March 25, 2010

To whom it may concern:

I am writing to express Bolivar Medical Center's support of the efforts of InLine to provide improved broadband infrastructure and access to the Mississippi Delta region. Bolivar is a 165-bed, full-service, acute care hospital facility located in Cleveland, MS. We also operate a 35-bed nursing home facility and several specialty physician practices.

Our hospital relies heavily on internet communication for multiple business purposes. Constant needs met by these services include email, teleradiology, PACS, hospital patient accounting, billing, and purchasing systems, to name a very few. The number of applications that we rely on to operate our business is perpetually expanding and will only continue to grow in the future as we prepare to enter the world of electronic health records.

We currently utilize bundled T-1 lines to transmit and receive data. The development of additional broadband services will benefit our facility in numerous ways, including increased speed of data transmission, improved reliability of service, and decreased pricing alternatives resulting from more efficient provision of service and increased provider options.

I encourage you to strongly consider the application submitted by InLine for the NTIA Broadband Technology Opportunities Program Infrastructure grant. If you require any additional information, please contact me at any time.

Sincerely,

A handwritten signature in black ink, appearing to read "Wes Sigler", is written over a faint, larger version of the signature.

Wes Sigler
CEO

RE: **INLINE BTOP GRANT**

Carroll County School District is excited about the BTOP grant being applied for by Inline. Our county is very rural, and because of economic factors we are seeing more and more of our citizens and students moving to the larger Metro areas. We have lost many students in the last five to ten years and are continually looking for new ways to bring these students back to our county to live and work.

This grant could be a game changer for our district, allowing us to provide more content to children in their homes, and increase our speed to the Internet so that we can provide distance learning and virtual classes to our students that are seeking to broaden their horizons and prepare for college. The current economic situation has stifled much of the progress that we have made, and our budget is continually shrinking, forcing us to make the choice between energy for the student classrooms or technology. We hope that you are successful in your endeavors, and that the services you might end up offering will help us leverage our E-rate dollars to provide better technological services to our students.

Sincerely,

A handwritten signature in black ink that reads "Billy Joe Ferguson". The signature is written in a cursive, flowing style.

To whom it may concern,

I am writing in support for the contact network –InLine for its application to the BTOP program to expand Broadband Internet services in the Indianola area of the Mississippi Delta. The services that are now available exclude a large portion of our citizens because of the cost of services.

The rural area outside of our city limits has only a single source for broadband and it is unreliable at best. This makes it hard to recruit new business to our area if we cannot offer the technical infrastructure that they need to do business.

I sincerely hope that you approve the Broadband and Internet Infrastructure project in Indianola, MS and the neighboring communities. We need your help in being competitive with the larger more populated areas.

Sincerely,

Steve Rosenthal
Mayor, Indianola MS

TO: Alan Newman

FROM: Jacquelyn Thigpen, Superintendent of Cleveland School District

SUBJECT: Inline BTOP Grant

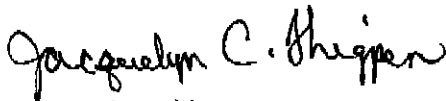

DATE: March 23, 2010

Mr. Newman,

The Cleveland School District is extremely excited about the BTOP grant being applied for by Inline. Our county is very rural, and because of economic factors we are seeing more and more of our citizens and students moving to the larger Metro areas of Jackson, MS. We have lost students in the last five to six years, and are continually looking for new ways to bring these students back to Bolivar County to live and work.

This grant could be a game changer for our district, allowing us to provide more content to children in their homes, and increase our speed to the Internet so that we can provide distance learning and virtual classes to our students that are seeking to broaden their horizons and prepare for college. The current economic situation has stifled all of the progress that we have made, and our budgets are continually shrinking, forcing us to make the choice between heat for student classrooms or technology. We hope that your are successful in your endeavors, and that the services you might end up offering will help us leverage our E-rate dollars to provide better services for our children.

Thank You,

Jacquelyn Thigpen

March 2, 2010

Martin Costa, CEO
InLine
600 Lakeshore Parkway
Birmingham, Al 35209

Dear Mr. Costa,

Delta State University, located in the heart of the Mississippi Delta and committed to the educational and economic development of the rural communities it serves, supports the expansion of broadband technology through Recovery Act funding from the National Telecommunications and Information Administration. We recognize that expanding broadband access is essential to education, health care and job creation in the Mississippi Delta region.

