## A. General Application Information

### 1. Applicant Information

#### 1-A. Name, Address, and Federal ID for Applicant

<b>i. Legal Name:</b>	Education Networks of America, Inc.
<b>ii. Employer/Taxpayer Identification Number (EIN/TIN):</b>	621805864
<b>Street 1:</b>	1101 McGavock Street
<b>Street 2:</b>	Suite 301
<b>City:</b>	Nashville
<b>County:</b>	Davidson
<b>State:</b>	TN
<b>Country</b>	United States
<b>Zip/Postal Code:</b>	37203

#### 1-B. Name and Contact Information of Person to be Contacted on Matters Involving this Application:

<b>Prefix:</b>	Ms.
<b>First Name:</b>	Lillian
<b>Middle Name:</b>	
<b>Last Name:</b>	Kellogg
<b>Suffix:</b>	
<b>Telephone Number:</b>	615-312-6072
<b>Fax Number:</b>	615-312-6099
<b>Email:</b>	lkellogg@ena.com
<b>Title:</b>	Vice President, Client Services

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> Easygrants ID: 144	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

<b>1-C. Other Required Identification Numbers</b>	
<b>i. Organizational DUNS:</b>	012119835
<b>ii. CCR # (CAGE):</b>	5MGU8
<b>iii. Funding Opportunity Number:</b>	1
<b>iv. Catalog of Federal Domestic Assistance Number:</b>	<b>BTOP CFDA Number:</b> 11.557 <b>BIP CFDA Number:</b> 10.787 <b>BTOP CFDA Title:</b> Broadband Technology Opportunities Program <b>BIP CFDA Title:</b> Broadband Initiatives Program

**1-D Eligible Entities**

Please classify your organization. (Note: If there are multiple organizations involved in the project, designate the lead applicant that would enter into a Loan or Grant agreement with the Agency and assume operational and financial responsibility should an award be made). **For-Profit Corporation**

**1-E. RUS Borrower Status**

No

**1-F. Applicant Federal Debt Delinquency Explanation**

Is the Applicant Delinquent On Any Federal Debt? No

**Federal debt delinquency Explanation:**

Not Applicable.

**2. Project Description & Project Title**

**2-A. Project Title:** Broadband Access & Equity for Indiana Community Anchor Institutions

**2-B. Project Description:** This Middle Mile BTOP project will deliver fiber-based 100mbps broadband access to 145 schools and libraries throughout Indiana many of which are underserved and would remain so but for this effort. The project is highly collaborative as it aggregates 39 proposed funded service areas and engages multiple service providers. It directly benefits over 298K users and can indirectly benefit over 558K.

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

**3. Application ID for Multiple Submissions for Identified Service Areas:**  
Education Networks of American, Inc.(ENA)will submit only one(1)project application for BTOP Infrastructure. The title of the project is: Broadband Access and Equity for Indiana Community Anchor Institutions.

**4. Rural Area Determination**  
At least 75 percent of the proposed service area to be funded falls within rural areas that are unserved or underserved.  
**No**

**5. Applications for Rural Areas:** Please choose the funding program(s) to which you are submitting this application.

- a) BIP broadband infrastructure category to which you are applying:
  
- b) Would you like this Application for Rural Areas to also be considered for BTOP funding?
  
- c) BTOP Infrastructure category for which you are applying.

**6. Applications for All Other Areas: Per the NOFA, all applications to fund broadband infrastructure projects in areas that are less than 75% rural must be submitted to NTIA for consideration under BTOP.**

BTOP broadband infrastructure category to which you are applying: **Middle Mile**

## **B. Eligibility Factors**

**7. Application Submission**

**BIP and BTOP Factors Selected By Applicant:**

**Applicant has submitted a completed application and provided all supporting documentation required for the application.**

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> Easygrants ID: 144	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

<b>The Project will be substantially complete within 2nd year from the award date, and the project will be fully complete by the end of the 3rd year from the award date.</b>
<b>For projects seeking more than \$1 million funding, the Applicant agrees to submit a certification, from a Professional Engineer, that attests that a) the system will deliver the stated performance; and b) the projected project will be substantially completed within two years, and fully completed within three years.</b>
<b>The Applicant provides two-way data transmission with advertised speeds of at least 768 kbps downstream and 200 kbps upstream.</b>
<b>Applicant understands and agrees to comply with the nondiscrimination and interconnection obligations outlined in the NOFA.</b>

<b>Additional Factors for BIP Selected By Applicant</b>

<b>Additional BTOP Factors Selected By Applicant</b>
<ul style="list-style-type: none"> <li>• <b>Conformity with Statutory Purposes</b></li> <li>• <b>Cost Sharing/Matching</b></li> <li>• <b>Reasonableness of Project Budget</b></li> </ul>
The project advances at least one of the statutory purposes for BTOP
Applicant has provided documentation that the project would not have been implemented during the grant period without federal grant assistance.
Applicant has provided a budget that is appropriate to the proposed technical solution and only includes eligible costs.

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

- **Demonstration the Project Could not be Implemented But For Federal Grant Assistance**  
Applicant is providing matching funds of at least 20 percent towards the total eligible project costs?  
**Yes**

<b>7-k. Cost Sharing/Matching Fund Explanation</b>
ENA is not requesting a Matching Funds Waiver. Applicant is providing matching funds of at least 20% towards the total eligible costs.

## C. Executive Summary

### Executive Summary of Project for BIP and BTOP:

#### 8. Infrastructure Projects Executive Summary

Education Networks of America (ENA) requests \$14,257,171 in BTOP Middle Mile Infrastructure funding to deploy fiber-based broadband facilities to 145 schools and libraries in 39 proposed funded service areas in the State of Indiana (12 of which are underserved). It is a highly-collaborative effort establishing partnerships with multiple, local service providers and the community anchor institutions that will be served to deliver cost-effective and far-reaching high-speed broadband service. It will provide the greatest broadband speed as well as increase the affordability of and subscribership to broadband services in these geographies and will not result in unjust enrichment.

The Benefits of ENA's Application: This is a high-value project that will provide enormous benefits to students, teachers, aged and unemployed people, and will promote economic growth in the communities. ENA's 13-year experience serving the needs of schools and libraries confirms that the demand for high speed connectivity in these anchor institutions is accelerating. Schools and libraries' Internet capabilities are suffering from a lack of sufficient and scalable broadband facilities and many of these anchor institutions are unable to meet the growing demand for online educational resources. By adding fiber-based services, the schools and libraries will be able to introduce a variety of additional services and applications such as distance learning, on-line job training, access to e-government benefits and advanced studies

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

classes.

ENA's application will generate broad economic benefits to the surrounding community, including the creation of work for 80 FTE's over the one year build-out phase of the project. ENA's proposed funded service areas include 555,234 people, 216,663 households, 31,808 businesses, and 630 community anchor institutions, including schools, libraries, fire stations, police stations, hospitals, and other critical community organizations. The areas covered by this application have a high percentage of people that can be described as "vulnerable." About 20% of the population of the service areas is elderly, compared to the national average of 12.5%. Furthermore, the unemployment rate in Indiana (10.6% in June 2009) is higher than the national average (9.7% in July 2009).

ENA's application (39 proposed funded service areas, which includes 72 last mile service areas) will directly provide high speed access to 290,000 students and library patrons. ENA chose these communities for a variety of reasons, including:

- These schools and libraries will be immediate adopters of the new service as they have requested fiber-based service in previous years. Additionally, each of these entities utilizes E-Rate funding to subsidize their ongoing recurring costs which provides sustainability for the service.
- The community support for the proposed projects is overwhelming. ENA received over 180 letters of support from every type of community stakeholder including state, legislative, business, education, library, and other community leaders.
- These communities would not have access to fiber-based broadband service within the next 3 years but for government funding. Each of these entities has been denied adequate broadband service and will continue to be denied for the life of this application because the service providers have decided not to serve the area or the price they would have to charge for build-out was too high for the community to bear.

