3. Application ID for Multiple Submissions for Identified Service Areas:
Not applicable

4. Rural Area Determination

At least 75 percent of the proposed service area to be funded falls within rural areas that are unserved or underserved.

No

5. Applications for Rural Areas: Please choose the funding program(s) to which you are submitting this application.

a) BIP broadband infrastructure category to which you are applying:

b) Would you like this Application for Rural Areas to also be considered for BTOP funding?

c) BTOP Infrastructure category for which you are applying.

Middle Mile

6. Applications for All Other Areas: Per the NOFA, all applications to fund broadband infrastructure projects in areas that are less than 75% rural must be submitted to NTIA for consideration under BTOP.

BTOP broadband infrastructure category to which you are applying: **Middle Mile**

B. Eligibility Factors

7. Application Submission

BIP and BTOP Factors Selected By Applicant:

Applicant has submitted a completed application and provided all supporting documentation required for the application.

The Project will be substantially complete within 2nd year from the award date, and the project will be fully complete by the end of the 3rd year from the award date.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

<p>For projects seeking more than \$1 million funding, the Applicant agrees to submit a certification, from a Professional Engineer, that attests that a) the system will deliver the stated performance; and b) the projected project will be substantially completed within two years, and fully completed within three years.</p> <p>The Applicant provides two-way data transmission with advertised speeds of at least 768 kbps downstream and 200 kbps upstream.</p> <p>Applicant understands and agrees to comply with the nondiscrimination and interconnection obligations outlined in the NOFA.</p>

Additional Factors for BIP Selected By Applicant

Additional BTOP Factors Selected By Applicant
<ul style="list-style-type: none"> • Conformity with Statutory Purposes • Cost Sharing/Matching • Reasonableness of Project Budget
The project advances at least one of the statutory purposes for BTOP
Applicant has provided documentation that the project would not have been implemented during the grant period without federal grant assistance.
Applicant has provided a budget that is appropriate to the proposed technical solution and only includes eligible costs.

Applicant is providing matching funds of at least 20 percent towards the total eligible project costs?
Yes

7-k. Cost Sharing/Matching Fund Explanation
Not applicable

C. Executive Summary

Executive Summary of Project for BIP and BTOP:

8. Infrastructure Projects Executive Summary

Executive Summary for Wisconsin ARRA Broadband Funding under Broadband Technology Opportunity Program

a) Opportunity the proposed system seeks to address.

The State of Wisconsin BTOP grant application provides a unique opportunity to address the critical broadband needs of our key community anchor institutions. Specifically, we are seeking funds to install fiber broadband technology to 467 sites. These are:

- 74 of the state's 426 school districts that do not have fiber
- 385 of the state's 470 public libraries that do not have fiber, and
- 8 community colleges.

We believe that fiber is the best solution to address the current and long-term broadband needs of these community anchor institutions.

Eighty-one percent of these institutions are in rural locations where telecommunication providers are not likely to provision fiber in the near future due to lack of a sufficient market to justify the cost. Therefore installing fiber would be impossible but for a timely infusion of Federal stimulus funds. Because the telecommunication industry uses the same infrastructure for their residential and business customers, our proposal to bring fiber to these sites in predominantly rural communities will further the broadband purpose of the federal economic

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

stimulus by simultaneously bringing affordable broadband access to residential and business customers in the entire community. Our application also includes eight colleges (two of which are tribal colleges) for a total of 467 sites. Our narrative focuses on the schools and libraries, which represent 98% of our sites.

The community anchor institutions in this proposal now receive broadband access over a limited copper infrastructure via our statewide BadgerNet Converged Network (BCN). (Many BadgerNet customers already have fiber. We are addressing the schools and libraries that do not.) BCN is provided under a state contract with AT&T as the prime contractor partnering with the Wisconsin BadgerNet Access Alliance (WBAA), a partnership of independent telecommunication companies. BCN provides broadband connectivity to 2,300 state and local government agencies, higher education, health care facilities, K-12 schools and public libraries. This “converged” network supports voice, video and data services. BadgerNet represents a very successful public-private partnership. According to AT&T it is the largest state network of its type in the nation.

Wisconsin has been forward thinking and diligent in developing its broadband networking infrastructure. When the business and technical specifications were developed for the BCN in 2003, Governor Doyle required that: (1) economic development objectives be incorporated into the network, and (2) the State of Wisconsin be the anchor tenant. This direction is articulated in the “Wisconsin Educational Network Business Case”, a comprehensive 91 page document that provided the roadmap for future development of the BCN. Two of the key conclusions reached in the Business Case are:

- 1) Wisconsin needs a standards-based, affordable network with adequate bandwidth that can support multiple applications and provide universal connectivity to accommodate increasing demand.
- 2) Equity of access for all students regardless of age, geography or economic status is needed. Wisconsin has made a good start in its goal to provide equity to all students, but it must continue forward to complete that mission.

The last sentence above is critical and bears repeating: “Wisconsin has made a good start in its goal to provide equity to all students, but it must continue forward or that mission is not

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

complete.” Through state and local initiatives the State of Wisconsin has managed to bring fiber connectivity to many school districts. However, until we can ensure that the students and library patrons in ALL communities in Wisconsin have equitable access, a large part of our state is in danger of being left behind simply because of where people live.

b) Description of the proposed funded service areas.

Our statewide application proposes to serve 74 school districts, 385 libraries and eight colleges in a total of over 380 mostly rural Wisconsin communities. There will be at least one site in each of the state’s 72 counties. (See Question #14 for more information.)

c) Number of households and businesses passed.

Because this grant application is targeted toward anchor institutions, it focuses on completing Wisconsin’s commitment to providing adequate broadband access to these institutions. However, just within the specific census blocks in which the schools, libraries and colleges are located, we have identified over 10,000 households. Many of these households will benefit from fiber that is being installed in their neighborhood to reach a school or library.

d) Number of community anchor institutions, public safety entities, and critical community organizations passed and/or involved with project.