Our K-12 school districts that we collaborate and work closely with through many of our programs are already investing heavily in technology; however, many of those districts serving our rural areas have limited access to broadband services. As a higher learning institution, we recognize the importance that technology plays in preparing students for success in higher education. Furthermore, bringing broadband to homes in our most rural areas will enable our increasing number of online students to have greater access to the technology that is necessary in completing their coursework.

While it is understood that this in no way commits the university to InLine, we support this endeavor and effort to substantially impact the Mississippi Delta through increasing technology access.

Sincerely,

Ann C. Lotven
Provost and Vice President for Academic Affairs

To Whom It May Concern:

We submit this letter in support of the program that will expand Broadband Internet Services in Montgomery County and the area and favor funding to build this infrastructure. We know this will compliment what is already available in our area while paving the way for future evolvement and expansion of the intelligence world.

As a leader in a rural town, it is of great importance that we grow capabilities in the field of broadband and internet access. This is an incentive to attract small businesses, jobs, give an advantage to our citizens, and an opportunity to grow our population. It is important that we are able to offer access to high speed, reliable, affordable, and secure broadband.

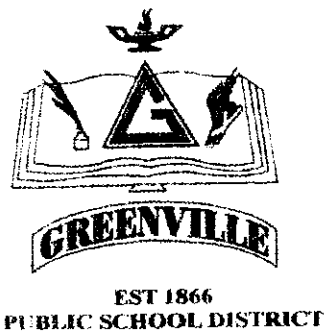

We certainly support your efforts to obtain the funds to increase this type of communication because it is paramount in the growth of Rural America.

Sincerely,

Sue Stidham

To: Whom it may concern
From: Marvin Pate, Director of Information Services
Subject: Inline BTOP Grant
Date: 3/23/10

Greenwood Leflore Hospital is a City/County, not for profit hospital located in the Mississippi Delta. We are very excited about the BTOP that Inline is applying for. Our hospital has a clinic network consisting of 18 clinics. These clinics include over 30 physicians and CNP's who provide care for our patients throughout the Mississippi Delta. With the computer systems now available and the advancement to an electronic health record it is critical that we have reliable access to high speed Broadband and Internet Access.

With greater Internet bandwidth made available to these clinics, we would be able to offer the full complement of healthcare services at our remote clinics that are available at the hospital proper. Our vision of a community wide Electronic Medical Record (EMR) and services like lab testing and results, collaboration among our care provider community and telemetry would be significantly enhanced. Additionally, services not possible due to limited bandwidth such as Picture Archiving and Communication Systems (PACS) will finally be available at our remote clinics.

In short, the BTOP grant that Inline is applying for would greatly enhance healthcare in a very under-served populace.

Kind regards,

From: Bonnie Horton 
Superintendent

Reference: InLine BTOP Grant

The Humphreys County School District is very interested in the BTOP grant being applied for by InLine to bring much needed broadband connectivity to our area. The school district has access through the Mississippi Department of Education at 6Mbps but our students at home do not have this connectivity. Because we are a rural community we are faced with many economic factors. Our enrollment in the last several years has declined yearly and we are continually looking for ways to keep our students at home and bring those back who have left to live and work.

This grant could provide many opportunities for the school and the county and bring us to a 21st Century educational environment. The current economic situation has handicapped the district and we have to choose between teachers, instructional supplies and technology. Technology is a vital part of education and if we cannot keep up our students lose, our parents lose and our community loses. We are very supportive of the BTOP grant being applied for by InLine and hope that you are successful.

Katrina N. Poe, M.D.
Calvin D. Johnson,
Administrator

March 23, 2010

To Whom It May Concern:

Our organization applauds the efforts of InLine for their work in expanding broadband access and services to rural communities in the Mississippi Delta through the BTOP grant program. As a small rural hospital, we face increasing challenges to balance our need to remain competitive in the ever evolving IT environment with our organization's limited resources, small reserves, and narrow bottom lines. As the sole healthcare provider within a community of less the 800 people, affordability and access to adequate broadband services and a robust IT infrastructure remains unattainable.

Currently, our organization is in the process of constructing a new rural health clinic, implementing a radiology PACS system, and preparing for the implementation of Electronic Medical Records. None of these projects will be possible without affordable, reliable, and secured broadband access and an adequate IT infrastructure.

