			es you plan to implemen bandStat (BBStat) we		application. Esri hous	es the cu	stomized B	BStat a	pplication in their

highly available, monitored, and managed environment. The scope of services includes setting up a staging environment for data verification and compatibility as well as a production environment for client access.

Consumer feedback in the form of broadband inquiries is also collected. These inquiries represent any type of communications received from the public regarding broadband service. Once broadband inquiries are received across the state, this information is overlaid with the broadband availability information which was collected through the State Broadband Initiative (SBI) program. This allows for a real-world comparison of the broadband landscape to the information received from broadband inquiries. Broadband inquiries are able to provide three types of information: 1) residents who do not have broadband but want it; 2) residents who have broadband but want a different provider; and 3) residents who do not have broadband, but the broadband inventory maps indicate that they do. If residents within a region state that they are without broadband, but the broadband inventory maps show otherwise, this allows our mapping vendor to approach the providers within that area in an effort to trim down their coverage to more accurately represent real-world availability on the ground.

For more details, please refer to the Q4 Supplemental Answers Document

10g. Have you initiated verification activities? •Yes No

10h. If yes, please describe the status of your activities

BroadbandStat is publicly available on the Connect Ohio website (http://www.connectohio.org) and received a total of 1,020 visits between October 1, 2011 and December 31, 2011.

During this quarter, the Connect Ohio project received a total of 186 broadband inquiries. Additional information received through email from consumers that can also be used for verification purposes totaled 4 for this quarter.

For this reporting period, 64 field verification tests were conducted. Thus far, project staff conducted multiple tests on the following providers: Access Ohio Valley; Altius Broadband; Amplex Internet; AT&T Inc.; Avolve; Bascom Mutual Telephone (d.b.a. BrightNet Bascom); Benton Ridge Telephone (d.b.a. W.A.T.C.H. TV); Blue Sky Wireless; Buckeye Cablevision Inc.; Buckland Telephone; Cavalier Telephone; Celerity Networks; CenturyLink; Champaign Telephone Company (d.b.a. CTC); Cincinnati Bell Telephone Company LLC; Cincinnati Communications; CityNet Fiber; Clearwire Corporation; Comcast; Computers4U; ConnectLink; Country Connections LLC; Coyote Wireless; Dark Horse Wireless; Databit Solutions; Eagle Communications (d.b.a. Safe-T.net); Frontier Communications (d.b.a. Citizen's Communications); g Wireless Inc.; GMN Wireless; Horizon Telecom; Innovative Fiber Optic Solutions; Insight Communications; Intelliwave; J-B Nets LLC; Jenco Wireless; Just Micro Digital Services Inc.; KeyOn Wireless; Leap; Level 3 Communications; LightSpeed Technologies; MetaLINK; Mikulski Communications LLC; New Era Broadband LLC; New Knoxville Telephone; NexGen Access; NorthWest Net; nTelos (d.b.a. Ohio Fibernet); OmniCity; One Communications Corporation; R. A.A. Services; Redbird Wireless; Sciotowireless; SkyMax Broadband...

For more details, please refer to the Q4 Supplemental Answers Document.

10i. If verification activities have not been initiated please provide a projected time line for beginning and completing such activities

N/A

Staffing

10j. How many jobs have been created or retained as a result of this project?

Our vendor has numerous staff working on the project, some at only a small percentage of their time. This approach is beneficial to the project in various ways: some staff provide necessary project support, many staff work together utilizing a team approach, and others are subject matter experts (SMEs) in their respective areas. The project benefits by leveraging the SMEs' knowledge and skills without the necessity of supporting a more expensive full-time resource.

10k. Is the project currently fully staffed?

Yes

No

10l. If no, please explain how any lack of staffing may impact the project's time line and when the project will be fully staffed

N/A

10m. When fully staffed, how many full-time equivalent (FTE) jobs do you expect to create or retain as a result of this project?

6.67

Hardware / Software

10u. Has the project team purchased the software / hardware described in the application?	Yes	\bigcirc Nc
---	-----	---------------

10v. If yes, please list

Hardware/Software purchases for the project to date include the following:

- BroadbandStat \$60.000
- Computers & Software \$12,002
- GIS Software Maintenance \$4,930
- Speed Test Software \$2,036
- Google Earth Pro \$974

10w. Please note any software / hardware that has yet to be purchased and explain why it has not been purchased

Remaining purchases may include SQL server for mapping geodatabase, SQL server software, multiple dedicated storage servers, security application, additional backup replication solution, computers, GPS units, BroadbandStat maintenance, Esri ArcInfo/ArcGIS maintenance, and speed test updates as well as computers and software maintenance.

10x. Has the project team purchased or used any data sets? \bigcirc No

10y. If yes, please list

Mapping program vendor, Connect Ohio, received a Community Anchor Institution dataset from eTech Ohio. Information from said dataset will be incorporated into the April 2012 data submission. This data set has not been valued.

10z. Are there any additional project milestones or information that has not been included?

• Yes

No

10aa. If yes, please list

During Q4 2011, primary program vendor Connect Ohio continued gathering data on the location and broadband connectivity of Community Anchor Institutions (CAI), in accordance with the data requirements of the SBI Notice of Funds Availability (NOFA) Technical Appendix. Efforts have been focused on conducting outreach and raising awareness of this important project through a statewide campaign.

Research was conducted during Q4 2011, specifically within the education sector in an effort to identify existing, centralized sources for CAI connectivity data. Connect Ohio has established a relationship with eTech Ohio, a statewide agency that supports telecommunications infrastructure that links classrooms and public broadcasting affiliates to each other and the Internet. eTech Ohio provided connectivity data for over 3,000 K-12 schools that utilize their network. This data will be submitted as part of the April 2012 submission.

