INSTRUCTIONS FOR THE SF-424A

Public reporting burden for this collection of information is estimated to average 180 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0044), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A, B, C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A, B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary Lines 1-4 Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the Catalog program title and the Catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the Catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the Catalog program title on each line in *Column* (a) and the respective Catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1-4, Columns (c) through (g)

For new applications, leave Column (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5 - Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1-4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Line 6a-i - Show the totals of Lines 6a to 6h in each column.

Line 6j - Show the amount of indirect cost.

Line 6k - Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

Line 7 - Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount, Show under the program

INSTRUCTIONS FOR THE SF-424A (continued)

narrative statement the nature and source of income. The estimated amount of program income may be considered by the Federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal Resources

Lines 8-11 Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a) - Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b) - Enter the contribution to be made by the applicant.

Column (c) - Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d) - Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e) - Enter totals of Columns (b), (c), and (d).

Line 12 - Enter the total for each of Columns (b)-(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13 - Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14 - Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15 - Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16-19 - Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20 - Enter the total for each of the Columns (b)-(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21 - Use this space to explain amounts for individual direct object class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22 - Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23 - Provide any other explanations or comments deemed necessary.

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0040), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

- Has the legal authority to apply for Federal assistance and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project cost) to ensure proper planning, management and completion of the project described in this application.
- 2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
- Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
- Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
- 5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
- 6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), which prohibits discrimination on the

- basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. 6101-6107), which prohibits discrimination of the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VII of the Civil Rights Act of 1968 (42 U.S.C. 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (i) the requirements of any other nondiscrimination statute(s) which may apply to the application.
- 7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
- Will comply, as applicable, with provisions of the Hatch Act (5 U.S.C. 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

Previous Edition Usable
Authorized for Local Reproduction

Standard Form 424B (Rev 4-2012)

- 9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. 276a to 276a-7), the Copeland Act (40 U.S.C. 276c and 18 U.S.C. 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-333), regarding labor standards for federally-assisted construction subagreement.
- 10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$10,000 or more.
- 11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in flood plains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.); (f) conformity of Federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).

- 12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 et seq.) Related to protecting components or potential components of the national wild and scenic rivers system.
- 13. Will assist the awarding agency in assuring compliance will Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
- 14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
- 15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) Pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
- 16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4801 et seq.) Which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.
- 17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."
- 18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.

SBDD State of Georgia Mapping Application Addendum Submittal

U.S. Department of Commerce – NTIA

Contact:

Rich Calhoun

State of Georgia

Director, Broadband Stimulus Office

404-463-5906

richard.calhoun@gta.ga.gov

July 1, 2010

Project Abstract:

Enclosed is the State of Georgia's response to the recently issued SDBB Addendum request by NTIA.

Georgia looks forward to partnering with NTIA to produce high quality mapping that will assist in making good fact based decisions for telecommunications investment in Georgia. For ease of planning purposes, all of Georgia's grant addendum starts at Year 3 and completes at Year 5.

In the response below, NTIA will also see that Georgia is committed to developing a Georgia Broadband Center of Excellence (GBCOE) that will drive sustainable adoption, collaboration, and high impact utilization across education, telemedicine, public safety, and vulnerable populations. The end result will be to improve our future economic development through enhanced broadband deployment and utilization programs.

The State of Georgia, through its designated entity of Georgia Technology Authority for broadband infrastructure mapping, has developed an extensive plan to further its mapping systems and processes, data output, and analytical tools in years three through five and substantially rollout new programs to facilitate the enhanced deployment, and utilization of broadband through the state. In summary, these activities are:

(i) Capacity Building: \$978,680

(ii) Mapping: \$1,985,240

(iii) Local Regional Planning: \$922,040

The total request is \$3,885,960.