Such access to broadband services and fiber optic network will greatly enhance our ability to provide services to the individuals we have the pleasure of serving and will radically change the electronic landscape for Kilmichael and the surrounding communities.

We request that you give adequate and sincere consideration to the Mississippi Delta for the BTOP grant funding.

Sincerely,

Russell Durham

March 5, 2010

Mr. Alan Newman
Inline

Dear Mr. Newman:

As a school district in the Mississippi Delta, our goal is to increase the number of students from disadvantaged and under-represented backgrounds who graduate from high school and continue their education at the post-secondary level.

If you are successful in obtaining these funds, the students and citizens of Leflore County, Mississippi will have access to additional broadband services. With the many budget cuts we have experienced over the past eighteen (18) months, it will be highly impossible for the Leflore County School District to increase our broadband to provide our students with additional educational content delivered over the Internet.

Inline is to be commended in its efforts to provide greater opportunities for families to gain access to higher education by trying to obtain the BTOP grant. As educators we are supportive of Inline's efforts to obtain funds for this worthy program. We hope that you are successful in your endeavors, and that the services you will offer will help us utilize our e-rate dollars more efficiently to provide better services for our students and their families.

Sincerely,

Willie Jean Hall

MISSISSIPPI DELTA
COMMUNITY COLLEGE

To: InLine

From: Dr Larry G Bailey, President

Subject: InLine BTOP Grant

Date: February 25, 2010

Mississippi Delta Community College is extremely excited about the BTOP grant being applied for by InLine. Our seven county service area of Sunflower, Leflore, Washington, Humphreys, Sharkey, Issaquena, and Bolivar counties is very rural and because of the economic factors we are seeing more and more of our citizens and students moving to the larger Metro areas. We have lost many students in the last five to ten years and are continually looking for new ways to bring these students back to our district to live and work.

The grant could be a game changer for our district, allowing us to provide more content to students in their homes, and increase our speed to the Internet so that we can provide distance learning and virtual classes to our students that are seeking to broaden their horizons and prepare for a baccalaureate degree or even a further. The current economic situation has stifled all of the progress that we have made, and our budgets are continually shrinking, forcing us to make the choice between heat for student classrooms or technology. We hope that you are successful in your endeavors, and that the services you might end up offering will help us leverage our shrinking available funds to provide better services for our students.

Thank you,

A handwritten signature in black ink that reads "Larry G. Bailey".

TO: InLine
FROM: Peirce McIntosh, Superintendent
SUBJECT: InLine BTOP Grant
DATE: February 22, 2010

On behalf of the Sunflower County School District, this letter constitutes our commitment to work with Inline. This grant could be a game changer for the district, allowing us to provide more content to children in their homes and increase our speed to the Internet so that we can provide distance learning and virtual classes to our students. The current economic situation has stifled all of the progress that we have made, and our budgets are continually shrinking, forcing us to make the choice between heat for student classrooms or technology.

The Sunflower County School District is located in Sunflower County in the Delta region of Mississippi. This district is composed of four elementary schools, two middle schools and one high school, serving approximately 1680 students. The schools are located in Inverness, Moorhead, Sunflower, and Ruleville, Mississippi. The district office is located in Indianola, Mississippi, which is the county seat.

Sunflower County is situated about 100 miles south of Memphis, Tennessee, 100 miles north of Jackson, Mississippi, 30 miles east of the Mississippi River, and 40 miles west of the hill section of Mississippi.

Should this grant be funded, we will do our part to support your efforts. Any program that can help our students become productive citizens in their field of study will benefit our society at large.

Sincerely,

Peirce McIntosh, Superintendent of Education

To whom it may concern:

We are writing to express our strong support for the Broadband Network for its application to the BTOP program to expand Broadband Internet Service in the Delta Region of Mississippi; services that are unavailable/limited/too costly from other providers. We are a low to moderate income County.

Currently we have no/limited access to Broadband (or inadequate for our current/ planned purposes) that meet our service needs.

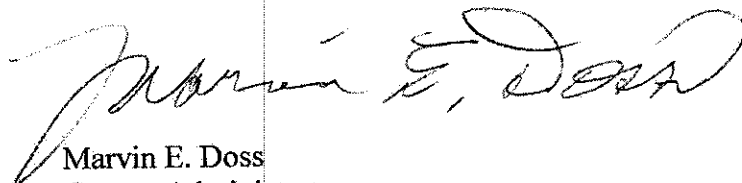

Not having access to more affordable/reliable Broadband access means we cannot serve local infrastructures, industries, a 2800 inmate private prison, Towns and Communities within the county, the three schools in the county, jails, work center, Emergency Management Agency, Civil Defense, Homeland Security, Tallahatchie County Hospital and Extended Care, distantly remote access, etc.

