During this quarter,	the Connect	Minnes	sota project received	a tot	al of 4 broadband ir	nquiries.	Additional in	formati	on received through e

mail from consumers that can also be used for verification purposes totaled 2 for this quarter.

For this reporting period, 44 field verification tests were conducted. Connected Nation's staff conducted multiple tests on the following providers: Albany Mutual Telephone Association, Alliance Communications, Arvig Communications Systems, AT&T, Barnesville Municipal Telephone, Benton Cooperative Telephone Company, Bradco-WISP, Inc., CenturyLink, Charter Communications, Chaska Net, Christensen Communications Company, CitiScape Communications, Clear Choice, Clearwire Corporation, Cloudnet, Inc., Comcast Cable Communications LLC, CTC Telecom, diversiCOM, Enterpoint, Evertek Enterprises LLC., Farmers Mutual Telephone, Frontier Communications Corporation, Garden Valley Telephone Company, Gardonville Cooperative Telephone Association, Genesis Wireless, Halsted Telephone, Harmony Telephone Company, Info Link Wireless Inc., Invisimax, Jaguar Communications, Lakedale LINK, Loretel Systems, Inc., Mabel Cooperative Telephone Company, Maple Leaf Networks, Midcontinent Communications, Min-Kota Wireless, Minnesota Valley Telephone Company, Minnesota Valley TV Improvement Corporation, New Ulm Telecom Inc., Northfield Wireless, Otter Tail Telecom, Polar Telcom Inc., Qwest Corporation, Red River Telephone Association, Ridge Runner Internet Services Inc., River Valley Telecommunications Cooperative, SCI Cable, Scott Rice Telecommunications Cooperative, Sioux Valley Wireless, Sleepy Eye Telephone Company, Spring Grove Cooperative Telephone Company, Sprint, TDS Telecommunications Corporation, t-Mobile USA, U.S. Internet Corporation,

Please see the Supplemental Answers for additional information.

10i. If verification activities have not been initiated please provide a projected time line for beginning and completing such activities

N/A

### **Staffing**

10j. How many jobs have been created or retained as a result of this project?

Connected Nation has numerous staff working on the Connect Minnesota project, some at only a small percentage of their time. This approach is beneficial to the project in various ways: some staff provide necessary project support, many staff work together utilizing a team approach, and others are subject matter experts in their respective areas. By leveraging the expertise of the subject matter experts the project benefits from their knowledge and skills without the necessity of supporting a more expensive full-time resource.

10k. Is the project currently fully staffed? Yes No

10l. If no, please explain how any lack of staffing may impact the project's time line and when the project will be fully staffed

The position not currently staffed is related to Connect Minnesota's new broadband capacity activities that are only just beginning and as such have no impact on the project's timeline. The position is expected to be filled during Q3 of 2011.

10m. When fully staffed, how many full-time equivalent (FTE) jobs do you expect to create or retain as a result of this project?

5.48

### Hardware / Software

10v. If yes, please list

Hardware/software purchases for the project to date include the following:

- BroadbandStat-\$60.000
- ArchInfo/ArcGIS Software-\$7,811
- Spectrum Analyzer-\$4,477
- Computers & Software-\$2,008
- Speed Test Software-\$116
- Google Earth Pro-\$ 266

10w. Please note any software / hardware that has yet to be purchased and explain why it has not been purchased

Remaining purchases may include SQL server for mapping geodatabase, SQL server software, multiple dedicated storage servers, security application, additional backup replication solution, computers, GPS units BroadbandStat maintenance, ArchInfo/ArcGIS maintenance, and speed test updates as well as computers and software maintenance.

10x. Has the project team purchased or used any data sets?  $Y_{es}$   $N_0$ 

10y. If yes, please list

#### N/A

10z. Are there any additional project milestones or information that has not been included? 