State of Georgia Capacity Building (4 pages)

NAME: State of Georgia Broadband Center of Excellence (GBCOE)

FUNDS AWARDED: NTIA has allotted \$500,000 for a sustainable adoption program for programs in our 91 counties of persistent poverty rural areas. This program will take a state-wide look at the broadband needs of the state and identify resources, set goals and promote follow-through and execution to make Georgia the best in class internationally.

FUNDS REQUESTED: \$978,680

PROBLEM: The Georgia Technology Authority seeks to ensure that the state's IT infrastructure is stable, secure and well-governed, and provides Georgians with the services they need and expect. More specifically, GTA: Manages the state's IT infrastructure — data center, network and telecommunications services and security; Establishes policies, standards and guidelines for state IT and Promotes an enterprise approach to state IT.

The Georgia broadband ecosystem also includes a dynamic public and private sector stakeholders outside the state system that need direction and state involvement to leverage resources and set objectives and goals, leverage best practices and promote collaboration outside the state system.

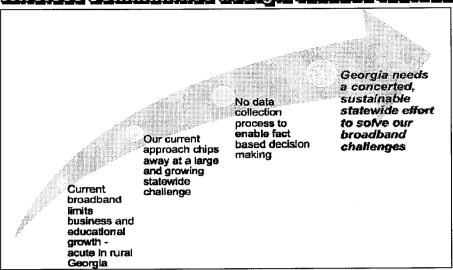

GTA's statutory responsibilities encompasses Technology enterprise management — methods for managing technology resources for state agencies; resources include data centers, servers, mainframes, PCs and laptops, wide and local area networks, telecommunications and technology personnel and Technology portfolio management — approaches for analyzing and ranking the state's technology investments.

Although GTA was charged by the Governor to manage the ARRA broadband portion of the stimulus, management considered these activities as temporary. The Governor's wireless communities Georgia program which provided oversight and grant funds have produced 6 networks using 802.11 and 802.16 wireless standards is also sun setting in October 2010.

In addition to the \$58M that the state has received in from NTIA, and an additional \$87M in round two project recommendations there is no state organization that provides leadership on broadband in a consistent and sustainable way.

The problem set includes not having a central broadband authority and no consolidation of state leadership around common goals. Enclosed is a chart that outlines results of a lesson learned study performed by the Georgia Technology Authority in early 2008 that outlines state broadband needs:

Wireless Communities Georgia Lessons Learned

Through the NTIA ARRA broadband grant funding program we have been able to begin to address Georgia's broadband needs and get better mapping and data collection to enable fact based decision making.

SOLUTION: The state of Georgia government needs to expand its thought leadership in broadband by creating a broadband organization to develop strategies, goals, best practices with a focus on providing affordable broadband for Georgians to help ensure our economic development future.

Georgia Broadband Center of Excellence (GBCOE) initial activities:

- 1. Meeting with state's public policy makers to educate, enlist support, and create a mutually agreed upon framework for the GBCOE Completed by: February, 2012
- 2. Develop public-private sector advisory team to outline organization goals, objectives, and measures March, 2012
- 3. Further define broadband goals and objectives for the State April, 2012:
 - i. Public safety
 - ii. Education
 - iii. Adoption and training (Vulnerable Populations)
 - iv. Community Anchor Institution Technology Planning
 - v. Telehealth Infrastructure
 - vi. Access (Unserved and Underserved)
 - vii. Spectrum Management
 - viii. Mapping and Data Collection
 - ix. Smart Grid/Energy Management
 - x. Grants Management
- 4. Meeting with subject matter experts at local, state, federal and international level to ensure use of best practices April, 2012
- 5. State broadband summit to gather input for Georgia Broadband Plan and measurable objectives June 2012
- 6. Create State Broadband Plan with issuance by September 2012

- 7. Release broadband information and application sharing repository to share mapping, analysis, and new applications created and purchased for education, citizen broadband training, telehealth, and public safety. Data will need stored and accessible throughout the state and operational by September 2013.
- 8. State broadband plan collaboration and partnerships: Bring key stakeholders together to leverage existing stove pipe organizations and institutions (service providers, Public Safety, Telehealth, vulnerable populations, Smart Technologies, and Community Anchor Institutions) to identify win-win business opportunities, use of shared resources, common goals, and economic development opportunities. Begins September 2012 and operates on-going throughout period of performance.