Whatever Broadband Network is awarded a grant, we will have the right connect to these services or issue a RFP for such services.

We will seriously consider the offering that will be available to acquire the additional bandwidth we need.

These Broadband Services will enable the towns and communities to expand economic opportunities and potentially increase the tax base we so desperately need.

Sincerely,

Marvin E. Doss

Dear Mr. Newman:

Tunica County School District is proud to support InLine as they apply for the BTOP Federal Grant to provide better Broadband service to areas of Mississippi.

We wish you the best in your endeavor to offer more bandwidth to our district that will help us to meet our technology vision and mission.

Our technology Vision: The School Board, administration, teachers, support staff, and classified personnel envision working as a team that is committed to guiding our students toward the goal of academic excellence. We will provide an educational environment that utilizes technology. We will provide integrated instruction that enables students to become literate to function in the 21st Century.

The technology mission of the Tunica County School District is to incorporate current and emerging technologies into the educational process in order to enhance the quality of instruction by making technology available to students, parents and teachers, both on and off campus and to help integrate technology into the curriculum by providing computer/Internet access to staff, students and parents.

If we can be of further assistance, please do not hesitate to contact us.

Sincerely,

Dianne Daley
Technology Coordinator

March 23, 2010

To Whom It May Concern:

I am submitting this letter in support of the program that will help enhance and build an infrastructure of Broadband and Internet Access for my community. We are a full service healthcare system that provides emergency, acute, psychiatric, and clinic/outpatient services for our community. With the evolvement of computer and software systems, it is critical that we have access to high speed, reliable, and secure Broadband and Internet Access.

As a healthcare provider, we will be implementing a number of projects that will require available and reliable access at an affordable price. One of those measures is an Electronic Health Record. Implementing such a project will require us to be able to network with high-speed access through secure networks. We have already implemented Tele-Radiology at our hospital. Projects such as these require vast and robust Broadband networks to perform processes efficiently and effectively.

The IT environment will continue to evolve and we will have to expand along with it. That expansion will be costly. The costs we incur are a result of an undeveloped infrastructure in our community. I sincerely request that you approve the Broadband and Internet Infrastructure project in Winona, MS and our neighboring communities. We need your help to continue to excel in our industry.

Sincerely,

**R.M. Tyler
Administrator**

Lawrence E. Strickling
Assistant Secretary for Communications and Information
National Telecommunications and Information Administration
U.S. Department of Commerce
Washington, D.C. 20230

Dear Assistant Secretary Strickling:

We are impressed by the quality of the middle-mile fiber project proposed by Contact Network, Inc. d/b/a InLine Communications, and strongly support its approval. DigitalBridge Communications (DBC) represents a particularly strong potential partner for InLine. DBC has round 1 applications pending or round 2 applications planned that cover nearly every county along InLine's proposed middle-mile route. In addition to being recommended by the governor of Mississippi, DBC would commit to utilize the InLine network and would bring a number of important strengths:

- Operating track record of delivering affordable 4G broadband services to rural residents and businesses in underserved areas (i.e., 2-4 Mbps now with a roadmap to 12 Mbps, fixed and WiMAX-enabled mobile devices, with prices from \$25-\$35 per month).
- Speed and capability to deploy fast (generally within 6-15 months)
- Scale—DBC already provides service across six states and covers 600,000 people.
- Jobs—DBC commits to hire new network, marketing and sales employees in the markets deployed.
- Cost-effectiveness—at \$200-\$300 per household passed, DBC offers 10-20x the number of households served vs. most wireline deployments.
- Commitment to offering free service to critical community institutions such as libraries.

We look forward to establishing a long-term partnership with InLine Communications and together bringing the benefits of 4G broadband services to the underserved residents of Mississippi.

Sincerely,

A handwritten signature in black ink that reads "William F. Wallace".