This project will directly serve 467 schools, libraries and colleges, with each of the communities where they are located likewise benefiting from this project. In these communities other municipal agencies will be able to use the fiber infrastructure. For example, over 85% of sites are within 5 miles of a police or fire department.

e) Proposed services and applications.

All our schools and libraries have free (state funded) web access to over 10,000 full-text magazines and newspapers and high quality videos on scores of subjects like personal finance and health care. This rich information resource requires substantial bandwidth. Wisconsin is also a leader in offering interactive distance education courses, but school districts without fiber cannot take full advantage of this service. (See Question #11 for more information.)

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

f) Non-discrimination and interconnection obligations.

BCN is an overlay network provided by more than 70 service providers with AT&T as the prime contractor. Users such as schools and libraries connect to a BCN Internet Service Provider (ISP). BCN configures each Internet Transport Service with a “Best Effort” quality of service marking. Once a packet enters the network it is automatically marked to 0, so the network does not, and cannot, differentiate any ISP traffic and is thus “neutral.” (See Question #22 for more information.)

g) Type of broadband system that will be deployed.

The BadgerNet Converged Network (BCN) is an Internet Protocol/Multi-Protocol Label Switching (IP/MPLS) broadband network supporting voice, data and video with over 2,300 end points covering the entire state. Of these end points, over 800 are schools, libraries and colleges and many of them already have fiber. Our project is targeted at the 467 that still do not. (See Questions #28-30 for more information.)

h) Applicant qualifications demonstrating ability to implement and operate a broadband infrastructure.

The State of Wisconsin, in cooperation with our prime contractor AT&T and their telecommunication partners, can readily implement and operate the proposed expansion of the BCN broadband network as demonstrated by our success with the current network. Since 2005, the State has been using existing contracts and service level agreements for network governance, management and other services. In 2005 the State, working with the AT&T consortium, successfully completed the implementation of the new BCN IP/MPLS broadband network involving the conversion of 1,770 endpoints in all 72 Wisconsin counties supporting over 2,300 end users. (See Question #38 for more information.)

i) Overall infrastructure cost of the broadband system.

The projected cost of the program is approximately \$28.7 million to provide fiber broadband connectivity to 467 additional schools, libraries and colleges in over 380 communities. (See

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

Questions #44 - 45 for more information.)

j) Overall expected subscriber projections for the project.

Because this grant application is targeted at community anchor institutions, it emphasizes completing Wisconsin's commitment to providing high-speed broadband access to schools and libraries. This project will expand the fiber infrastructure serving the state to over 380 communities which represent a significant portion of the state's population, especially outside the larger urban areas.

k) Number of jobs estimated to be created or saved.

This project will provide over 150 FTE contract jobs to lay and install the fiber connections. Additionally, by bringing fiber to over 380 more communities, this project will expand residential broadband use and create economic opportunities that currently do not exist. While difficult to measure, this will certainly result in job creation. In addition, the project will invest over \$10.7 million in telecommunications equipment from American firms.

In Summary:

Our project addresses the critical current and future bandwidth needs of our schools, libraries and colleges. The expanded network will also provide a very important communication link into all communities to support response to emergency situations. We have completed the engineering to bring fiber to all the school districts and libraries that now do not have it. We have completed the budget and all the logistics, and have proposed an aggressive timeline to make all this happen within 16 months of grant approval. We have worked for months on this project in close partnership with AT&T and its telecommunication partner companies. The State of Wisconsin project is shovel-ready. When our application is approved, we are ready to start implementation.

Description of BTOP Project Purpose (BTOP Applicants Only Next Three Questions)

9. BTOP Statutory Purpose:

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

Provide improved access to broadband service to consumers residing in “underserved” areas of the United States.
Provide broadband education, awareness, training, access, equipment, and support to schools, libraries, medical and healthcare providers, community colleges and other institutions of higher education, and other community support organizations by or through these organizations.

10. Description of BTOP Project Purpose:

a) Project addresses compelling problem or presents an opportunity consistent with the BTOP statutory goals.

The compelling problem our project addresses is that the current physical (copper) infrastructure our libraries and school districts now have limits their broadband connectivity. And where the current infrastructure is still sufficient, it will not be so in the near future. The opportunity to use BTOP funds to bring fiber to our schools and libraries is an investment that will pay dividends for decades. To quote the American Library Association: “Fiber gets our libraries [and schools] to the future, faster.”

b) Project offers an effective solution to that problem or addresses the opportunity.

We believe that provisioning fiber to the school districts, libraries and academic institutions that now do not have it will provide the most effective solution to meeting their immediate and future bandwidth needs for years to come.

SCHOOLS: Eighty-four percent of the 74 school districts without fiber are in rural communities. Limited bandwidth routinely requires our schools to craft their Internet use policies around this limitation rather than around student and teacher needs. Popular applications, like interactive distance education and virtual field trips, take considerable bandwidth. More schools are also moving to hosted services for tracking student achievement and for administrative and business purposes. Another application growing in popularity is the live or archived streaming of school events, like music concerts. It is often difficult or impossible to implement these services without fiber as the communication medium.

LIBRARIES: Eighty percent of the 385 libraries without fiber are in rural communities.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

Wisconsin's public libraries are the quintessential community anchor institutions. All our public libraries offer free (tax-supported) Internet access. In a 2008 survey conducted by the American Library Association (ALA), 72% of the state's libraries offered the only free access to the Internet in their communities; and this figure increased to 79% in rural communities. This same ALA survey documented that 66.4% of our public libraries reported insufficient bandwidth, which frustrates both staff and patrons.

The critical need for increased bandwidth is being driven by several factors, including the interactive Web 2.0 environment and libraries offering wireless Internet access for patron laptops, a very popular service. For example, 89% of our public libraries now offer wireless access vs. just 26% in 2005. Libraries often prohibit patrons from using some Internet-based applications and services (e.g., video, gaming) solely because of insufficient bandwidth. Our regional library systems operate large, shared online catalogs and circulation systems, some of which have 50 participating libraries. The circulation transactions are very time sensitive. Inadequate bandwidth causes the transactions to timeout, requiring re-transmission which causes even more bandwidth congestion.