ENA's Proposed Network and Services: ENA proposes an economically efficient, technically feasible, state-of-the-art broadband network. ENA will work with multiple service providers to provide fiber-based broadband connectivity of at least 100 Mbps at each of the 145 sites. Upon receipt of funding, ENA will immediately complete contractual agreements with its customers and vendors. The pricing for these services will be reasonable, as they will be governed by the prices set forth in ENA's existing, competitively bid contracts with the State.

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

ENA will comply with all the interconnection and non-discrimination provisions set forth in the NOFA. ENA will not block, discriminate against or favor any network traffic unless specifically requested by the customer. ENA’s network facilities will be open to interconnection and wholesale access to ensure that the network facilities built with these funds will benefit the entire communities in which the 145 sites are located. Additionally, ENA will require our vendors to agree in writing to abide by these requirements as a condition of receiving a contract.

ENA is “Shovel-Ready.” ENA is already in a contractual agreement to provide managed network services to the public schools and libraries in Indiana, who comprise the anchor institutions for this project. In addition, ENA has existing contractual relationships and project protocols established with the participating vendors. In Indiana, ENA connected over 400 sites to the Internet in under a year’s time, and completely upgraded 210 sites in a large school district in Florida to a fiber-based wide area network (WAN) in less than 9 months. Because of these pre-existing relationships and our past history of success, ENA will not face the hurdles faced by a new entrant. ENA typically installs over 400 new fiber installs in a year and we anticipate that we will more than substantially complete this network within 2 years. Our plan anticipates reaching such a milestone in 18 months, which is half the time required.

**Budget:** The budget is reasonable and cost-effective. ENA secures its contracts through a competitive bid process and subsequently selects its vendors through a competitive quote process in order to ensure the lowest possible expense consistent with quality and technology fit. The costs of this project are consistent with eligible costs in the NOFA and with the cost principles identified in the OMB circulars, ENA has been able to deliver similar prior projects on time and within budgets.

**Matching Funds:** ENA and its service providers will contribute \$3,564,293 in matching funds, which is 20% of the total cost of the project.

**ENA’s Qualifications:** ENA is a for-profit entity with a management team that has extensive related experience. Since its founding in 1996, ENA has become one of the nation’s leading providers of managed network services to schools and libraries. ENA operates much like a general contractor building a house; ENA is the single service provider responsible and

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

accountable for on-going maintenance, monitoring, security, and support, and ENA works with multiple communication and equipment providers to provision the network facilities. ENA currently provides broadband solutions to 560 school districts, 230 libraries, 2.5 million students and educators and 6.2 million library patrons and librarians in 4 states (FL, ID, IN and TN).

ENA in Indiana: ENA currently has 2 contracts with the State to manage the broadband services for schools (since 2005) and libraries (since 2006). These contracts cover 320 school agencies and 160 libraries. When ENA assumed these contracts, most schools and libraries were being provisioned with a T1 (1.5 Mbps). While this level of service may be adequate for residential consumer service with a single computer, it is woefully inadequate for schools and libraries that are transforming to digital web-based resources and can have hundreds or thousands of simultaneous users on an ever-growing number of computers. ENA has already successfully upgraded broadband capacity for many schools and libraries in Indiana, but upgrading the sites included in this application is cost-prohibitive unless ENA receives funding from the BTOP program.

Statutory Priorities: ENA’s application will satisfy 4 of the 5 priorities identified in Section 6001(b)(3) of the ARRA:

- Since the lack of adequate “middle mile” connections is one of the primary impediments to providing residential consumers in underserved areas with high-speed bandwidth, this application will make it easier for last mile providers to provide residential consumers in these communities with high-speed connections.
- Community institutions (schools, libraries, health care entities, etc.) will benefit directly from the construction of 100 Mbps fiber optic networks directly to 145 of these sites, bringing access and equity to these institutions.
- Public safety users will benefit because the fiber that provides service to the schools and/or libraries in these communities will be open to interconnection and can be shared by public safety providers.
- This application will also promote sustainable broadband adoption by introducing students, teachers and library patrons to the benefits of high-speed Internet access, which will encourage them to subscribe at home and take advantage of online applications and tools.

Community Support for ENA’s Application: ENA has a very high-level of community support

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>		<b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

for this project. ENA’s application has letters of support from the IN Department of Education, IN State Library and the IN Association of Public School Superintendents. In addition, ENA has received letters of support from 175 community institutions, and from 4 national associations (SIIA, CoSN, SETDA, and Internet2).

In summary, if awarded the funding, ENA is able to immediately start the project and achieve the intended results. ENA has a history of success – it has already provided fiber-based connectivity to over 1,300 schools and libraries over the past 5 years, meeting installation timelines. ENA believes our approach of aggregating several service providers to deliver high-speed broadband to multiple underserved schools and libraries throughout Indiana is an excellent best-practice model that is highly collaborative and comprehensive and delivers the exact broad significance objectives and outcomes that the BTOP is seeking to achieve.

**Description of BTOP Project Purpose (BTOP Applicants Only Next Three Questions)**

**9. BTOP Statutory Purpose:**

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

Provide improved access to broadband service to consumers residing in “underserved” areas of the United States.
Provide broadband education, awareness, training, access, equipment, and support to schools, libraries, medical and healthcare providers, community colleges and other institutions of higher education, and other community support organizations by or through these organizations.
Provide broadband education, awareness, training, access, equipment, and support to organizations and agencies that provide outreach, access, equipment and support services to facilitate greater use of broadband service by low-income, unemployed, aged, and otherwise vulnerable populations.
Provide broadband education, awareness, training, access, equipment, and support to job-creating strategic facilities located within a defined economic zone, or community as designated by a State authority, Department of Commerce , HUD or USDA.
Improve access to, and use of, broadband service by public safety agencies.
Stimulate the demand for broadband, economic growth, and job creation.

**10. Description of BTOP Project Purpose:**

This application provides fiber-based Internet connectivity for many schools and libraries in the State of Indiana. These institutions can not afford to acquire high-capacity broadband connections that will allow them to provide high-quality educational services to their students and communities because fiber infrastructure is not currently present in their communities to meet their needs. While ENA has successfully upgraded capacity for many schools and libraries in Indiana, we have not been able to cost-effectively encourage service providers to build fiber into communities identified in our application. Granting this application provides the much needed funding to allow ENA to incent service providers to built 100mbps or greater capacity to each of the 145 school and library sites, with at least 30 of the sites qualifying as underserved.

ENA is under contract to the IN Department of Education and the IN State Library to provide managed Internet service to all of the school corporations (districts) and libraries throughout the State. This contract represents over 320 school agencies and 160 libraries. When ENA was

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

awarded management of these 2 statewide networks in 2005 and 2006 respectively, schools and libraries primarily received T-1 (1.5mpbs) service; while this level of service may be adequate for residential consumer service, it is woefully inadequate for schools and libraries that are transforming to digital web-based resources and can have hundreds or thousands of simultaneous users. ENA's 13-year experience serving the needs of K-12 schools and libraries confirms that not only is there significant demand for high speed connectivity, but it is growing at an accelerated rate as shared technology and tools are becoming a critical element to gaining operational efficiencies, carrying out educational and enterprise applications and preparing students and citizens for work and life in the 21st century. This conclusion is endorsed in the recent State Educational Technology Directors Association (SETDA) report titled "High-Speed Broadband Access for All Kids: Breaking Through the Barriers." SETDA recommends an external Internet connection of at least 10mbps per 1,000 students/staff growing to at least 100mbps in the next 5 years. This report is included in Supplemental Info #1.