Executive Vice President
DigitalBridge Communications

Your Invisible Advantage In Wireless

March 25, 2010

To Whom It May Concern:

As CEO of Absocom, I would like to express my support for Contact Network d/b/a InLine's applications to the Broadband Technology Opportunities Program (BTOP) for middle-mile projects under the Comprehensive Communities Initiative (CCI). As a last-mile provider that specializes in wireless solutions for rural communities throughout Mississippi, the prospect of high-capacity backhaul at affordable pricing opens up a number of pathways to expand our service offerings throughout the state.

Access to fiber and other wholesale access is largely limited throughout the state of Mississippi, with few points of interconnect available for access. In the past, our service offerings have largely been limited to T1, Metro-E, and other copper-based services for backhaul, which limits the overall capacity of our last mile networks.

The opportunity to expand our service offerings has the potential to create new jobs within our own company and in our service area as a whole, and can greatly improve the quality of life for residents and small businesses throughout the state by freeing up access to information that, until now, was largely unreachable due to a lack of bandwidth capacity and access to services. We believe that wireless is the most cost-effective way to reach end users in the rural areas of Mississippi that InLine's grant intends to serve, and strongly support the approval of its applications.

Best,

A handwritten signature in black ink, appearing to read "Ike Fowler", written in a cursive style.

1401 Constitution Avenue, N.W.
Washington, DC 20230

Dear Assistant Secretary Strickling:

Re: BTOP Round 2 Comprehensive Community Infrastructure Middle Mile projects being applied for by Deltacom Inc. (Easygrant #7477) and Contact Networks Inc. dba Inline (Easygrant # 4831)

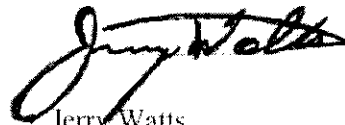

This is a reciprocal letter of support and cooperation on behalf of InLine and Deltacom.

These projects are serving educational community anchor institutions including community colleges in adjacent areas of Mississippi. To increase the efficiency and realize the synergy between the projects the companies are partnering by interconnecting at several locations on the proposed new Deltacom fiber optic network route that transits Mississippi on the I-20 corridor. If approved the projects will provide much needed new broadband capability to an economically depressed area of Mississippi.

The companies plan to engage in joint planning and coordination during the implementation phase of the projects to insure the most efficient system interconnection.

We appreciate your consideration of <Community Anchor Institution>'s support of DeltaCom's project. If you have any questions or need further information, please feel free to contact me.

Letter of Intent

TO: Whom it may concern

The Mississippi Department of Transportation is fully committed to the expansion of Intelligent Transportation Systems (ITS) in South Mississippi. Increased traffic demands coupled with emergency operations and safety concerns, require that MDOT operate the transportation system as efficiently and safely as possible. The deployment of ITS technologies requires the availability of broadband connectivity to diverse geographic areas of the State. MDOT is currently constructing projects in Hattiesburg, Natchez, and the I-59 and I-55 Contra Flow Corridors which fall within the proposed InLine service area. MDOT has the US 49 Incident Management Project & the US 84 Hurricane Response projects under design in the same project area.

In Line is a current partner of the MDOT and provides broadband connectivity on the Mississippi Gulf Coast along US 90. The US 90 ITS Project has won several National Awards for Best Innovative Practices & Traffic Operations Efficiency. MDOT is very interested in expanding its award winning partnership with InLine into the South Central Mississippi area. Based on my past experience with InLine I am confident in their ability to deliver on their vision for this project and I would strongly encourage the consideration of their BTOP grant request.

If I can answer any questions or assist you further in this matter, please contact me @ 601-359-9710 or mstokes@mdot.state.ms.us.

Sincerely,

Mike Stokes

April 27, 2009

To Whom It May Concern:

On behalf of the Choctaw County Economic Development Foundation (Foundation), we support and endorse InLine's efforts to build out a high-speed internet infrastructure throughout Mississippi and to Develop the infrastructure to provide broadband service to government, business, education and residential consumers throughout the eastern Mississippi area, including Choctaw County. I was pleased to learn of InLine's application for funding through the Broadband Technology Opportunities Program (BTOP) as Choctaw County has long been without adequate access to high-speed internet connections.

Providing such access will both increase quality of life for local residents and enhance possibilities for economic growth. In fact, *Area Development* magazine conducts an annual corporate survey of businesses and consistently ranks the availability of high-speed internet access as a leading factor in location decisions.