Currently, a great majority (385 or 84%) of our libraries only have copper circuits. By installing fiber to these libraries we will make the critical, long-term investment in their future bandwidth needs.

Our proposal is structured not only to bring fiber to school districts, libraries and colleges that do not have it, but to provide considerable bandwidth at very affordable costs. For example, a 100Mbps circuit will be just \$250/month and 20Mbps just \$100/month. These rates will apply statewide, even in rural areas. These rates are explained in more detail in Question 27 on Affordability.

c) Proposed solution demonstrates broad significance and includes development that can be replicated to improve future projects.

Our project has a very broad significance because of its statewide impact. The schools, libraries and colleges in our proposal are in over 380 different Wisconsin communities. Furthermore, our "proposed solution" to install fiber will be very significant because it addresses the long term bandwidth needs of these institutions. For possible future projects, we are already

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

reviewing the bandwidth needs of non-public K-12 schools and public safety agencies.

d) Whether the proposed funded service area is in an unserved or underserved area.

As a Middle Mile project we have identified the requisite underserved network interconnection points. However, the unserved or underserved areas as defined in the NOFA primarily relate to residential or commercial users. Our users will be important community anchor institutions, the schools and libraries in this application. The constant pressure on schools and libraries to increase their bandwidth is a clear indication that they are underserved. As cited above, 66.4% of our libraries reported insufficient bandwidth in 2008. Also, for our K-12 schools over half have requested bandwidth increases in just the past year. These statistics clearly illustrate that the state's public library and school communities constitute a significant "underserved" population that is addressed by this project.

e) The extent to which the project addresses more than one statutory purpose.

Our project addresses the following statutory purposes.

Section 6001, (b) (3): This section refers to providing "broadband education, awareness, training, access, equipment, and support to -- (A) schools, libraries, medical and healthcare providers, community colleges and other institutions of higher education, and other community support organizations and entities to facilitate greater use of broadband service by or through these organizations." Our application directly addresses broadband access and equipment. The schools and libraries provided with fiber in our proposal will very clearly enable and stimulate greater use of broadband by staff, students and library patrons. (Our above response in this question and in question 11 explains this in more detail.)

Section 6001, (b) (5): This section refers to stimulating "the demand for broadband, economic growth, and job creation." Historically, library use increases in difficult economic times as the public uses the library to search for jobs and take online courses to enhance their work skills. A 2008 report from ALA stated that "Library computers and Internet access are used to search for employment, prepare resumes and file for unemployment benefits. Aiding job seekers was increasingly viewed as a critical role for public libraries." The state's Department of Public Instruction has just allocated \$250,000 in federal Library Services and Technology Act (LSTA)

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

funds for our public libraries to develop programs to assist job seekers and the unemployed. For example, in June 2009 the La Crosse Public Library hosted a half-day workshop entitled “Tough Times: Helping People Find Jobs and Other Assistance.” The goal of this workshop was to educate area librarians about the programs and services available through the La Crosse Job Center and the local Social Security office. Staff from nineteen area libraries attended this workshop. La Crosse Public Library will be one of the libraries getting fiber if our application is approved.

The legislation also notes that “not less than \$200,000,000 shall be available for competitive grants for expanding public computer center capacity, including at community colleges and public libraries.” Although this project is not designed as a Public Computer Center proposal, it is clear that providing our public libraries with more bandwidth via fiber is a crucial prerequisite for expanding their public computer center capacity. In addition, in 2010 our libraries will be receiving 447 PCs as part of a grant from the Bill & Melinda Gates Foundation. The additional PCs will place even more pressure in a library’s bandwidth.

11. BTOP Enhanced Services for Health Care Delivery, Education, and Children:

Our application to bring fiber to 385 libraries will help address the needs of library patrons to find reliable information on health care and a host of other subjects. Bringing fiber to 74 school districts and eight colleges will help support the needs of students to use advanced, Web-based education resources and access online classroom opportunities.

Health Care:

A 2004 Institute of Medicine study reported that almost half of all American adults (90 million) have difficulty understanding health information. Patients with limited health literacy experience a higher rate of hospitalization. To address this issue, Wisconsin’s public libraries provide no-cost (state funded) access to a substantial amount of high-quality health care information on the web. Library patrons can access 567 health-related pamphlets (many targeted at consumers) and the full text of popular titles, including the American Medical Association’s “Complete Medical Encyclopedia” and the Mayo Clinic’s “Family Health Book”. (Neither title is available free on the web.) There are also 845 online videos presented by licensed practitioners on a variety of topics like colon cancer, high blood pressure and diabetes.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

The Wisconsin Department of Public Instruction has allocated \$40,000 in federal Library Services and Technology Act (LSTA) funds for public libraries to offer health information programs. One example: On September 30, 2009, the South Central Library System is offering a webinar on “Finding Local/Regional Resources for the Elderly and Their Caregivers.”

Education and Children:

Eighty-four percent of the schools districts and colleges in our application are in rural areas of the state. Fiber connectivity will ensure that students and teachers in these rural communities have the same online learning and educational opportunities as more urban districts. Wisconsin already provides myriad educational resources to students and teachers electronically. Most of these resources require ever more bandwidth as the information becomes more media-intensive. For the K-12 schools the Wisconsin IDE@s Website and Thinkfinity are examples of resources that are central to our children’s education. In line with one of the USDE’s four core Recovery Act reform initiatives, the state’s Department of Public Instruction is also in the process of creating a statewide longitudinal data system with federal grant money to provide teachers with information to improve instruction for individual students. Our BTOP grant application will provide the bandwidth to deliver these and many other resources to our students and teachers.