This middle mile project will create equity among these anchor institutions by providing a minimum of 100mpbs of affordable, upgradeable, broadband service that will be substantially installed and complete by the end of Year 2. It is a highly effective and far-reaching solution, aggregating 145 sites within 39 service areas utilizing multiple service providers. It directly reaches a population of 289K and potentially indirectly reaches a last mile service area population of 558K.

This project will provide enormous educational and economic benefits to IN. ENA can illustrate these benefits based upon the results of 2 project examples it has already completed – one in Appalachia in Scott County(SCSS), TN, and another in the small community of Payette, ID. ENA facilitated the deployment of fiber-based services to both these districts, with the following results:

- o Network enhancements dramatically increased capacity, reliability and safety of their networks.
- o Schools can now take advantage of distance learning opportunities to enhance education for their students.
- o The districts' technology staff was able to focus attention on much needed projects to upgrade and enhance many mission critical administrative and instructional applications.
- o ENA's proactive network monitoring and support along with the value-added services (content filtering and firewall services), removed a tremendous burden from district resources.

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

- o Increased educational outcomes. In SCSS, high-speed broadband service enabled several enhanced learning opportunities that resulted in improved student performance. The following is a sample of the outcomes and the complete white paper on SCSS titled “The Future They Deserve” is included in Supplemental Info #1:
  - o Of the 128 students that completed the first 2 years Algebra I distance learning course (2006-07 and 2007-08), 75% scored an Advanced rating and 25% Proficient on the math section of the state-mandated Gateway examination.
  - o The first year of the district’s implementation of the web-based application Writing Criterion, SCSS High School juniors taking the TN Comprehensive Assessment Program (TCAP) Writing Test raised their scores by almost 20% the first increase in 4 years. The increase has been maintained since.
  - o SCSS students have the opportunity to earn dual credits (both high school and college) through distance learning classes with Roane State Community College. In the last 2.5 years, 49 SCSS students have each earned a 3-hour credit through distance learning. The SCSS program has been so successful that Roane State made it a priority to provide the same service to other high schools in their 10-county service delivery area.

This project will potentially benefit more than just the schools and libraries in Indiana. It will demonstrate the feasibility of deploying fiber-based solutions to schools and libraries in other states and provides a model for enhancing such connectivity through similar projects across the country. ENA has determined that at least 30 of the 145 sites in the 39 proposed service areas meet the definition of underserved because no provider advertises service of at least 3mbps in the area immediately adjacent to the school or library. But the actual number of sites and service areas that are underserved is probably much larger. Due to time and research limitations, ENA has not researched the number of service areas that meet the other 2 criteria (the subscribership or the availability criteria or the subscribership criteria). Since a service area only needs to meet one of the three criteria to qualify as “underserved,” it is likely that other service areas would also meet the definition of being underserved. The availability of broadband service in Indiana is below the national average as noted in “High-Speed Services for Internet Access,” Issued July 2009, Table 14: Percentage of Residential End-User Premises with Access to High-Speed Services as of June 30, 2008 (available at <http://www.fcc.gov/wcb/iatd/comp.html>).

In addition to serving anchor institutions, this project also promotes 3 other goals of the BTOP

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

program: promoting residential access in underserved areas, promoting public safety, and promoting broadband adoption. While this middle mile project is focused on schools and libraries, it serves as a catalyst for building enhanced broadband telecommunications infrastructure that ultimately will potentially serve all members of the surrounding communities, including the targeted health and critical community facilities and residential consumers including vulnerable populations. For instance, the community of Payette, Idaho realized the following benefits:

- o Increased tax revenues as a result of the land acquisition and fiber installation.
- o A significant increase in the reliability of the county’s 911 service increasing community safety and security.
- o An enhanced economic development opportunity that enables Payette to market the availability of a diverse routed fiber network in the community.

ENA has a history of success – it has already provided fiber-based connectivity to over 1,300 schools and libraries over the past 5 years, meeting installation timelines. ENA believes our approach of aggregating several service providers to deliver high-speed services to multiple underserved schools and libraries throughout IN is an excellent best-practice model that is highly collaborative and comprehensive and delivers the exact broad significance objectives and outcomes that the BTOP is seeking to achieve.

**11. BTOP Enhanced Services for Health Care Delivery, Education, and Children:**

This middle mile project is focused on providing underserved schools and libraries throughout the state of Indiana with high-capacity (100mpbs) broadband service benefiting over 141K students, educators, administrators, and 148K librarians and library patrons. This enhanced level of broadband service will vastly improve the quantity and quality of educational services to thousands of students and library patrons.

Several reports published in the last few years have focused on broadband importance, especially in education. These reports include:

- “High Speed Broadband Access for All Kids: Breaking Through the Barriers,” State Educational Technology Directors Association (SETDA)  
<http://www.setda.org/web/guest/class2020actionplan>
- “A Blueprint for Big Broadband,” EDUCAUSE  
<http://net.educause.edu/ir/library/pdf/EPO0801.pdf>
- “America’s Digital Schools 2008: The Six Trends to Watch,” The Greaves Group/The Hayes Connection <http://www.ads2006.org/ads/index.php>

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

- “The Horizon Report: 2008 Edition,” The New Media Consortium/EDUCAUSE  
<http://www.nmc.org/pdf/2008-Horizon-Report.pdf>

The common theme across each report is that access to high-speed broadband is fundamental to success in education, global competitiveness and the country’s overall economic growth. America’s schools and libraries are going digital and in this new age of information, networks have changed from passive platforms to active participants in the delivery of 21st century education and information. Competing in today’s global economy requires greater access to information, people, tools and resources. There are now more powerful ways to connect our people in schools and communities to each other and the global community. These new connections are redefining every aspect of education, work, and life. It goes beyond bandwidth, addressing fundamental issues such as equitable access. Every school and library included in this grant application can share the same tools and resources as their better served counterparts across the State. This project will address this critical need for broadband services as well as address and solve access equity issues for the 39 proposed funded service areas.

#### Driving Demand and Demonstrating Value

ENA has multiple white papers and case studies on how high-speed broadband delivers measurable educational benefits and substantial cost-efficiencies. The white papers can be found at [http://www.ena.com/Newsletters\\_Publications/white\\_papers.aspx](http://www.ena.com/Newsletters_Publications/white_papers.aspx) and the case studies at [http://www.ena.com/Partners/Customer\\_Highlights/default.aspx](http://www.ena.com/Partners/Customer_Highlights/default.aspx). Some are highlighted below.

1. Avon School Corporation outside Indianapolis is sharing their high-speed fiber Internet service and educational applications with the local library so that every student or parent that walks into Avon Township Library will have access to the district’s educational resources. Their goal is to erase the boundaries of between the town and the school by initiating a program to take Internet access, along with the school system’s web-based resources and applications beyond the school walls. This program demonstrates the educational value, synergies and economies of scale that can be achieved with high-speed broadband service delivery. This case study is included as Supplemental Info #2.
2. In 2007, ENA secured the Managed Broadband Internet Access (MBIA) contract with Orange County Public Schools, the eleventh-largest district in the nation. The contract called for delivering a minimum of 10mbps to 1gbps connectivity to over 215 sites and a significantly

increased pipeline to the Internet (800mbps scalable to 10gbps). The district documented many educational and enterprise benefits such as being able to deploy a sophisticated student management system, professional development programs, video conferencing as well as saving more than \$5.1 million over the 5-year contract term. This white paper is included as Supplemental Info #2.