The Choctaw County Economic Development Foundation is a non-profit organization with a mission to promote business and community development through coordinated effort of its membership. The Foundation membership includes industry, small business, utility providers, local town governments, retail merchants, churches, and individuals. We believe that InLine's experience in building and deploying broadband capabilities and in assisting state and local agencies implement solutions that utilize these capabilities will greatly improve government and education. Additionally, residents and small businesses of the area will benefit greatly by having access to much needed broadband capabilities. All of these factors will make the area more attractive to businesses which are looking to relocate or expand.

Sincerely,

A handwritten signature in cursive script that reads "T. Alan Bates".

To: NTIA

The Mississippi Band of Choctaw Indians, the only Federally-recognized American Indian population in the State of Mississippi, understands and appreciates the high value of making broadband services available to all 10,000 enrolled of which are 6200 Tribal residents within 8 communities who are living primarily in east central Mississippi. Our Tribe is very progressive, constantly working toward higher levels of educational attainment, a major participant in economic development on the Choctaw Indian Reservation, as well as in business sites off-Reservation, and the provider of a multitude of Tribal governmental services ranging from healthcare, housing, and education, to law enforcement, judicial services, and homeland security and emergency management, among many additional services. We are keen on ensuring the provision of reliable and easily accessible, inexpensive broadband services to the entire Choctaw population that our government serves. We have a broad range of Tribal schools, healthcare facilities, court system, social services, rehabilitation, early childhood education, gaming and hospitality industries, legal services, rural and agricultural development, and other Tribal governmental and business operations that rely on fast internet connectivity on a daily basis.

The Tribe intends to plan and develop our own grant application in order to provide increased broadband services to all Choctaw residents, Tribal Council and staff, administrative governmental offices, all Tribal School System locations, as well as to all Choctaw business enterprises. The Tribe has 35,000 acres of land, most of which is held in perpetual Federal trust for the benefit of the Tribe as a whole. These vast land holdings are geographically scattered in a checkerboard fashion, and are situated in ten different Mississippi counties. We have eight Federally-recognized Choctaw communities in Mississippi, with our largest community and site of Tribal government headquarters being located centrally in Neshoba County. One of our communities, Bogue Homa, is located 100 miles south in Jones County, Mississippi. Given this geographic dispersion, the Tribe chooses to fully support the Contact Network, Inc. dba InLine application that will cover our Tribal members and Choctaw lands in Jones County. It is not feasible to extend the network we would build at our Tribal headquarters in Choctaw, MS, since the distance is 100 miles or perhaps a bit farther.

We look forward to working with NTIA to build a world class network for our Tribal members and businesses. Thank you for your ongoing support as we proceed with this very important information technology project in benefit of the Mississippi Band of Choctaw Indians.

Yakoki (Thank you)

Re: InLine BTOP Grant

The Delta Area Association for Improvement of Schools (DAAIS) is happy to support Your BTOP Grant Application.

DAAIS is made up of thirty-nine educational institutions located in or adjacent to the rural region known as the Mississippi Delta. The total **DAAIS** student membership exceeds 110,000 children, and more than 75 percent of these children are free lunch eligible. The **DAAIS** schools have a high percentage of teachers with emergency, provisional, or temporary certification or licensing. If this grant is funded the children of the **DAAIS** schools will be provided with more top quality learning opportunities through the internet as they complete their PK-12 education and prepare for college.

PLANNING AND DEVELOPMENT DISTRICT, INC.

P. O. BOX 1776 124 SOUTH BROADWAY STREET GREENVILLE, MISSISSIPPI 38702-1776 PHONE (662) 378-3831 FAX (662) 378-3834

April 28, 2009

To Whom It May Concern:

On behalf of the South Delta Planning and Development District we wish to express our support for InLine's efforts to build out a high-speed internet infrastructure throughout Mississippi and to develop the infrastructure to provide broadband service to government, business, education and residential consumers throughout the eastern Mississippi area. This area has long been without adequate access to high-speed internet connections, and we believe that providing such access will both increase quality of life for area residents and enhance possibilities for economic growth.

This letter is solely meant to show support for InLine and demonstrate our interest in broadband services. It is not legally-binding on either party, and applies only to funding available through the BTOP program. If InLine's application to the Broadband Technology Opportunities Program (BTOP) is funded, the South Delta Planning and Development District expects to act in partnership with InLine and will fully cooperate to facilitate a smooth implementation of program activities by facilitating the use of public resources to the extent feasible. In addition, this letter does not restrict either party from applying for any other funds available through the American Recovery and Reinvestment Act or any other potential grant or loan funding sources intended to expand broadband availability or services.