OUTCOMES AND BENEFITS:

The GBCOE anticipated outcomes are the keys to showing value to public-private sector that will help convey its value in the Georgia broadband ecosystem. Below is our first pass at outcomes that we expect to start seeing benefits from as early as July 1, 2012. There will be many activities being executed along the way with most activities having a migration plan with further measurable objectives and a dashboard to show progress in a transparent way.

These outcomes and benefits are in addition to those expected for the Planning Grant Georgia received in 2009. The activities for those funds remain the same, with a focus on educational adoption

Туре		Metric	Impact/Value
1.	Grants Availability	List of federal and state grants for broadband expansion	Will allow Georgia to compete favorable for its fair share of grants. But will allow for businesses to understand the full compliment of grants that are available and when. This could lead to technical assistance workshops to help Georgia business compete more favorably for these financial resources.
2.	Telehealth Adoption Rate	Determine what the telehealth adoption rate by county is for Georgia. What applications are being used and the data rates needed for certain applications. Number of Physicians and locations with and without telemedicine.	This information will allow for Georgia to identify the barrier to entry for use of electronic health records and other telehealth applications.
3.	Education – Distance Learning	Number of Georgia's using distance learning in public school, technical colleges and universities	Correlation between improvement in state educational standards and how these institutions are managing growth in these areas.
4.	Smart Grid	Identify companies that are making investment in broadband for smart grid.	Identify the applications and technology appliances needed for energy management.
5.	Municipal Broadband	List of Municipalities that are involved in provider broadband services	Determine the Municipal networks and how they are faring on speed, reach, ROI or cost of ownership.

6.	State Broadband Plan	Plan will outline state objectives, goals, best practices in a written transparent format Updated twice a year. Create newsletters for citizens' and policy makers quarterly.	Mechanism for collaborative partnerships toward common goals across key broadband functional areas
7.	Hold broadband summit with local, state, federal and international leadership	Forum for stakeholders to give input on objectives and best practices.	Viral collaborative state that results in more broadband economic development investment in Georgia
8.	Create state-wide repository of broadband information accessible by website and other method	Promote side to get no less than 500,000 businesses and citizens registered on site.	Citizens updated on training, deployments, grants, and uses of broadband

COST: NTIA has been an advocated for Georgia expansion if broadband through the ARRA broadband funding. The new focus on capacity building is welcomed. The additional \$893,680 investment is reasonable given the startup costs of jump starting a new broadband organization.

The high-level summary costs will include the following cost items over a three year period:

- GBCOE Staff Resources \$ \$710,880
 - State Leadership (Program Director and Consulting) are needed to maintain and increase thought leadership
- State Broadband Summit: \$80,000
 - Bringing together key broadband stakeholder to participate and exchange ideas will single change in the state
- Broadband information and application sharing repository: \$40,000
 - o Mapping, analysis and new application created and purchased for education, citizen broadband training, telehealth, and public safety will need stored and access throughout the state
- State Broadband Plan: \$ 30,000
 - o A written plan that is accessible online will need resources to pull information together information for a best in class plan that can be reference and is useable

These and other miscellaneous costs including travel make up the total budget.

Total \$978,680

SBDD PURPOSE: The mapping program is the foundation of gathering facts through identifying unserved and underserved to the best levels formulates our state's challenges as accurately as possible. This core foundation directly correlates to how we formulate first a sound broadband structure through the establishment of GBCOE and to gain the support of public and private sector stakeholders for meaningful change in our state.