## D. Proposed Funded Service Area

Not Applicable.

### 16. Coverage Waiver:

Applicant is seeking a waiver for providing less than 100% coverage of a census block.

**No**

For Response of “Yes” please refer to upload section for additional supporting documentation.

### 17. Methodology for Area Status:

The Indiana Office of Utility Consumer Counselor (OUCC) is the state agency representing utility ratepayer interests in cases before state and federal regulatory commissions. Their website, offers a tool that allows one to search for high-speed Internet service providers throughout Indiana by zip code at <http://www.in.gov/oucc/utilsearch/>. The information on the site is continuously updated and includes active service providers known to the Indiana Utility Regulatory Commission (IURC).

In collecting data, we used the OUCC Internet Service Provider Search engine to generate a list

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

of service providers for each zip code in the service areas proposed in our application. We then accessed each service provider’s website listed for that particular zip code. Once on the website, we captured advertised Internet access service statements and advertised speeds using a local address for the proposed site locations included in our service areas. If service providers advertised providing greater than 3mbps for that area, we noted the area as “served.” Likewise, if the service providers advertised service in the area and it was less than 3mbps, we noted the area as “underserved.”

In instances where the information was not readily available on the website, e-mails were sent to each service provider’s respective customer service department for confirmation of service to the address and requesting the maximum amount of speed available for that area. If no response was given by e-mail, we personally called the service provider to retrieve information for that area.

All collected information was printed out and saved. When no printed documentation was available, as in the case of the phone calls, the call was documented with date, service, speed, and name of the service provider’s representative. The information collected is provided in Attachment C.

**18. Middle Mile Benefits**

This project will have both a high impact on the schools and libraries that it directly serves as well as the last mile service areas within our proposed funded service areas. There are 145 sites serving almost 290,000 students, educators, librarians and patrons that will benefit directly. Without access to high-speed broadband services, these populations have been significantly disadvantaged. This project will bring equity of access to these sites. Additionally, this project has the potential of indirectly benefiting the surrounding community members. We defined the last mile service areas to be the areas within the zip codes associated with the 145 sites that include 550,234 residents, 216,663 households, 31,808 businesses and 630 community anchor institutions and critical facilities. Our service providers can leverage the newly constructed fiber to provide enhanced service offerings to these community members and last mile service providers. The net result is the schools and libraries will be the catalysts and anchor tenants of the broadband service that will later be made available to the surrounding community.

Throughout this application, we have noted the critical need for high-speed broadband service

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

to schools and libraries as well as demonstrated the educational outcomes, cost-efficiencies and community benefits enabled by access to rich web-based resources, applications and tools. There are no existing broadband services capable of delivering cost-effective 100 Mbps connectivity in the proposed funded service areas and funding this grant will change those dynamics. Schools and libraries are the community anchor institutions that can overcome various demographic and income barriers to high speed broadband access in the community. With improved educational outcomes resulting from reliable access to the latest applications and resources, the return to the communities in the form of a better-educated population will have a positive impact on economic development. Due to the limited access to online resources, these communities are currently vulnerable with no access to the digital economy and will remain educationally, economically and socially disadvantaged without this federal BTOP grant.

ENA made inquiries with over 15 service providers to deliver the service proposed by this grant. The 3 service providers listed below were able to provide a firm quote to us to construct facilities capable of delivering the required bandwidth and reliability for this project within the timeframe. It is important to note that each of these carriers has existing and extensive presence within IN and we have had direct experience with each in delivering the exact services proposed.

- InsightBusiness
- Indiana Fiber Networks (IFN)
- KDL

These service providers will construct facilities capable of serving all members of the community as a result of their build-out to serve the anchor institutions. They have significant, long term and existing commitments to and investment in the local economy in Indiana in terms of personnel, facility and infrastructure resources. For example, KDL has 500 associates working in Indiana, owns over 5,000 fiber route miles in the state and its affiliates already serve over 3,100 residential and over 1,700 business customers. The other service providers have similar investment in the local economy and the infusion of this grant funding will be re-invested locally.

While we cannot accurately estimate the number of jobs this project will save or create, we can estimate the amount of work created by this project. The quotes from the service providers

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

estimated that the total amount of man hours required to build-out service to all 145 sites would be 166,768. Using the guidance provided by the OMB on how to estimate jobs created or saved by the stimulus program we have determined that the build-out would take 80 FTEs to complete over the 1 year build-out phase of this project.

## E. Proposed Service Offering

### 19. Broadband Service Offerings for Last Mile Project:

Please refer to upload section at the end of the document.

### 20. Service Offerings for Middle Mile Project:

Please refer to upload section at the end of the document.

## Competing Service Providers

### 21. Existing Broadband Service Providers and Services Offered:

Please refer to upload section at the end of the document.

## Non-Discrimination, Interconnection

### 22. Description of Network Openness:

The network service provided by both ENA and its underlying vendors will meet, and likely exceed, the minimum non-discrimination and interconnection and network management standard practices stipulated under the BTOP program.

ENA will adhere to the principles contained in the FCC's Internet Policy Statement (FCC 05-151, adopted August 5, 2005). At each point of interconnection (school or library) of our middle mile network, our selected vendor will sell layer 2 services (circuits) to any requesting party at market rates up to available capacity. Our vendors will offer wholesale access to network components and services such as wavelength or fiber at reasonable rates and terms across the proposed funded service areas of our network. For the purposes of layer 3 (IP) connectivity for the community anchor institutions served in the proposed funded service areas, ENA will not favor any lawful Internet applications and content over others, unless specifically

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

requested by the end user (school or library). ENA does not currently implement any network management policies that allocate capacity, differentiate among applications, providers or sources, or limit usage in any way without the express consent of the specific underlying customer who is receiving the service. If deployed, these network management practices would be for the purposes of providing requested enhanced quality of service functionality.

ENA and our selected vendors will display the interconnection policies in a prominent location on its web page. Both ENA and our selected vendors will provide a mechanism that permits customers to sign up for notice of changes to either the layer 2 or layer 3 non-discrimination, interconnection or network management policies. ENA commits to binding private arbitration of disputes concerning interconnection obligations.

ENA will be responsible for providing Internet access to the community anchor institutions served through this project and, as such, this project will not be part of an entirely closed network. We will offer interconnection at a layer 2 and layer 3 (IP) level where technically feasible with reasonable rates and terms to be negotiated with the requesting parties.

ENA understands that all of the above requirements apply to ENA and to all of its network providers, and these network providers will also agree to comply with these requirements.

**Non-Discrimination and Interconnection (BTOP applicants only for next three questions)**

**23. Non-Discrimination Obligations (applicable to Last Mile and Middle Mile Applicants):**

Adhere to the minimum non-discrimination requirements as set forth in the NOFA.
Display the nondiscrimination practices in a prominent location on the service provider’s web page, and provide notice to customers of changes to these policies.

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>		<b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

**24. Interconnection Obligations (applicable to Last Mile Applicants):**

--

**25. Interconnection Obligations Middle Mile Applicants:**

Adhere to the minimum interconnection requirements as set forth in the NOFA.
Display the interconnection policies in a prominent location on the service provider's web page, and provide notice to customers of changes to these policies.
Commit to offering wholesale access to network components and services such as wavelength or fibers at reasonable rates and terms.
Commit to binding private arbitration of disputes concerning interconnection obligations.

**Cost Effectiveness and Affordability**

**26. Cost per Household (BTOP only):**

Not Applicable.

**27. Affordability**

There are no existing broadband services capable of delivering cost-effective 100mbps connectivity for the schools and libraries in the proposed funded service area. This grant will allow ENA to facilitate and manage the build-out of high-speed, middle-mile grade broadband capacity to these anchor institution locations and provide ongoing service using the constructed facilities at rates consistent with other users in similar locations in neighboring states.