We believe that InLine's experience in building and deploying broadband capabilities and in assisting state and local agencies implement solutions that utilize these capabilities will greatly improve government and education. In addition, the residents of the area will benefit greatly by having access to much needed broadband capabilities. All of these things will make the area more attractive to businesses which are looking to relocate or expand.

Beverly Culley, Ph. D.

Superintendent of Education

To: InLine
From: Dr. Beverly Culley 
Date: February 26, 2010
Re: InLine BTOP Grant

The Benoit School District is extremely excited about the BTOP grant being applied for by InLine. Our district is very rural, and because of economic factors we are seeing more and more of our citizens and students moving to the larger Metro areas. We have lost many students in the last five to ten years and continually looking for new ways to bring these students back to Benoit School District to live and work.

This grant could be a game changer for our district, allowing us to provide more content to children in their homes, and increase our speed to the Internet so that we can provide distance learning and virtual classes to our students that are seeking to broaden their horizon and prepare for college. The current economic situation has stifled all of the progress that we have made, and our budgets are continually shrinking, forcing us to make the choice between heat for student classrooms or technology. We hope that you are successful in your endeavors, and that the services you might end up offering will help us leverage our E-rate dollars to provide better services for our children.

Thank you in advance for your consideration and support.

From: William H. Tribble
Subject: InLine BTOP Grant
Date: February 24, 2010

Greetings,

The East Tallahatchie School District counts it an honor to be able to support the opportunity to participate in appliance by InLine for a BTOP grant. East Tallahatchie School District lies on the foothills of the Delta. The District is rural and because of hard economic times more and more of our citizens and children are moving into larger cities. We have lost industry as well as other job opportunities over the past several years. Our Community and District are constantly seeking ways to keep our present students as well as desiring to entice former students and citizens back into the Community and District.

Receiving the BTOP Grant would allow our students to receive a vast amount of content information into their homes at a greater speed than what is now available. With severe budget cuts now existing, the BTOP Grant would allow the District to bring in distance learning classes for our students where the District may not be able to provide teachers for such needed academics if it were not for technology such as distance learning.

The East Tallahatchie School District would like to thank you for the opportunity to express its support for the appliance by InLine for a BTOP Grant.

Sincerely,

William H. Tribble *Superintendent*

InLine
405 Legacy Park
Ridgeland, MS 39157

Dear InLine:

The West Bolivar School District is eager about the possibility of bringing broadband connectivity to the Delta Area through the BTOP grant being applied for by InLine. In the West Bolivar School District, we have invested heavily in computers, software, and other technologies that enable our students to have access to 21st Century learning opportunities. We have yet to fully realize the potential of our capital outlay in these areas, however, due to limited connectivity and infrastructure issues. There is a great need for broadband service in the Delta area.

Broadband connectivity would allow us to increase our speed to the Internet so that we can provide distance learning and virtual classes to students as we prepare them for college and beyond. In addition, broadband connectivity would expand learning activities after school hours given the majority of our students have no access to broadband services at home.

The current state of the economy has been devastating to the Bolivar County area. The lack of employment opportunities has forced many families to relocate to larger metropolitan areas; thereby, causing significant enrollment declines in the West Bolivar School District. Over the past three years alone, the district enrollment has decreased approximately 20%. We are continually exploring for new ways to bring these families back to Bolivar County to live and work.

The current economic situation has stifled the technology progress that we have made in the West Bolivar School District, and forecasts are bleak. As far as the budgets are concerns, technology expansion must take the backburner to more pressing financial outlays such as heat and air conditioning for classrooms, fuel for buses, and needed repairs and renovations. Consequently, this grant could be a game changer for our district, allowing us to provide more content to children in innovative ways.

This grant will greatly enhance our efforts to improve educational offerings provided to our students and leverage our current E-Rate dollars committed to Internet access. We hope that you are successful in your endeavors.

Sincerely,

Hollandale School District

To: InLine
From: Steven Martin
Technology Coordinator
Subject: InLine BTOP Grant
Date: March 1, 2010

The Hollandale School District is excited and hopeful of the BTOP grant applied for by InLine. As with most school districts in the Delta, our technology budget has declined tremendously. We are in desperate need of more bandwidth but do not have the adequate funds to meet our needs. We are currently using a 3 MBPS circuit and our download and upload speed is not sufficient enough for our teachers and students to use technology to their full potential. This grant would help our district as well as other school districts, hospitals, and local businesses to attract and retain new students.