Wisconsin has a long history of supporting online, real-time distance education, which can help bridge the education resource gap between larger school districts and smaller, rural districts. (BadgerNet provides the circuits for our distance education network.) In the last school year, over 30,000 students attended more than 1,500 live, interactive distance education programs and classes. The distance education network is also used in evenings by adults who, for example, take online courses to enhance their education and job skills. But full-motion, interactive video networks require substantial bandwidth. Bringing fiber connectivity to our schools will better position them to be part of, and benefit from, our state’s distance education network.

In summary, we believe that greater broadband fiber connectivity constitutes an efficient “means” by which we attain the “ends” of fostering better access to high quality information resources for library patrons and to enhanced learning opportunities for students of all ages.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174

D. Proposed Funded Service Area

12. Proposed Funded Service Area Maps:

12-A. Service Area Map (Reference Number): **B7C0-59B9-4909-90C6**

12-B. Is the applicant is seeking a waiver for providing less than 100% coverage of a census block. **No**

13. Proposed Funded Service Area (BIP - Last Mile Projects):

Please refer to section M at the end of document.

14. Proposed Funded Service Area (BTOP - Middle Mile Project):

Please refer to section M at the end of document.

15. Non-Funded Service Area(BIP Only):

Not applicable

16. Coverage Waiver:

Applicant is seeking a waiver for providing less than 100% coverage of a census block.

No

For Response of "Yes" please refer to upload section for additional supporting documentation.

17. Methodology for Area Status:

Methodology for Area Status.

1. Determination of census block

Since the Wisconsin Education and Library Broadband Infrastructure Build-out project is dedicated to increasing the bandwidth to school districts and libraries, the State decided to concentrate examination of the specific census block of the target facility. The State requested that its telecommunication supplier, the Wisconsin BadgerNet Access Alliance (WBAA), determine the individual census block for each institution that was being connected to BadgerNet network with fiber. The address of the institution was entered in to the U.S. Census Bureau Factfinder web page and the census block information was obtained. On occasion, the address didn't work on the FactFinder website. The address was verified via MapQuest, visiting the sites web page and occasionally calling the site to verify the address. If the address was correct, the FactFinder map was compared to MapQuest to verify that the maps

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

correspond. These two methods were able to resolve all address discrepancies.

2. Determination of Rural

At the State's request, the WBAA determined if a site was in a city, town, or incorporated area that has a population of greater than 20,000 inhabitants; or if the site was an urbanized area contiguous and adjacent to a city or town that has a population of greater than 50,000 inhabitants. MapQuest and the Census Bureau FactFinder were the source of mapping information.

3. Determination of unserved

Since all the sites in this request are currently receiving a minimum of 1.5Mb of broadband or more, there are no unserved sites.

4. Determination of underserved

No sites are in a census block that has 50% or less access to a facilities-based terrestrial broadband service, as explained in the unserved section above. The WBAA was unaware of any proposed block that had less than a 40% broadband subscription rate. There are two local sites within the requested Middle Mile Service Area where no competitor or the ILEC offer or advertise a 3Mb service or higher.

18. Middle Mile Benefits

Middle mile benefits

Our Middle Mile project is designed not just to enhance middle mile telecommunication facilities in many areas of the state but to enhance the network connectivity of 467 important community anchor institutions. These are:

- 74 of the state's 426 school districts that do not have fiber
- 385 of the state's 470 public libraries that do not have fiber, and
- 8 community colleges.

These institutions are now connected to the state's BadgerNet Converged Network but by limited copper circuits. Our application proposes to greatly enhance these connections by

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

bringing fiber optic connectivity to all 467 institutions. In determining projected end users, we have received official numbers from the Wisconsin Department of Public Instruction which indicate that the libraries in our proposal serve 4,273,202 citizens of the state. This represents 77.3% of the state's total population of 5,531,386. (The school and college users are part of the library number.)

The staff, students and library patrons that use these community institutions will benefit by the greatly increased bandwidth our project will provide. As we have explained in other parts of our application (see especially Questions 10, 11), many of these anchor institutions now place restrictions on what Internet or web-based services or applications can be used because of their current insufficient bandwidth.

BadgerNet is the foundation of Wisconsin state government's "Comprehensive Enterprise Technology Plan" to serve and protect the citizens of Wisconsin and support economic development. In this regard, it is important to realize that our fiber proposal will have benefits beyond just these specific community anchor institutions.

Because the telecommunication providers use the same infrastructure for their residential and business customers, our proposal will further the broadband purpose of the American Recovery and Reinvestment Act by simultaneously helping to bring affordable broadband access to residential and business customers in the entire community.

Our project's Middle Mile benefits will also strengthen the reliability of critical community services requiring communication of voice data and video for law enforcement at all levels. This includes National Guard, State Patrol, state emergency government and 911 coordination. During the Wisconsin floods of June 2008 many Wisconsin counties were declared federal disaster areas. The libraries served by our grant application were the only anchor institutions open for the public to send emails to distant family and where businesses could go to conduct emergency operations and complete online federal applications for disaster relief.

Here are the service providers with whom the BadgerNet Converged Network will interconnect. These providers are part of the Wisconsin BadgerNet Access Alliance (WBAA). The following telephone companies and cooperatives interconnect to not only to support BadgerNet but to support all their business and residential customers too.

Non-Discrimination, Interconnection

22. Description of Network Openness:

Description of Network Openness

The policy of the Wisconsin Department of Administration to NOT block or interfere with legitimate applications or services our schools or libraries use over the BadgerNet Converged Network (BCN). In this regard, the BCN is already in compliance with the “Network Openness” provisions in the ARRA and the NOFA.

The BCN is an overlay network provided by 70 service providers across the state and organized by the State’s Prime Contractor, AT&T. The services provided by BCN operate seamlessly because the providers are willing to interconnect to each other, to ISPs and to every end-user.