ENA's ongoing broadband services will be affordable as the proposed ongoing pricing will be consistent with pricing offered under ENA's competitively bid contracts in the State of Indiana. Without the grant funding and due to high construction costs, ENA has been unable to offer

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>		<b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

high bandwidth fiber service to the locations covered by this application at the pricing consistent with other well-served areas in the State. This grant will allow all locations covered by the grant to have access to higher level bandwidth consistent with well-served areas in the State and at similar pricing levels. Additionally, all ongoing services for the anchor locations will use E-Rate funding to assist in payment for the monthly recurring cost of these services. The ability of schools and libraries to use E-Rate funds to pay for the ongoing monthly service charges is the key sustainability factor supporting this grant application. The anchor location users will be required to comply with all aspects of the Federal E-Rate program, including competitive bid requirements that will help ensure that the service selected is cost-effective and affordable.

Typical pricing for fully managed, fiber-based 100mbps Ethernet services range from \$1,125 per month to \$2,500 per month in areas where facilities currently exist. However, in the areas targeted in this grant, we have found that we cannot offer service at costs below \$5,000 per month and that is completely unaffordable to our customers. This grant will change that circumstance and enable us to offer pricing that is more consistent with fiber-rich territories and ultimately encourage fiber construction into areas that currently do not make economic sense. Once constructed, the entire community benefits from access to higher speed service at competitive costs.

## F. Technology Strategy

### 28. Technology Type:

Wireline - Fiber-optic Cable

**Other:**

### 29. System Design

ENA, serving as the grant applicant and prime contractor, is responsible for all management, financial, implementation and customer service tasks. This grant proposal entails delivering improved Internet connectivity to 145 K-12 public schools and libraries and

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

leverages our existing network and contractual relationship with the Indiana Department of Education and Indiana State Library. Through our existing network, we have only been able to provide connectivity at T1 levels for the sites included in this grant, which is far less than they desire and need and places these communities at a significant disadvantage. ENA has been able to increase connectivity significantly in other areas of the state and install higher capacity fiber-based service due the fact that carriers had already invested to extend their network into those areas.

ENA’s existing network backbone extends into Indiana and we have a large point of presence in Indianapolis’ primary telecom facility on Henry Street. Through that location, we host carrier-grade Cisco routing and core switching equipment that connect our customers in Indiana via high-speed gigabit and multi-gigabit Ethernet links that are easily upgradeable to 10 gigabit and beyond to our regional points of presence in major Internet exchange facilities in Ashburn, VA and Chicago, IL as well as to a core ENA POP in Nashville, TN. Our network currently peers with over 90 different networks, we contract for Internet transit with numerous top-level Internet networks and we host terabits of content from education-focused content providers such as Discovery Learning and Akamai. ENA’s backbone network is already interconnected to a wide variety of networks on a non-discriminatory basis and we have shown that such interconnections provide substantial additional value to our customers (principally schools and libraries) beyond those that have restrictive interconnection requirements as content is able to more easily and quickly reach our customers through the numerous connections to other national, regional and content networks. In addition to our connectivity to these primarily commercial networks, ENA’s network backbone is also “peered” or interconnected with the Indiana GigaPOP, which provides paths for our customers to access the Internet2 and National Lambda Rail (NLR) national research and education networks as well as seamless connectivity to Indiana’s higher education network I-Light. None of this existing equipment and the backbone network reach described above is part of our funding request; however ENA intends to leverage this existing investment and infrastructure to benefit customers in our proposed funded service areas.

We already connect our customers in Indiana to our network backbone via high-speed links from regional aggregation points throughout the State. Our grant proposal includes expanding the capacity and number of end sites connected to this network in order to improve access to the Internet and ultimately enable instruction and access to 21st century online applications and

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

tools for students, professionals and library patrons. As described in our response to Question 34, ENA’s process to improve connectivity is to make inquiries with targeted group of service provider vendors who have network assets in the region in which we desire the higher capacity service. During our inquiries, we evaluate cost, technologies and means of delivery in order to choose the best fit for our needs and our customers’ ongoing budget constraints. This process does not advantage one service provider over another in as much as both have similar service offerings but instead allows us to deliver the best service available at the best price for customers rather than force them to fit their service needs into a single service provider’s network footprint and service offerings. ENA already has network interconnectivity and contract vehicles to deliver connectivity to all 145 sites represented in our application with each of the three service provider vendors we have selected in this application as part of our existing service model.

Once funded, ENA will contract with the selected service provider vendor to build out their fiber-optic facilities and associated layer 2 network equipment to extend their network to our proposed funded service territories. In these territories, our service provider vendors will install network termination equipment physically in each of the school or library sites, allowing ENA to connect our layer 3 router or switch to the existing local area network (LAN) at the location. Once completed, each of our 145 sites will immediately have access to 100 Mbps of network connectivity between their locations and out to our core network facility in Indianapolis, which is far greater than was in place prior to this grant funding. We chose fiber optic because it is highly scalable and our customers have regularly shown traffic increases of 55-70% year-over-year, requiring a scalable manner of service delivery. The fiber optic facilities constructed to provide this service are capable of delivering infinitely more network capacity than just 100 Mbps – current technologies offer in excess of 4,000 Gbps of capacity using a single pair of fiber and the industry and technologies have continued to improve that limit, providing that once fiber is installed capacity is effectively limitless between interconnection points through upgrades to only the equipment on either end.

In addition to the capacity afforded by fiber-based service for our customers, we have found substantial improvements in reliability as compared to sites served using traditional, copper-based T1s. Fiber-served locations are much less likely to suffer outages due to the more robust manner of delivery – and the fact that higher level services such as these are more highly valued by the carrier and, in the event of a fiber cut, are often repaired much more quickly than

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

their legacy services such as T1s and DSL. In addition to the higher level of physical reliability and service provider attention, ENA independently monitors and manages our network to ensure the highest levels of customer satisfaction. Employing our own internal systems using industry-leading software, ENA actively monitors all network traffic in aggregate and has the capability to drill down to specific IP addresses in order to monitor and manage network abuse, virus outbreaks, unusual network traffic, and ensure packet prioritization based on pre-set rules. We have developed an effective and efficient escalation system based on, and customized for, the needs of the users of education networks. Because we understand that time is a precious and scarce commodity for educators and administrators, we have eliminated the typical front line that exists in most Help Desk structures. Our Help Desk representatives possess and make effective use of a broad range of talent, experience, and tools that are uncharacteristic of most Help Desk teams. The Help Desk team boasts professional teaching experience in addition to industry standard advanced network and computer hardware certifications and due to our focused team and network monitoring system, ninety percent of the time or better, ENA contacts our customers in advance of their call in the event of a service or equipment outage. Our sophisticated and fault-resilient network and security monitoring tools monitor all network devices, circuits and related managed services on a 24x7x365 basis. These tools do far more than inform us when a device is up or down. They measure and report interface and circuit errors, latency, ping loss over time and many other factors which can affect an end user's overall experience. Of the issues not resolved based on proactive monitoring, many are resolved by our Help Desk during the first call. This capability coupled with multiple communication methods (e-mail, phone and fax) for reporting troubles enables us to meet and exceed our customers' expectations for network monitoring and support.

In addition to providing connectivity to the community anchor institutions specified in this grant application, the service provider vendors with whom we contract to construct fiber-optic facilities into our proposed service area can leverage the excess capacity to provide service to other last mile service providers, community anchor institutions and other similar entities throughout the service area. Our proposal provides for points of interconnection with these entities within the schools and libraries detailed in this grant application, however our vendors are not restricted from establishing additional points of interconnection within our proposed funded service area and beyond to service these users. Such service offerings would be provided directly by our vendors to the end user or contracting entity and our vendors will agree in writing prior to facility construction to provide services at prevailing market rates for

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

that area in a non-discriminatory manner.