State of Georgia Broadband Mapping (3 pages)

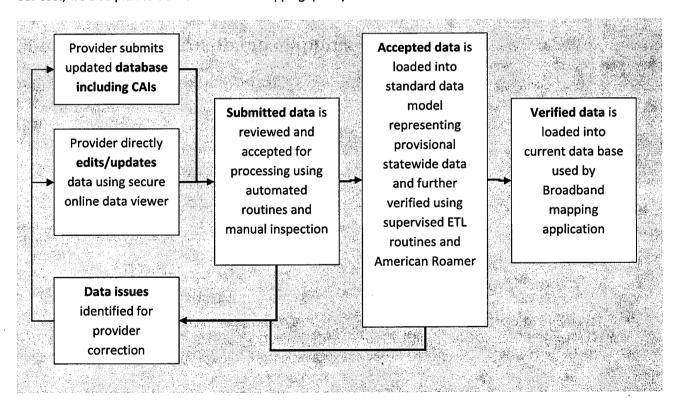

DATA COLLECTION, INTEGRATION, AND DISPLAY

Funding Summary:

Current amount that has been awarded for this activity	\$ 1,693,700
New funding request contained in the proposal	\$1,985,240
Total for Mapping	\$3,678,940

PROCESS FOR REPEATED UPDATING

With this proposal, Georgia intends to deliver 3 years of mapping datasets, delivered two times per year, to NTIA at a reduced cost compared to today. While we expect to achieve operational efficiencies which reduce our cost, we also plan to deliver increased mapping quality as described below.

DATA GATHERING METHODOLOGY

Georgia currently receives data from the service providers participating in the program and overlays this data on top of base maps from various public sources. Georgia expects to continue to operate and improve this process with additional data. Through additional funding, Georgia plans to add the following:

- Directly collect Community Anchor Institutions subscription speeds and committed capacity (for specifically K-12 schools, public safety, community colleges, and telemedicine entities)
- Purchase American Roamer wireless data services and spectrum usage
- Increase service provider participation in data collection from 67% to 90% of all service providers.
- Request speed data from providers by the same feature type as the rest of the data (census block & address).
- Include pure resellers which will require new contacts to be made and logged, new NDAs to be put in
 place, changes to the data models and processing scripts, additional verification and changes to the
 web applications built for the project.

PROCESSES FOR DATA INTEGRATION

Georgia has developed Extract, Transform and Load (ETL) routines to integrate the data into a production data model, and resolve the data provided to a spatial feature such as a census block or street segment. We expect to set up ETL processes for all providers to achieve efficiencies in the long run.

- Integration of data for Years 3 to 5 will also include transformation of data from the Census 2009 geography to Census 2010 geography including the processing of ancillary data related to Census 2010.
- Create a format for delivery of non-confidential data.
- Integration of FCC speed test data and American Roamer data into data repository.

VERIFICATION METHODOLOGY

Verification is a critical part of the mapping process. Georgia plans to increase our comparisons of the provider data to commercially available data sources, publicly available datasets, and performing other spatial analysis on the data to look for spatial outliers or discrepancies. In addition, we propose to implement the following:

 Create a data confidence scale for all data collected as part of our data verification/validation methodology.

Provide/public feedback loops whereby the public can provide feedback to the provider in the
information portal and interactive mapping application. In addition, the provider will be able to track
and correspond with the public through the use of the provider portal and social networking
technologies.

DISPLAY

Georgia expects to enhance its display capabilities on an annual basis in years 3 through 5. Some of the enhancements that have already been envisioned include:

- Provide sorting options of provider data presented after an address search is performed
- Provide public, private, state feedback loops within application environment as noted above
- Provide enhanced data layer mapping, queries, and reporting
- Incorporate address data into application search and reporting
- Create executive dashboard for summary statistics
- Other enhancements as identified by end user feedback

Georgia will also make the public Interactive Portal compliant with the Safari browser for Mac Users as a growing number of users in the state use Apple Products.