BCN offers two basic services; (1) Wide Area Network Service (WAN) allowing sites connected to BCN to connect to each other, and (2) Internet Transport Services (ITP) allowing

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

any site to connect to a central ISP POP within their own LATA. Most state agencies, like the Departments of Transportation, Justice and Corrections, use WAN service to tie their remote locations to the agency head-end in Madison. Each of Wisconsin's 17 library systems tie their branches to the main library using BCN WAN service (there are over 400 libraries in the state connecting to BCN today). To a lesser extent, schools use WAN service to tie elementary and middle schools to the district high school. However, all these user communities use Internet Transport Service to connect to a BCN ISP POP.

In each of Wisconsin's four LATAs (Madison, Milwaukee, Green Bay and Eau Claire), BCN provisioned an ISP POP to allow choice in ISPs to BCN users. As a network, BCN transports Internet traffic from a school or library to the ISP POP where it is handed off to one of eight ISPs. The state requires a minimum of 8 Gig ports at the ISP POPs allowing any ISP who qualifies via state contract to connect there. The state contract for ISP service providers is renewed every two years giving new ISP a chance to compete and connect at the ISP POP. Currently connected ISPs are WiscNet, AT&T, Time-Warner, Norlight, Solarus, and Infinity. If selected as the ISP, any local provider can take traffic off locally, rather than connecting at the ISP POP. This allows each of the 70 local service providers who are also ISPs to interconnect to BadgerNet too.

Each user in the network is configured in a private VLAN and handed off at the ISP POP on a Layer 2 connection. By aggregating ISP traffic from BCN customer's into a single location with the LATA, BCN saves the ISP the cost of connecting to rural locations. Each BCN customers receives the added benefit of selecting among a number of ISPs. The school or library can change ISPs every year (or more often) if they choose to.

BCN configures each VLAN for Internet Transport Service with a "Best Effort" quality of service marking. High QoS marks are reserved for WAN clients and real-time traffic (BCN supports approximately 350 live, interactive video conference classrooms and a number of VoIP implementations). Once a packet enters the network on an Internet Transport Service port, it is immediately and automatically marked to 0. In this way, The Department of Administration does not and cannot differentiate any ISP traffic. And since every user location is configured in a separate VLAN and rate limited to a specific increment of bandwidth, it cannot compete for priority with another BCN user.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Non-Discrimination and Interconnection (BTOP applicants only for next three questions)

23. Non-Discrimination Obligations (applicable to Last Mile and Middle Mile Applicants):

Adhere to the minimum non-discrimination requirements as set forth in the NOFA.

Display the nondiscrimination practices in a prominent location on the service provider's web page, and provide notice to customers of changes to these policies.

24. Interconnection Obligations (applicable to Last Mile Applicants):

25. Interconnection Obligations Middle Mile Applicants:

Adhere to the minimum interconnection requirements as set forth in the NOFA.

Display the interconnection policies in a prominent location on the service provider's web page, and provide notice to customers of changes to these policies.

Commit to offering wholesale access to network components and services such as wavelength or fibers at reasonable rates and terms.

Cost Effectiveness and Affordability

26. Cost per Household (BTOP only):

Not applicable -- Middle Mile Project

27. Affordability

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

Affordability:

The broadband service offerings through the State of Wisconsin's BadgerNet Converged Network (BCN) are believed to be very affordable to the 467 schools and libraries addressed in this proposal, provided the federal government grants the State of Wisconsin's funding request.

The 467 schools and libraries in this proposal already qualify for Wisconsin's Universal Service funds administered by the "Technology for Educational Achievement" (TEACH <http://www.teachwi.state.wi.us/>) program. The Wisconsin Legislature created the TEACH program in 1997 to help schools and libraries obtain and sustain their use of broadband and other technologies.

Under the TEACH program, the schools, libraries and other eligible institutions pay a reduced rate (typically \$100/mo for 3 Mbps or less, \$250/ mo for more than 3 Mbps) for their BCN connections; the remainder of the monthly expense is paid by the TEACH program. For example, the current contract rate to connect a school or library to the BCN at 1.5 Mbps of bandwidth is \$575.00/mo. But the library only pays \$100/mo. and TEACH subsidizes the remainder. A library can purchase up to 3 Mbps of bandwidth, which is billed at the contract rate of \$1,035/Mo, but again the library only pays \$100/mo. for this level of service. Bandwidth between 5 Mbps and 10 Mbps costs the library only \$250/mo.

TEACH receives its funding from the state's Universal Service Fund. On an annual basis, TEACH spends approximately \$17 million to subsidize network expense for our schools and libraries. If our grant is funded, the Department of Administration has committed that the intent that the TEACH program subsidize any additional expenses associated with an increase in school or library bandwidth.

AT&T, the prime contractor for BCN, will do their part for this proposal in lowering the cost of service for 20 Mbps and 100 Mbps service. They can justify a lower monthly rate based on the reduced expense associated with providing service if the cost to deploy fiber is covered by the grant. The cost of 20Mbps service decreases from \$2,200/mo to \$1,695 (\$505/mo less) and 100Mbps service drops from \$5,000 to \$2,095 (\$2,905/mo less). With the reduction offered by AT&T, TEACH intends to increase all libraries to 20Mbps for just \$100/mo and all schools will get 100Mbps for \$250/mo. This situation is ideal, since anchor institutions will see a

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

significant increase in bandwidth at a very affordable, sustainable cost.

The constituents of Wisconsin derive an additional benefit by the deployment of fiber-based services to anchor institutions within their communities. The State believes that businesses and residences in those communities will have greater access to broadband service offerings at lower rates once the local service provider deploys the infrastructure outlined in this proposal. Beyond that, anchor institutions, business and residences will be able to upgrade more easily and cost effectively.

Finally, this grant will allow the State of Wisconsin to contractually commit to keep this service installed until November 2016 when the 10 year BadgerNet contract expires. AT&T will lower the rates of approximately 400 other locations, mainly school districts that already have fiber and are not part of this grant application, to have the reduced 100Mbps rate. Therefore, Wisconsin will have over 800 educational/library sites on fiber with significantly reduced rates. These rates are available statewide (postalized) and would simply not be possible to attain without this grant.