We are confident that our approach meets the statutory guidelines for the BTOP middle mile program and we know that our extensive current service footprint in Indiana as well as our expertise in delivering connectivity to schools and libraries will differentiate our proposal from others that you may receive. ENA traditionally delivers new fiber-based service to over 400 sites each year and as such we are confident in our ability to deliver service to these 145 locations well within your funding timeframe constraints.

**30. Network Diagram:**

Please refer to upload section at the end of document.

**31. Certification by Professional Engineer:**

Please refer to upload section at the end of document.

**32. Buy American Waiver Request:**

Is the applicant seeking an individual waiver of the Buy American provision? **No**

**Buy American Waiver Request – Legal Justification**

Not Applicable.

**33. Choice of Service Provider:**

Does the project’s Infrastructure and the Company’s business plan allow more than one provider to serve end users in the proposed funded service area?

**Yes**

## **G. Project Milestones and Completion Factors**

### **Timeline & Milestones**

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>		<b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

**34. Infrastructure Build-out Timeline:**

Please refer to upload section at the end of the document.

**35. Licenses, Regulatory Approvals and Agreements:**

Once exact routing of the cable plant is determined, ENA will be required to obtain permits from the local utility providers for pole leases to transport fiber, from the various municipalities to obtain right-of-way access, from railroads to cross their rights-of-way, and from public road commissions to traverse roads via overpasses or other routing. At this time, exact route information is not finalized, but based upon our extensive 13-year experience in these types of projects, we are confident in our ability to obtain all necessary approvals to complete the project within the required timeframe. In our previous efforts to upgrade other schools and libraries, ENA has generally received permission to use the poles and rights-of-way within several weeks and as we have chosen service providers vendors who have already constructed facilities in the same geographic areas, we are confident in our ability to deliver to the milestones specified in Attachment E. We do not anticipate a requirement for any other regulatory or licensing approvals.

**36. Construction and Vendor Contracts**

ENA will employ and build on the existing relationships it has developed over its 13-year history of working with many vendors in Indiana and other states to build broadband solutions to community anchor institutions such as public schools and libraries in the underserved Middle Mile areas of this project. In preparing this application, we have engaged a number of vendors to provide cost quotes and detailed build information.

Our standard process in working with service provider vendors is to first qualify that our potential customer is genuinely interested in a service proposal, and is likely to sign an agreement with us given a competitive price is offered. We next obtain firm quotes from potential circuit vendors based on specific site addresses and type of service to be provided. Once the service provider vendor is selected and the target customer has accepted ENA's proposal and placed a firm order with ENA, we enter into a contract with the vendor(s) who will be providing the underlying circuits for our managed service.

In preparing for this application, we have qualified our customer interest in the service and we

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

have solicited and received quotes from service provider vendors who have the greatest ability to serve the presently underserved areas noted in this application; all of whom have provided similar services to ENA in our currently-served areas. Once the BTOP grant funding is approved, we will execute contracts with these vendors to serve the proposed funded areas, however our cost proposal for this grant application is based on firm quotes from each of these vendors. We have included a letter of support from one of our service provider vendors, KDL, in Supplemental Info #3.

While ENA or its service provider vendors have no current or anticipated plans to sell or lease the grant-funded facilities, out of an abundance of caution and given the 10-year restriction in the NOFA on sale or lease, we request that the NTIA permit ENA or its service provider vendors the ability to apply for and be granted the right to sell or lease these assets in the future should that be necessary. Any sale or lease would be as part of a business transaction that would be not directly related to this grant application, but instead part of ENA or our vendor's business needs. We understand and we will require our service provider vendors to agree in writing prior to receiving funds that the government will retain an interest in any facilities for 10 years, that the facilities must be operated by any successor entity under the terms of this grant application and that the NTIA must be petitioned for approval for any change of ownership of these facilities.

**Qualification of Management Team and Organizational Readiness**

**37. Management Team Resumes:**

Please refer to upload section at the end of the document.

**38. Organizational Readiness:**

ENA was founded in 1996 with the express goal of delivering custom-managed Internet services to the school, library and government sectors. Today, ENA manages multiple statewide and district-wide education and library broadband networks successfully serving over 5,000 end sites, 560 school districts, 230 libraries, more than 2.5 million students, teachers and administrators and more than 6.2 million librarians and patrons in the states of ID, IN, FL and TN.

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.

ENA currently employs 78 highly qualified and technically skilled professionals. Our senior-level staff has combined 175-plus years of experience in the education and government technology environments. ENA assigns dedicated project management resources to guarantee end-to-end service delivery implementation and coordination for our projects. The successful implementation and management of the broadband services described in this application will require the involvement of several ENA departments, including both technical and non-technical groups. The following lists the comprehensive and experienced personnel resources ENA already employs that are ready to implement this project:

- Technology: Network Engineers, System Engineers, Software Engineers, Voice Engineers, Product Development Team
- Implementation and Deployment: Project Managers, Field Engineers, Network Operations Center
- Customer Services: Account Service Managers, Customer Sales Engineer
- Client Services
- Administration and Human Resources
- Finance: Accounting Services, E-Rate Management

ENA has extensive project management experience on staff and has managed significant implementation and migration projects. Previous projects have ranged from migration of approximately 150 sites in MA all the way to implementation of 1,900 school locations throughout the State of TN. We have established processes and procedures, experienced project managers, and long-tenured team members who have worked together successfully in all of our previous projects.

ENA's services are supported by a broad base of highly skilled ENA employees. ENA's Engineering Team holds several industry certifications including Microsoft MCSE and MCSA, Cisco CCNA, CCIP, CCNP and CCIE, and Linux LPIC-2. ENA's Cisco-certified Network Architects and Engineers lead the research, analysis, design, implementation and support of networking technologies that address each customer's specific needs. ENA's Systems Engineers possess a breadth of knowledge in the design, installation, configuration and maintenance of the organization's Microsoft Windows and Exchange servers, Linux/Unix systems and Open Source applications. The Software Development Team ensures the systems and tools required to effectively support and manage the networks are in place.

ENA’s Network Operations Center (NOC), Field Engineers and Account Service Managers (ASMs) are already in place in Indiana to provide superior customer service. The ENA NOC is the single point of contact for all customer support issues and available 24x7. Our Field Engineers are deployed throughout our service geography. ASMs are assigned to ensure client satisfaction and to identify and understand our customer’s unique needs.

Additional support comes from the Client Services Team, who communicates regularly with customers to understand areas for improvement in ENA’s products and services. ENA’s Finance Team provides accounting and billing services and supports customers with E-Rate filings. The Administrative Team of ENA provides business strategy and leadership and demonstrates a commitment to diversity and compliance with all state and federal employment laws.

ENA supports our customers by employing a highly scalable and flexible combination of people, tools, and processes. We have the necessary systems in place and are fully prepared with personnel, administrative, operational and financial resources necessary to successfully implement this project within 2 years.

**Other**

**39. Organizational Chart:**

vendors to secure their agreement and project cost estimates to build-out fiber connectivity in these communities. There are multiple vendors who can provide full coverage that have responded with cost quotes and who also agree to the obligations and regulations of the BTOP grant. We have included a letter of support from KDL in Supplemental Info #3. We have provided contact information for all key partners with our supporting documentation.