Additional key CAI contacts continue to be identified throughout the state. The program continues to utilize an online survey available on the Connect Ohio website, and raise awareness of the importance of CAI broadband connectivity. Connect Ohio has an ongoing mission to educate CAI throughout the state on the importance of participating in the project. Participation by these institutions will raise awareness about the importance of broadband connectivity and the need to report the requested data for inclusion on the National Broadband Map.

Data collection efforts began for the April 2012 submission. Updates currently show 100% outreach to 130 providers - 13 with no update, 3 in data processing and 114 in some stage of outreach in progress. Collection efforts also include gathering information on state community anchor institutions. 20,032 have been identified throughout Ohio.

For more details, please refer to the Q4 Supplemental Answers Document.

10bb. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing

No challenges or obstacles to report for Q4 2011.

10cc. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project Connect Ohio's Broadband Inquiry Process Helps Ohioans Find Connectivity

Connect Ohio published an online article detailing how an Ohio man found home broadband access after utilizing the broadband inquiry process and interactive BroadbandStat tool through Connect Ohio's website. The man is now able to connect to work from home, communicate, pay bills and shop online, and his son can access his online college account. Per Kevin King, "Surfing became a relatively simple task, instead of a frustrating, time-consuming activity. Overall, it just frees up so much time and has removed so much aggravation that it is almost unbelievable."

http://connectohio.org/blog/post/broadband-inquiry-process-helps-ohioans-connect

11. Broadband Planning

11a. Please describe progress made against all goals, objectives, and milestones detailed in the approved Project Plan. Be sure to include a description of each major activity / milestone that you plan to complete and your current status

Broadband Capacity Milestones Annual and Year 2 Quarter 4 per approved Project Plan

- * Hold quarterly Connect Ohio Technology Association meetings. Activities and deliverables include drafting and distributing an invitation and agenda, event planning, creating a PowerPoint presentation that includes newest research, current project details and updates, documenting meeting discussion, guestions and recommendations and distributing meeting minutes and presentation via email to all invited stakeholders. Also facilitate a breakout last mile meeting with invitation-only community leaders to discuss current projects and receive feedback and recommendations for project progress and future projects. Document feedback and recommendations from community leaders. - This milestone was met. In Year 2, Quarter 4 the quarterly forum was held and 43 stakeholders attended. Presentations were made by providers, technical outreach staff, and Director Jason Wilson, Governor's Office of Appalachia, who announced a new task force to focus on Appalachia and how Connect Ohio is involved.
- * Maintain stakeholder relationships through monthly eCommunity Strategies Newsletters and quarterly Connected Newsletters. Primary activities include researching and requesting broadband success from stakeholders, reviewing submitted stories, drafting and editing newsletters and distributing them to stakeholders through e-mail. – This milestone was not met. In Year 2, Quarter 4 the quarterly Connected Newsletter (http://connectohio.org/sites/default/files/publication-newsletters/connected winter 2011 final.pdf) was finalized and distributed to stakeholders on December 9, 2011 at the Technology Association Meeting. Discussions surrounding the eCommunity Strategies Newsletter and its repurposing and redesign were conducted with program vendor Connect Ohio. A direction that was agreed upon and will be instituted during Q1 2012.

For more details, please refer to the Q4 Supplemental Answers Document.

11b. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing **Broadband Capacity Building:**

No challenges or obstacles to report for Q4 2011.

Technical Assistance:

No challenges or obstacles to report for Q4 2011.

Leading Practices:

No challenges or obstacles to report for Q4 2011.

- 11c. Does the Project Team anticipate any changes to the project plan for Broadband Planning? Yes No
- 11d. If yes, please describe these anticipated changes. Please note that NTIA will need to approve changes to the Project Plan before they can be implemented

No changes anticipated at this time.

Funding

11e. How much Federal funding has been expended as of the end of the last quarter? \$0 11f. How much Remains? \$0 11g. How much matching funds have been expended as of the end of last quarter? 11h. How much Remains? \$0

Technical Assistance:

Connect Ohio Aids Broadband Expansion in Carroll County. Connect Ohio issued a press release (http://connectohio.org/recent-news/release-connect-ohio-helps-expand-internet-access-carroll-county) detailing the successful collaboration of Connect Ohio technical assistance staff, Carroll County Commissioners, and county stakeholders to address the need for high-speed Internet access to homes and businesses in the area. Results of Connect Ohio's research were included in an RFP developed and released by county officials and a provider has been selected to complete the expansion efforts. Local media outlets, including the Times Reporter and the Free Press Standard, picked up this release. Per Carroll County Commissioner Tom Wheaton, "I am very happy to finally be at this position of working with CUE Band for broadband service for the non-served and underserved residents. We have been in need of this service for several years and now that we are moving aggressively forward with the oil and gas industry in Carroll County the timing couldn't be better."...

* Connect Ohio Helps Expand Internet Access in Crawford County and Liberty Township
Connect Ohio issued a press release detailing the successful collaboration of Connect Ohio, the Internet provider WaveLinc, and the
Liberty Township Fire Department to expand broadband access to homes and businesses in Crawford County through a new
expansion tower. The tower is already servicing a dozen homes and has the potential to provide service to several hundred. Per
Liberty Township Fire Chief Rick Harley, "Having high-speed Internet is certainly better. The tower is a win-win situation. I've looked at
it as a community service. It's helping us out, and it's helping others in the community who want high-speed Internet that weren't able
to get it before."