F. Technology Strategy

28. Technology Type:

Wireline - Fiber-optic Cable

Other:

29. System Design System Design

BadgerNet Converged Network (BCN) Overview

The BadgerNet Converged Network (BCN) is an IP-MPLS based overlay network providing

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

connectivity throughout the entire state of Wisconsin. BCN has four high capacity Cisco 7609 routers in the network core (P), one for each of Wisconsin's four LATAs. The core nodes are connected via an OC-48 optical ring for redundancy and use OSPF routing protocol among the core nodes.

The aggregation layer (PE) of the network is comprised of seventeen (17) 7600 and 6500 series Cisco routers. Every aggregation node is dual connected to separate core nodes for redundancy. The size of the aggregation layer circuits vary depending on the traffic carried. Currently there are six (6) OC3s, eight (8) OC12s and four (OC24s) as primary connections from aggregation nodes to the core. Redundant links are typically less, sometimes half as much as the primary connection. BCN has both L2 and L3 services requiring MPLS among all PE devices.

The access layer of the network includes over 2000 end-points with a variety of Cisco devices at the customer edge (CE) including 2800 series routers, 2950 switches, 3550 switches and even some ME3400 switches. Depending on the access layer topology, CE device can be either an L2 or an L3 connection.

Internet Service Providers (ISP) Point of Presence (POP)

BCN provides a transport service advantageous to both ISPs and their customers. In each of the four Wisconsin LATAs, BCN provides a point of presence (POP) allowing any ISP under state contract to connect. Annually, the Department of Administration issues an RFP for ISP services and allows up to eight (8) ISPs per LATA per year. This strategy provides BCN customers a robust selection when choosing an ISP and it allows them to switch ISPs as often as they choose. The ISP POP cities are in the four Wisconsin toll centers; Milwaukee, Madison, Green Bay and Eau Claire. At the POP, BCN provides a Gigabit Ethernet port for the ISP to connect to. Typically, an ISP collocates equipment and pays the cross-connect fee to connect to the BCN Gigabit Ethernet port. The ISP provides their own transport from their collocated equipment point back to their network.

At the ISP POP, BCN delivers traffic to an ISP using a Layer 2 connection. Each and every user is provisioned in a unique VLAN and logically separated from every other user. For example, the Burlington public library is delivered to their ISP (WiscNet) on Gigabit port 7/1 at the Milwaukee P router on VLAN ID 732 while the Greenfield school district is delivered to

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

the same ISP on the same Gigabit Ethernet port on VLAN ID 981. All the connections at the ISP POP are delivered through a VLAN regardless of how the CE devices at the customer's premise are connected.

Access Layer Connections

Any BCN connected site can order "Internet Transport Service" and specify any increment of bandwidth as long as they increment is already included in our transport contract with our prime contractor (e.g. 3 Mbps). BCN does not provide ISP services, but transports ISP traffic from anywhere within the LATA to the ISP in the same LATA. The cost is not distance sensitive, so every user within the LATA pays the same monthly recurring charge. By design requirement, ISP traffic never crosses the Core of the network, and, therefore, does not congest the core circuits.

There are a number of different topologies in the Access Layer of the BCN network. Broadly speaking however, these topologies can be categorized into either a Layer 2 connection or a Layer 3 connection. Since the hand-off at the ISP POP is a Layer 2 connection, the CE devices connected at Layer 2 are easy to configure. Layer 3 connections require additional work.

BCN provisions a physical 10/100 Ethernet port on the customer's CE device and configures a VPN through the Access and Aggregation Layers of the network with delivery to the ISP POP (connected to the BCN Core router within that LATA). For a Layer 2 connected CE device, a VLAN is mapped through the various switches (which can be up to 10 depending on how many independent telephone companies participate in the route from CE to PE) through the Access and Aggregation Layers. Even though the PE is dual homed, ISP traffic always routes to the Core (P) in the same LATA. The Gigabit Ethernet port acting as the ISP demarc resides in the P router. Serially connected CE devices are consolidated at TDM aggregator before being past up to the PE router. Within the PE, a Cisco command (xconnect) transitions the connection from Layer 3 to Layer 2 and a VLAN ID is then assigned. The route from PE to and though the P router to the ISP is then identical to the Layer 2 connected devices.

New Infrastructure and Upgrade Path

BCN has over 2,000 CE devices in the network supporting multiple user communities, such as

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

state agencies, schools, libraries, technical colleges, universities, county and municipal governments. Of the 2,000 end-points, less than 500 are identified in this proposal for an upgrade. These sites consist of anchor institutions such as libraries and schools. Since their need is greatest, we've targeted them for new infrastructure changing out copper facilities for fiber in as many places as necessary and possible. Some of BCN connected schools already have fiber and were not taken into consideration for plant deployment. However, they were considered regarding bandwidth increase to 100 Mbps over their existing fiber facilities as that effects middle mile and PE router capacity planning.

Fortunately for BCN, we have most of the infrastructure needed to complete the upgrade. A list of new CE hardware needed to terminate a fiber-based service is provided in Answer #45 (attachment G Bill of Materials). Additional capacity is needed in our middle mile segments and several of our PE routers will need upgraded bandwidth. Fortunately, the increase in bandwidth to support over 450 sites is spread across seventeen (17) PE routers and four (4) core routers so that none of them need to be changed out.

Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

33. Choice of Service Provider:

Does the project's Infrastructure and the Company's business plan allow more than one provider to serve end users in the proposed funded service area?

Yes

G. Project Milestones and Completion Factors

Timeline & Milestones

34. Infrastructure Build-out Timeline:

Please refer to upload section at the end of the document.

35. Licenses, Regulatory Approvals and Agreements:

Licenses, Regulatory Approvals and Agreements Since BadgerNet is an actively running network and operation, all licenses, regulatory approvals and agreements are already in place.

This project will be building out additional fiber in 467 locations to an existing, operational network.