Additionally, ENA has received strong national, state, regional and local support and endorsement for this project. These supporters understand the direct and potential indirect benefits of this project and will participate to promote adoption, demand and usage of the service in their communities. Copies of the 182 letters of support are included and outlined below:

National – 4 letters

- State Educational Technology Directors Association (SETDA)
- Consortia for School Networking (CoSN)
- Software and Information Industry Association (SIIA)
- Internet2

State - 3 letters

- Indiana Department of Education
- Indiana State Library
- Indiana Association of Public School Superintendents

Regional and Local – 175 letters

- Superintendent and Director Level – 35 letters
- Congressional/Legislative Leaders – 8 letters
- Community Leaders – 132 letters

An At-A-Glance chart of all the local letters of support is included in Q41 Uploads.

**42. Recovery Act and Other Governmental Collaboration.**

The proposed project will leverage multiple federal, ARRA and state programs as well as collaborate with other funded governmental agencies in the state of Indiana.

<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

1. E-Rate – Schools and libraries will leverage the E-Rate fund to pay for monthly recurring costs of subscribing to the broadband service. E-Rate funding plays a key role in the sustainability of this project, however, it is not related to the implementation and build-out process of this project and is not responsible for the 20% matching funds as required by BTOP guidelines.
2. Education ARRA – Title IID, Enhancing Education Through Technology – With high-speed broadband services in place, schools will be able to access new resources and leverage their investments in hardware and software.
3. State Fiscal Education Stabilization Fund – With high-speed broadband in place, schools will be able to utilize new instructional services to meet the needs of children at risk and other disadvantaged student population as well as utilize new and cost-effective administrative applications.

**State Programs**

1. Build Indiana Fund – Schools and Libraries Internet Connectivity Fund - As part of this fund IN appropriates state funding to support and subsidize the statewide K-12 and library network. The current FY2010 funding appropriates \$1.8 million for schools and \$1.0 million for libraries annually to subsidize the cost of connectivity. In previous years the amount was higher (\$2.3M for schools and \$1.2M for libraries) however, similar to other states, Indiana has had to reduce its budget. This project will clearly help to leverage the state’s investment in connectivity services to its schools. Additionally, as noted in ENA’s response to Question 53, due to increased financial pressures on school budgets and state funding, the Indiana schools and libraries included in this application who were not able to absorb the high costs and build-out rates for high-speed broadband services in the past would not be able to absorb them in the current economic climate and going forward during the grant period. This project will directly leverage the State’s funding.

**Government Collaboration**

1. I-Light - The ENA team has a long-standing collaborative relationship with the I-Light leadership team at Indiana University. The I-Light network connects Indiana colleges and universities at speeds from 1 Gigabit to 10 Gigabit with the ability to provide even larger, on-demand wavelengths between research groups on various campuses, when that functionality is needed. ENA’s network is interconnected with I-Light in a manner that permits schools and libraries in Indiana to connect directly with higher education institutions throughout the state to

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>	<b>Easygrants ID: 144</b>
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

access dual credit opportunities as well as leverage shared resources.

We understand that I-Light will submit an independent application to the BTOP program called the I-Light Expansion Project and should the NTIA award a grant to both entities, we will work together and collaborate in our facility construction and service delivery to ensure that we make the best use of any funds awarded and avoid duplication of efforts or services. ENA's application is for schools and libraries and I-Light's application is for higher education; to the extent technically and financially possible, when either party is running fiber in a path that could cover both schools and libraries as well as higher education institutions we will share the same conduit, path and fiber. Our two networks, and in turn our grant applications, complement each other rather than overlap. Any facilities constructed for one benefits the other and we would strongly encourage NTIA to fund both projects.

### **Community Involvement (BTOP Applicants Only)**

#### **43. Partnering with Disadvantaged Businesses**

The overwhelming majority of the work on this project entails fiber network build, which is performed by a relatively small number of service provider vendors who have the critical mass and the processes and structure to perform this work on the scale required. They, in turn, may employ other contractors to perform some of the physical fiber network build activity, along with subcontracting the local construction for such purposes as creating building entrances and mounting cable routing devices on building exteriors.

The primary service provider vendors identified in this application that will be building fiber networks to the service areas in scope, do not, to our knowledge, qualify for disadvantaged small business status. We have not identified any firms who have the required capability in Indiana who do qualify for SDB status.

In many of our existing markets, predominantly in metropolitan areas, we have found that there are some small disadvantaged business entities that do perform interior cabling and wiring work, and we seek them out as the opportunity arises. For example, we have several ongoing relationships with SDB-qualified firms to perform such work in our Florida and Tennessee metropolitan markets. In Florida, we have engaged a local firm to perform extension of

<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

---

telecommunications demarcs and other in-site cabling. In Tennessee, three local SDB firms are performing telephone installation for us.

It is our intent to seek and engage such firms, to the extent they have presence in the service areas in scope of this project, to solicit their bids to perform the required local cabling and wiring work. Given that they have demonstrated skills and experience and offer competitive bid responses, they will be considered among the candidates to be awarded this work.

**Total Budget:** \$ 18,351,465

**45. Detailed Budget:**

Please refer to upload section at the end of the document.

**Sustainability**

**46. Reasonableness**

Network build cost is largely a function of (a) distance to be covered, (b) number of termination points, and (c) obstacles along the build path. The costs for the layer 2 equipment that enables the network to successfully pass data across the physical medium, and the layer 3 network equipment that supports appropriate routing, monitoring, and control, are added to this build cost to determine the overall projected cost. Layer 2 equipment such as switches, multiplexers (ADM)s, amplifiers and transmission equipment are provided and managed by ENA’s selected vendor as part of their underlying infrastructure to deliver fiber-based services. Layer 3 services are provided by ENA directly and they include equipment necessary to perform IP routing (switches, routers, etc.) and connect entities to the Internet.

As described in detail under Question 10, schools and libraries require fiber-based service, initially deployed at 100mbps, to guarantee their long-term ability to provide students and communities with sufficient access to online learning resources. ENA's proposal utilizes competitive pricing/bidding to provide the required access at the most reasonable cost possible, relying on processes and vendors that enabled us to provide low-cost access to hundreds of other Indiana schools and libraries over the last three years.

On a cost-per-mile basis, the proposed project’s budget is consistent with historical costs to build ENA’s existing networks in Indiana, which typically range from \$25,000 to \$50,000 per mile, inclusive of labor, equipment and supplies. Per-mile costs for this application trend towards the upper bound of that range due to the significantly greater distances to be covered, as the proposed service areas are often significantly further away from a provider’s existing fiber footprint. These greater distances and higher costs are not unexpected and highlight the need for federal funding, because prior market considerations have not brought affordable service to these schools/libraries. Other proposed project costs should be similar to those incurred in currently served areas. The layer 2 equipment employed will be consistent with each vendor’s current

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>		<b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

standards and costs, and ENA will acquire the necessary layer 3 equipment using the same benchmarks we apply today to deliver existing competitive managed network solutions.

Over the past 3 years, ENA has delivered an average of nearly 400 fiber-based Ethernet circuits a year to public school and public library community anchor institutions using the same approach we have outlined in this application. We are planning to use the services of the same vendors with whom we have delivered similar circuits in the past, and we will deploy the same family of customer premises equipment we have used in our previous deployments. All of these past deployments were possible because they were competitively-priced. Our past successes have helped us to establish a benchmark for reasonable costs and pricing that we have applied to this program.

In addition, ENA’s vendor selection process includes evaluation and requests for quotes from numerous fiber vendors for each end customer/anchor location. ENA has relationships with over forty different vendors and has solicited competitive quotes from these vendors for all areas served in this grant proposal. This competitive process ensures that ENA has a reasonable cost for each area served in this grant application and upon award we will work with our entire vendor list to ensure that costs gathered for the preparation of this proposal are again benchmarked against current rates before we spend grant funds.