Thank you,

Steven Martin

Acceptance of any order is subject to continuing credit approval. Prices quoted by P&T are valid for 14 days or until stated expiration date on P&T's quote. Prices quoted do not reflect applicable taxes, duties, export fees, transportation and freight charges. Changes in the quantity, shipping destination or special handling that differs from quote may result in price adjustments. Return of merchandise requires written authorization by P&T. P&T or the manufacturer may assess a cancellation or restocking charge. Materials listed on P&T's bids, quotes and other writings are based on P&T's understanding of information received from Customer and, when necessary, on certain assumptions by P&T. Customer is responsible for examining and determining that such listings conform to the Customer's requirements.

P&T part numbers are for reference only and P&T reserves the right to ship functionally equivalent material from any manufacturer without prior notice to Customer. All shipping and performance dates are approximate and subject to availability. Unless otherwise stated, title to the ordered materials transfers to Customer when materials are consigned to the carrier and it is Customer's responsibility to file any claim against the carrier.

All P&T invoices are due and payable thirty days from the billing date. Accounts not paid when due will be subject to Finance Charges computed at the rate of 10% per year (or, if less, at the maximum rate allowed as interest by applicable law) on the unpaid account balance from due date until paid. These Finance Charges shall not be deemed to entitle Customer to an extension of time for payment or as an offer of an extension of credit. Payments received will be applied first to any outstanding Finance Charges. If the account is placed with a collection agency or attorney for collection or suit, or if P&T otherwise employs counsel or takes legal action to enforce, protect or preserve its rights and remedies, Customer will pay, promptly upon demand, all expenses and costs incurred by P&T, including reasonable attorney's fees. Customer grants P&T the unrestricted right of offset against any account of ours with P&T. If the account should become past due, orders may be held by P&T until the account is paid in full. Until the invoice is paid in full, Customer grants to P&T a continuing security interest in the goods and materials covered by that invoice and authorizes P&T to take all necessary steps to perfect such security interest.

This document and all subsequent sales documents and transactions with P&T shall be governed by the laws of the State of Tennessee (excluding conflict of law rules). Customer consents to jurisdiction and venue in any state or federal court sitting in Shelby County, Tennessee, in case of any litigation in connection therewith, and to the maximum extent permitted by law, Customer agrees that such jurisdiction and venue shall be exclusive. If any part or provision of this agreement is determined to be invalid, or unenforceable, this shall not affect the validity or enforceability of the remaining provisions of this agreement, which shall remain in effect.

BTOP Comprehensive Community Infrastructure Community Anchor Institution and Network Points of Interest Detail Template

Please complete the Anchor Institution Details worksheet by providing information on Community Anchor Institutions that will be directly connected by the proposed network as necessary. All Community Anchor Institutions should be given a type from the specification. A Community Anchor Institution is considered a minority-serving institution if it is a post-secondary educational institution with enrollment of minority students exceeding 50% of its total enrollment. The "Project Role" column only requires a word or two, or a short phrase, not a detailed explanation of the role of project partners and community anchor institution provided in the essay portions of the application.

Please complete the Points of Interest worksheet by providing information on all points of interest (passive, non-environmentally controlled points of interconnection, cell tower points, may be excluded), collocation facilities, central offices, head ends, and other central facilities, network access points to last mile service providers, Internet peering points, etc. For each point of interest you may provide either a street address or geocoordinates (lat/long). You must provide detail on what the point of interest is, whether it is already existing or will be created by the proposed project. Where more than one facility type applies, select the most appropriate facility type. For example, if a central office houses a point of interconnection, select central office as the facility type, or if a cell site is located on a tower, select tower as the facility type. Interconnection Available at the Facility field should be Yes if interconnection to the proposed network is available at that location, otherwise No. The brief description field is optional and can be used to convey a better understanding of what the facility is. You may use the space at the bottom of the table to provide additional notes, if desired.

The data provided via this template will be subject to automated processing. Applicants are therefore required to provide this upload as an Excel file, and not to convert it to a PDF or other format for upload. Additionally, applicants should not modify the format of this file.