Each of those sites will have different local approvals and permits to allow the construction of the fiber plant. Since the State of Wisconsin's providing vendor, the Wisconsin BadgerNet Access Alliance, consists of the telecommunication companies throughout the State, every telecommunication provided is familiar with the local ordinances and works regularly with the appropriate local government to obtain these licenses and permits. In regards to licenses and permits, this project represents business as usual.

36. Construction and Vendor Contracts

Construction and Vendor Contracts:

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

The State of Wisconsin’s BadgerNet Converged Network (BCN) is operational under an Internet Protocol/Multiple Label Switching (IP/MPLS) statewide broadband Contract # EXC509 with AT&T as the prime contractor working with the Wisconsin BadgerNet Access Alliance (WBAA), comprised of some 70 independent Wisconsin telecommunications companies and Kentucky Data Lines (KDL) to install 256/ KBPS to 1,000 MBPS broadband service anywhere in all 72 Wisconsin Counties.

The Federal Government is also a user of broadband services in Wisconsin under this contract. Under the contract, service is provided under postalized prices which allow for equitable access to telecommunication services throughout the state.

This contract was signed by the Secretary of the Department of Administration with AT&T on March 5, 2005 and the installation of service for just over 2,000 customers was completed on November 1, 2006. This contract is in effect until November1, 2016. Under this contract, thousands of broadband services have been installed in all Wisconsin 72 counties on an IPMPLS fiber backbone with Cisco backbone and aggregation equipment. AT&T has contracts in place contracts with Cisco, Polycom, Renovo, Dascom and many other vendors to support the contract.

The BCN contract and instituted agreements and processes allow for the state and the vendors to efficiently, cost effectively do the work required by this grant to place fiber to 467 library and school buildings. This contract allows the inter-company coordination and cooperation to run middle mile fiber through five different rural telecommunication company territories to get to a very rural school district.

In addition, the BCN contract includes has Service Level Agreements concerning installation of service and includes all the contractual requirements to allow the claim that this grant application is “shovel ready” to place the fiber and upgrade the service at these 467 sites. AT&T and the WBAA have all the internal and external employees and contractors to immediately start ordering equipment, fiber, trenching and implementing a project management timeline to complete the project in a timely manner.

Qualification of Management Team and Organizational Readiness

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

37. Management Team Resumes:

Please refer to upload section at the end of the document.

38. Organizational Readiness:

Organizational Readiness

By utilizing the existing contractual and operational framework for the BadgerNet Converged Network, the State of Wisconsin in cooperation with our prime contractor AT&T and the Wisconsin BadgerNet Access Alliance (WBAA), is prepared organizationally, functionally and operationally to successfully complete this broadband buildout project. Under the existing BCN contract and organization, the State has existing operational framework in place for:

- network governance and management
- billing systems and procedures
- web-base provisioning and tracking orders
- web-based repair service management
- 24 x 365 AT&T Repair Service & Network Management Center dedicated to the contract
- State-operated 24 x 365 Customer Support Desk

WBAA contractually has a dedicated account and service team assigned to this account including a Chief Consulting Network Engineer, Cisco Systems representative, dedicated account billing and management person. Relative to escalation and support we have normal operating procedures for daily contacts, escalation procedures and emergency or disaster recovery contact and communication procedures.

The project will be implemented successfully and in a timely fashion because the State and WBAA have mutual, shared experience in implementing very large voice data and video projects in Wisconsin. Beginning in 2005, the State/AT&T/WBAA team completed the conversion of the new BadgerNet /IPMPLS broadband network involving conversion of legacy video and data networks at 1,770 sites. In 18 months, this conversion project covered all 72 Wisconsin counties supporting just over 2,000 individual end users customers and 330 full motion video classrooms used for daily classes. The effort included building the vast majority of the core and aggregation fiber infrastructure, switching and customer end point installations.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

State agency government service and daily scheduled PK/20 student video classes could not be disrupted or canceled therefore we did live one-for-one conversion delivering excellent continuous customer service.

When the conversion was completed November 1, 2006, it was the largest AT&T IP/MPLS broadband statewide network installed for a single customer in the country. It is important to note that the same State of Wisconsin project conversion manager who worked with the AT&T project management team on the 2005 conversion will manage this grant implementation, with many of the same WBAA project management team members too. This grant proposal involves work for 467 end user education and library sites, but includes middle mile fiber placement and work in hundreds of BCN network cloud locations in all 72 Wisconsin counties.

In addition, what will make the project even more successful and easy to manage is the fact these are already State/AT&T contract customers and they already know us and our process and procedures. This is one another reason we have such a condensed implementation timeframe. We are shovel-ready and we can have a major and immediate stimulus impact.

Examples of documented process and procedures are:

- BadgerNet Dispatch Billing Process
- BCN Billing Overview Subcontractor Vendor Invoice Payment Process
- Contact List, BCN Contact List
- BCN Title and Contact Detail
- CPE Dispatch & CPE Design Bursting Agreement
- BCN Capacity Planning Process

42. Recovery Act and Other Governmental Collaboration.

Recovery Act and Other Governmental Collaboration

Our application focuses on schools and libraries and several government programs are related to our application.

American Recovery and Reinvestment Act of 2009:

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

There are several sections of the ARRA that directly impact our schools and are related to our BTOP broadband application. The most direct relationship is the \$9,170,493 in ARRA funding Wisconsin will receive for Enhancing Education Through Technology (EETT). (EETT is Title II Part D of the No Child Left Behind Act.) The primary goal of the EETT funding is to improve student achievement by using technology and to encourage the integration of technology into the curriculum. In Wisconsin, much of the EETT funding is used by districts in a variety of web-based education programs that often require robust bandwidth. Also by law, at least 25% of this funding must be allocated to staff development and much of this happens via participating in online course work. While some of the courses are taken at home, there are also staff who use their school's Internet connection. There are other parts of the ARRA that impacts a school's bandwidth too. For example, schools can use other Title II funds or Individuals with Disabilities Education Act (IDEA) funds to purchase online course materials for students with disabilities.