**47. Historical Financial Statements:**

Please refer to upload section at the end of the document.

**48. Broadband Subscriber Estimates:**

Please refer to upload section at the end of the document.

**49. Other Services:**

Please refer to upload section at the end of the document.

**50. Pro Forma 5-Year Financial Forecast and Assumptions:**

Please refer to upload section at the end of the document.

**51. Commitment of Capital Funding Support**

ENA intends to provide matching funds for this project primarily through debt financing. Debt financing will come from two main sources:

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

1. ENA’s vendor partners (Insight, KDL and Indiana Fiber Network) have been asked to finance 20% of the build out cost as a loan to ENA which will be repaid at no interest cost over a 60-month term. We expect most vendors to agree to these terms.
2. ENA has available a line of credit with its bank to cover any other matching funds or general costs of the project.
  - Name of Party – First Tennessee Bank
  - Funding Amount [and % of project cost] – ENA has a term loan facility for infrastructure and an appropriately sized line of credit for working capital for this project, which loan facility and line of credit will help ensure the project can be completed as contemplated. The current project budget calls on ENA to borrow approximately \$3.5 million dollars from existing lines of credit, equaling more than 19% of the budgeted project costs.
  - Type of Funding (e.g. grant match, equity, debt, internal, other) – Grant Match/Debt
  - Use of Funding (infrastructure, working capital, operating losses, other) – this debt would fund infrastructure and working capital
  - Key Financing Terms and Conditions – loans structured as 60-month term loans based on date of fund release

ENA also intends to use its existing equity to fund 100% of ENA owned customer premise equipment as part of this project, totaling just over five hundred thousand dollars, equaling roughly 2.9% of budgeted project costs. Combined with the two debt financing streams, ENA and our vendors’ total capital funding support commitment would be over \$4 million, exceeding the 20% match requirement.

ENA also has its general equity and ongoing cash flows to support these projects in the event of operating losses or other unforeseen events. ENA currently has no debt and significant positive working capital and equity as shown on our historical annual financial statements.

**BTOP Requirements**

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b>		<b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program		<b>Applicant Organization:</b> Education Networks of America, Inc.	
<b>Task:</b> Submit Application - Infrastructure Programs		<b>Applicant Name:</b> Ms. Lillian Kellogg	

**52. Matching Funds:**

- a. Cash: \$ 3,564,293.00
- b. In-Kind: \$ .00
- c. Percent of Total Project Cost: 20

**53. Demonstration of Financial Need:**

ENA's business case demonstrates that the project would not be economically feasible but for federal grant funds. Without grant funding, these schools and libraries would remain without full broadband connectivity.

ENA has managed the Indiana statewide education and library networks since 2005 and 2006 respectively. Each year we strive to improve and upgrade connectivity capacity to better serve our customers. The 39 school corporations and libraries (the proposed funded service areas) responsible for the 145 locations represented in this grant application have previously asked to upgrade their connectivity service levels to 100mbps or higher. Unfortunately, ENA has not been able to provide this level of connectivity because fiber-based infrastructure is not currently present in their communities and we have not been able to persuade service providers to build fiber into these communities because it is cost-prohibitive. ENA has documentation of both the requests for greater capacity by the schools and libraries and the responses from the services providers who were not able to provide the requested level of service or provided quotes at 2 to 4 times the acceptable rate for schools to be able to afford. The following is an example of the documentation:

1. Clinton Prairie School Corporation – Egress inquiry conducted. Best option was to consider IFN. Cost to customer would have been approximately \$4,000 on a monthly recurring basis over 5 years. Customer could not afford.
2. East Noble School Corporation - Two inquiries have been performed (2006 & 2007). Egress was \$5,300 on a monthly recurring basis, with a \$2,000 non-recurring charge over 5 years with KDL. No viable options were found to serve the WAN requirements.
3. East Porter County School Corporation - WAN inquiries conducted. Cost to customer would have been over \$7,000 per site on a monthly recurring basis. This was economically infeasible for the customer.
4. Frontier School Corporation - Recent inquiry conducted late 2008. Both IFN and

**Broadband Infrastructure Application  
Submission to RUS (BIP) and NTIA (BTOP)**

<b>Submitted Date:</b> <b>Easygrants ID: 144</b>	
<b>Funding Opportunity:</b> Broadband Initiatives Program and Broadband Technology Opportunities Program	<b>Applicant Organization:</b> Education Networks of America, Inc.
<b>Task:</b> Submit Application - Infrastructure Programs	<b>Applicant Name:</b> Ms. Lillian Kellogg

Comcast were unable to provide service.

5. Northeast Dubois County School Corporation - No Egress options. WAN cost to the customer would have been over \$6,000 per site on a monthly recurring basis with KDL. This was economically infeasible for the customer.
6. Pike County School Corporation - Egress inquiry conducted in 2008. Cost to the customer would have been over \$5,500 on a monthly recurring basis over 5 years for 100mbps service from IFN. This was economically infeasible for the customer.
7. Westview School Corporation - Egress inquiry conducted in 2008 with both AT&T and KDL. The least cost option would have cost the customer over \$5,000 on a monthly recurring basis. This was economically infeasible for the customer.
8. Tri-County School Corporation - Egress inquiry conducted in 2008. The cost to the customer would have been over \$5,500 on a monthly recurring basis over 5 years for 100mbps service from IFN. This was economically infeasible for the customer.

This documentation is a sample from our records over the last two years. There is no indication that circumstances will change, particularly during the grant period. In fact, Indiana schools and libraries were not able to absorb these quoted costs/rates in the past and would not be able to absorb them in the current economic climate and going forward during the grant period due to increased financial pressures on school budgets and state funding. [See this link: <http://newsinfo.iu.edu/news/page/normal/11110.html>].

This showing clearly demonstrates that local service providers have not been able to deliver sufficient broadband capacity at an affordable price in the past and would not be able to deliver such services during the grant period but for federal grant funding.

**54. Unjust Enrichment**

ENA has not received or applied for any Federal support for non-recurring costs associated with this project. ENA's customers are expected to receive E-Rate funding for ongoing monthly service costs for services delivered based on facilities constructed using grant funding, however, E-Rate funds are not related to our grant request nor are they part of our matching funds.

**55. Disclosure of Federal and/or State Funding Sources**

ENA has neither received nor has it requested any state or federal funds related to this specific grant application. If the grant is awarded, the customary and ongoing monthly service

**Last Mile Service Area Name:**                      Zip Code 47946  
**Community Name:**                                      **Francesville**  
**Rural Classification of the Community:** Non-Rural  
**BIP – Service Status:**

<b>BIP - If Service Status is "Underserved" please select at least one applicable option from this list.</b>

**BTOP - Service Status:**    Underserved

<b>BTOP - If Service Status is "Underserved" please select at least one applicable option from this list.</b>
No fixed or mobile broadband service provider advertises broadband transmission speeds of at least 3 mbps downstream in the proposed funded service area;

**Total Square Miles of Service Area: 97**  
**Total Population : 2,417**  
**Total Number of Households: 793**  
**Total Number of Businesses: 167**  
**Total Number of Critical Community Facilities, Anchor Institutions and Public Safety Entities: 2**

## N. Uploads

In order to improve system performance and help ensure that all applicants are able to complete their applications by the deadline, we have changed the way your application PDF is created. This PDF contains all of the information you entered throughout the Easygrants data entry screens. PDF copies of all documents that have been uploaded can be viewed and printed separately from the **Main page of the application after you submit**. These will continue to be available to you in read-only format after your application has been submitted.
