 year license agreement at a fee of \$12,671.25. The Mapping project has now paid the costs for the both years and will make a determination whether to extend or renew the license for this product.

The project team has purchased residential and business address lists from InfoUSA. At this point the Mapping project has acquired 10,000 addresses from InfoUSA at a cost of \$650.00.

10z. Are there any additional project milestones or information that has not been included? • Yes ONo

10aa. If yes, please list

For details, please refer to the Q4 Supplemental Answers Document.

10bb. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing The Mapping project team has encountered challenges in the following areas: Provider Data Formats State E911 Street Coverage Misalignment between Year 2010 Census Blocks & Maine E911 Streets Fixed Wireless Propagation Modeling Middle Mile Locations Resellers Data Confidence Intervals Independent Verification of Wired and Fixed Wireless Coverages Assimilating Verification Findings CAI Broadband Service Information

For more details, please refer to the Q4 Supplemental Answers Document.

10cc. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project The project team has identified 612 free public WiFi locations throughout the state. These hotspots have been compiled into a GIS data layer that will be included in the interactive broadband availability map.

The Address File Development project which was part of the supplemental and amended grant award has begun. The Maine Office of GIS has started building a statewide digital parcel data set. The digital parcels will then be used to construct street address points.

11. Broadband Planning

11a. Please describe progress made against all goals, objectives, and milestones detailed in the approved Project Plan. Be sure to include a description of each major activity / milestone that you plan to complete and your current status

The major activities for the Planning project are:

- Project Setup
- Data Gathering
- Data Analysis
- Needs Assessment
- Strategic Plan
- Program Implementation
- Measure Effectiveness
- Refine Strategic Plan

For more details, please refer to the Q4 Supplemental Answers Document

11b. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing The Planning project team has encountered challenges in the following areas: Reaching Rural Residents Survey Returns Subscriber Counts

For more details, please refer to the Q4 Supplemental Answers Document.

11c. Does the Project Team anticipate any changes to the project plan for Broadband Planning? OYes • No

11d. If yes, please describe these anticipated changes. Please note that NTIA will need to approve changes to the Project Plan before they can be implemented

NA

Additional Planning Information

11j. Are there any additional project milestones or information that has not been included?

NA

11k. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the Project Team is employing

NA

11I. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project

The ConnectME Authority is planning its second statewide broadband summit. The Maine Broadband Summit 2.0 is scheduled to take place on 1-March-2012. The summit will be collocating with Maine Municipal Association's (MMA) yearly technology conference and the Maine GIS User Group (MEGUG) yearly conference.