Federal Library Services and Technology Act (LSTA):

The Wisconsin Department of Public Instruction receives annually \$3.2 million in LSTA funds to help develop and enhance library services in Wisconsin. About 70% of this funding is targeted at technology, including web-based services and applications. Several uses of LSTA are referenced in our narrative for Questions 10 and 11. Our libraries often use LSTA to pay for bandwidth under the BadgerNet contract. By reducing bandwidth costs, as explained in Question 27, they can then reallocate their LSTA funds for other purposes.

Federal Universal Service (E-rate) Fund:

Annually, the Wisconsin Department of Administration applies for \$6.2 million in federal E-rate funds to help support the ongoing circuit costs on the BadgerNet Converged Network (BCN) for our schools and libraries. We anticipate continuing to use the E-rate funds for this purpose.

Wisconsin Universal Service Fund:

Approximately \$17 million in state universal service funds are used each year to provide discounts for schools and libraries on the BadgerNet Converged Network. If our fiber project is

**Broadband Infrastructure Application

Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

funded, we will be able to leverage the state universal service fund to provide even more bandwidth at less cost. For example, currently the cost for a 45Mbps circuit is 1,250/month. Under our new pricing structure we will provide a 100Mbps circuit for just \$250/month. This is explained in more detail in our answer to Question 27 on Affordability.

Community Involvement (BTOP Applicants Only)

Sustainability

46. Reasonableness

Reasonableness:

The procurement of the BadgerNet Converged Network was the major recommendation made in the 2002 report titled, "Wisconsin Educational Network Business Case." (The Business Case is referenced in Executive Summary.)

In implementing this recommendation the State of Wisconsin, Department of Administration (DOA), conducted a competitive procurement for BadgerNet, a statewide data and video network in July 2004.

In September of 2004 the DOA issued an Intent to Award the bid to AT&T and the Wisconsin BadgerNet Access Alliance (WBAA), a group of 70 local telecommunication providers. After signing of the formal contract in early 2005, DOA and WBAA went through a twenty month implementation process at over 2,000 customer sites in all 72 Wisconsin counties. When the implementation was completed, the BadgerNet Converged Network Contract (BCN) went into effect on November 1, 2006.

The AT&T/WBAA bid was \$60 million lower than the next competitor. The response included the following features:

- Postalized pricing for any location in the State of Wisconsin,
- Bandwidths ranging from 256K up to 1Gb, and
- Sites could be serviced by copper or fiber, it was the choice of the provider and dependent on bandwidth sought.

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

The ARRA BTOP broadband funding allows the State of Wisconsin to build on this competitive structure. By using stimulus money to build fiber out to libraries and schools, the WBAA is able to reduce their postalized rates by 57% for 100Mbps and 23% for a 20Mb circuit.

Unlike other competitive networks, a BadgerNet circuit to a school or a library not only provides transport to an Internet Service Provider, but can also be a connection to a Wide Area Network, such as a library consortium or a video education network. Traditional networks would require three different connections to accomplish this functionality, if they could provide it at all.

In summary, the BadgerNet was competitively bid and the State of Wisconsin selected AT&T/WBAA as offering not just the best services but the lowest prices.

47. Historical Financial Statements:

50. Pro Forma 5-Year Financial Forecast and Assumptions:

Please refer to upload section at the end of the document.

51. Commitment of Capital Funding Support

For Wisconsin's Education and Library Broadband Infrastructure Build-out Grant The only other funding aside from the grant will be the 20% match provided by the state's Universal Service Fund. It is a cash payment with no financial terms or conditions.

BTOP Requirements

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

Submitted Date: 8/19/2009 2:44:00 PM	Easygrants ID: 174
Funding Opportunity: Broadband Initiatives Program and Broadband Technology Opportunities Program	Applicant Organization: State of Wisconsin Department of Administration
Task: Submit Application - Infrastructure Programs	Applicant Name: William Bruce Reines

52. Matching Funds:

- a. Cash: \$ 5,744,600.00
- b. In-Kind: \$.00
- c. Percent of Total Project Cost: 20

53. Demonstration of Financial Need:

Demonstration of Financial Need:

From a general perspective, our school and library budgets under extreme stress because of the current recession. State government aid to both school districts and our library systems was reduced in the budget starting July 1, 2009. While schools and libraries certainly recognize the benefits that fiber connectivity will provide, they simply cannot assume the costs of the fiber installation.

More specifically, the current BadgerNet Contract cost of 20Mbps (\$2,640 /mo) for libraries and 100Mbps for PK/12 schools (\$6,000 /mo) is the prohibitive driving factor prohibiting upgrading bandwidth for all Wisconsin schools and libraries.

At present, the amount of bandwidth installed today for Internet transport to each individual school and library site clearly illustrates this prohibitive cost factor. A limited number of sites have 10 to 20Mbps, one is at 30Mbps and only one has a level of service above 30Mbps. Library headquarters sites have larger services but the average library has 3Mbps or below.

The stimulus package will allow us to deploy fiber to support 20 and 100Mbps at a rate the State of Wisconsin will be able to budget to subsidize school and library circuits. With the grant, the cost of 100Mbps will be reduced 56%. And coupled with the reduction for 20Mbps, the State of Wisconsin will assume the ongoing cost to upgrade the hundreds of sites identified in this grant.

54. Unjust Enrichment

The State of Wisconsin Department of Administration has neither requested nor received any other federal monies for the purpose of supporting any non-recurring costs related to the BadgerNet Converged Network.

55. Disclosure of Federal and/or State Funding Sources

**Broadband Infrastructure Application
Submission to RUS (BIP) and NTIA (BTOP)**

N. Uploads

In order to improve system performance and help ensure that all applicants are able to complete their applications by the deadline, we have changed the way your application PDF is created. This PDF contains all of the information you entered throughout the Easygrants data entry screens. PDF copies of all documents that have been uploaded can be viewed and printed separately from the **Main page of the application after you submit**. These will continue to be available to you in read-only format after your application has been submitted.