State of Georgia Local and Regional Broadband Planning (3 pages)

NAME: State of Georgia Local and Regional Broadband Planning

FUNDS AWARDED: \$0

FUNDS REQUESTED: \$922,040

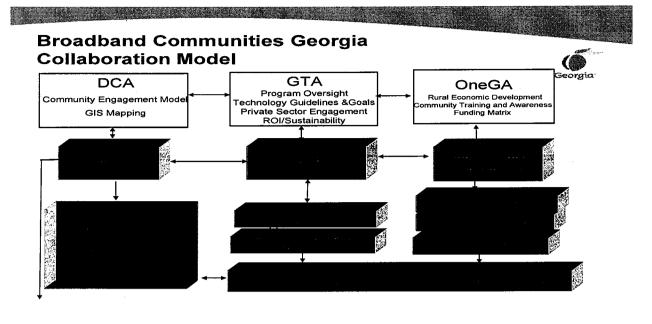

PROBLEM: A big barrier to the adoption of broadband is community anchor institutions do not have the capacity to plan for broadband under their span of control. This leads to CAI engaging into relationships with vendors, consultants and not truly absorbing how services map to goals and objectives. In addition, and most CAI's need to grow thought leadership, expertise and governance structures to manage this utility. The promise is that leveraging skills to broadband from familiar capital projects such as construction, water and sewer, and library expansion will increase entities success factors to be a contributing partner to the broadband ecosystem in their areas.

SOLUTION: Engage CAI to develop local/regional technology plans specific to their area. Collecting this information will allow for synergistic collaborations and identification of gaps in broadband coverage, and the capacity building that is needed to introduce, deploy and maintain broadband in a given area throughout the state. We have 12 regional commissions in the state that cover our 159 counties. This will be the organizations that will be responsible for engaging with counties, local entities and community group to develop technology plans. These funds will be used to develop templates, provide guidance to complete plans over a three year period. Our mapping datasets will assist in us developing more realistic plans.

Georgia Regional Commission Areas

OUTCOMES AND BENEFITS:

Page:10

This activity will be directed under the Georgia Broadband Center of Excellence and will design, develop, provide assistance in the use of mapping data, local and state expertise to design a technology plan for all 12 regional commission areas in the state of Georgia.

Georgia Broadband Center of Excellence

Enclosed are the anticipated benefits of our local and regional broadband planning efforts:

Туре	Metric	Impact/Value
Design broadband templates and online system to receive technology plans	Expand mapping website to receive broadband plans by June 1, 2011	Increase transparency on CAI needs and desires for broadband in the unserved and underserved areas as identified in Georgia datasets maps
Broadband Plan	Receive 12 broadband plans from each of our 12 regional commissions by June 1, 2012	Assess the expertise and broadband needs at the local and regional levels.
Technical Assistance Workshops	Hold 12 regional commission workshops beginning June 1, 2011 through October 1, 2011 and repeating these activities June 1, 2012 through October 1, 2012	Prepare CAI for technology plans and answer questions and assist entities to apply.
Analysis of Broadband Plans	Create gap analysis from received technology plans to determine patterns August 1, 2012	Analysis will result in specific programs that will assist CAI is being more effective and participating in partnering and collaborating to improve broadband situation

June, 2010

Tracking CAI Activities	Track number of broadband	Will inform public policy makers, citizens and other
1	engagements under way and major	stakeholder on activities throughout the state of
	milestones and target completion	Georgia. This transparency will help anticipate
	dates	broadband expansion and drive broadband adoption
		programs.

COST:

Major cost components include:

- Development of Regional Plans at \$50,000 per region for the state's 12 regional planning districts.
- Professional planning consulting at \$140,000 over three years
- Travel budget of \$52,800 over 3 years to support regional planning

Total \$922,040

SBDD PURPOSE: The mapping program is the foundation of gathering facts through identifying unserved and underserved to the best levels formulates our state's challenges as accurately as possible. This core foundation directly correlates to how we formulate our CAI technology broadband plan.