Yes 

No

10aa. If yes, please list

- \*Maintained budget/finance cost model for Connect Minnesota.
- \*Updated Work Breakdown Structure and tracked deliverables.
- \*Maintained Connect Minnesota website to explain program, process speed tests, and gather information from consumers and Community Anchor Institutions (CAI).
- \*Maintained broadband data collection activity and broadband update database.
- \*Requested/processed broadband coverage data sets (updates and new requests) from Minnesota provider community.
- \*Maintained outreach and awareness strategy.
- \*Responded to consumer inquiries received through Connect Minnesota website.
- \*Produced monthly status reports, data collection, activity log, and website statistics and distributed to Connect Minnesota project team.
- \*Completed new broadband availability maps depicting available service with speed threshold of at least 3 Mbps download and 768 kbps upload.
- \*Performed analyses of April data and completed sets of maps including provider density maps, provider advertised speed maps, and statewide broadband inquiry maps.
- \*Began reviewing Census 2010 data sets for National Telecommunication and Information Administration (NTIA) submission; updated provider datasheet for data collection activities.
- \*Performed field validation on various providers for validation rate of 51% or 62 of 121 viable providers.
- \*Posted program coordinator position for Connect Minnesota, interviewed applicants, and extended a job offer.
- \*Updated Connect Minnesota amended project plan instructed by NTIA and resubmitted. Approved by the granting agency on May 21.
- \*Refined CAI listings information for: physical address, geocoding, e-mail, addresses, broadband access, connection platforms, advertised upload/download speeds.
- \*Submitted Connect Minnesota quarter 1 2011 American Recovery & Reinvestment Act and NTIA performance progress reports.
- \*Collaborated on broadband summit plans with the Blandin Foundation.
- 10bb. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing

10cc. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project

- · Connect Minnesota maps were published and used to further identify unserved and underserved areas and to help communities plan for expanding service to unserved households. http://www.connectmn.org/mapping/
- A video was produced about the field validation process in all Connected Nation state programs. http://youtu.be/tNMEQKHbDls

## 11. Broadband Planning

11a. Please describe progress made against all goals, objectives, and milestones detailed in the approved Project Plan. Be sure to include a description of each major activity / milestone that you plan to complete and your current status

On behalf of the state of Minnesota, Connected Nation (CN) finalized the survey instruments for the 2011 Residential Technology Assessment and the non-adopter telephone surveys, incorporating recommendations received from state stakeholders and third-party consultants where appropriate. These surveys are designed to measure trends in technology adoption, barriers to adoption, and awareness of available broadband service among Minnesota residents. In Q2 2011 CN started surveying respondents across Minnesota for both of these surveys. In addition, Connected Nation created and publicly released a report documenting technology adoption and barriers among businesses across the state.

The Connect Minnesota initial broadband assessment, released in coordination with the Minnesota Department of Commerce during Q1 2011, continues to serve as an invaluable tool to our partners and stakeholders within the state. The assessment was conducted in partnership with the Minnesota Broadband Task Force and continues to serve as a tool for those members as they continue their work within the state.

The report, entitled Minnesota Broadband Availability and Adoption Statistics: An Initial Working Report on the Current State of Minnesota's Broadband Landscape, is available on the Connect Minnesota website at the following link: http://connectmn.org/ research/index.php

Connect Minnesota is cataloging feedback from the report and will begin initial work on an update during Q4 2011.

11b. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing

Connected Nation has been working closely with the Minnesota Department of Commerce to ensure that our work exceeds expectations. During Q2 2011, there were no significant obstacles during the planning process.

11c. Does the Project Team anticipate any changes to the project plan for Broadband Planning? 

11d. If yes, please describe these anticipated changes. Please note that NTIA will need to approve changes to the Project Plan before they can be implemented

## **Additional Planning Information**

11j. Are there any additional project milestones or information that has not been included?

Connected Nation will conduct a survey that oversamples households that do not subscribe to broadband. This second survey will be in addition to the previously scheduled residential survey. This updated and improved methodology will provide a greater level of analysis regarding barriers to technology adoption among different socio-economic and demographic groups by surveying non-adopters in Minnesota in a way similar to that conducted by the FCC as part of the National Broadband Planning effort. This approach will help create a demographic and socio-economic profile of the population of non-adopters in Minnesota, which can then be applied at the local level of detail by area planning teams to assist in developing local adoption initiatives that will target the barriers that are unique to that area. In Q2 2011, CN finalized the survey instrument and started surveying respondents across Minnesota.

11k. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the Project Team is employing

- 11I. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project
- Connect Minnesota released business survey data and launched an interactive webpage providing easy to use information about business insights. The data shows that nearly 41,000 businesses in Minnesota are not using broadband. The survey reveals which economic sectors are lagging behind in broadband adoption as well as the types of platforms they are using, the prices they're paying, and much more.

The business survey white papers and web widget can be accessed on the website at
