Comprehensive Community Infrastructure **Budget Narrative Template**

Applicant Name: Nez Perce Tribe

EasyGrants Number: 5022

Organization Type: Tribal government

Proposed Period of Performance: Oct 2010 - 2012

Total Project Costs: \$ 2,282,589

Total Federal Grant Request: \$ 1,569,109

Total Matching Funds (Cash): \$ 52,300

Total Matching Funds (In-Kind): \$ 661,180

Total Matching Funds (Cash + In-Kind): \$ 713,480

Total Matching Funds (Cash + In-Kind) as Percentage of Total Project Costs: 31.25%

1. Administrative and legal expenses - \$321,787

Collocation agreements will be established with project partners on shared tower space; First Step Internet and the Nez Perce Tribe have agreed upon a rate of \$ 500 per month for each tower site; there are four. Collocation is considered an admin/legal costs under Buildings/Other in detailed budget.

Nez Perce Tribe Information Systems staff time for management, customer care and middle/last mile support wages have been included as Admin in kind contribution for the proposal budget; this in kind contribution includes: 1 FTE for billing support; 4 FTE technicians for last mile service delivery and customer care; 3 FTE positions have been identified to provide middle/last mile network support; and 0.75 FTE has been identified for funding by BTOP for project administration and management.

The FCC licensure coordination and legal filing must be done under a recognized agency, the quote received for this work is included under professional services/engineering and included for funding under BTOP.

Cash Source 1: Nez Perce Tribe information Systems programmatic budget is the sole source for cash matching funds.

In-Kind Source 1 the Nez Perce Tribe Information Systems programmatic budget is the sole source of in kind contribution. Each staff position identified (customer support, billing, network & IT support) will be dedicated to network implementation. The network access for Frame Relay and Backbone circuits have been included as in kind contribution; the network connectivity is a must that has been pledged to

support the broadband telecommunications enhancement across the Reservation by the Nez Perce Tribe.

2. Land, structure, rights-of-way, appraisals, etc. - \$0

Throughout project development the team worked to identify sites for towers that would compliment existing infrastructure and locations on tribal trust lands. By locating on Tribal trust lands, the project has reduced the need for annual lease payments and term negotiation requirements that could have negative impacts on the long term sustainability of the network.

Quotes for site development, grid connectivity, towers, tower erection, prefab sheds and network access equipment were sought in order to insure site development costs were being accurately identified. Tribal trust lands do require a cultural resource survey, which has been quoted by the Nez Perce Tribe Cultural Resources program staff.

3. Relocation expenses and payment - \$0

NA

4. Architectural and engineering fees - \$0

Network path engineering was done by TESSCO as a project development service with no up front fee; TESSCO certainly hopes to be the supplier to network access equipment as the project is implemented. This brought value to the project development team as a certified engineer established the pathway calculations, frequencies and access equipment to best meet the project needs.

5. Other architectural and engineering fees - \$ 0

NA

6. Project inspection fees - \$ 3,510

Site inspection will be performed by Tribal Cultural Resources program staff to insure site excavation does not disturb culturally significant assets. Electrical grid connection inspection fees have been included in the estimate for grid connectivity by the local power cooperative.

7. Site work - \$229,750

Costs for site preparation at tower sites proposed is based on estimates received for similar private sector projects in the region. Each site estimate includes: road access, site excavation, foundation and fencing by the Idaho Tower Construction Company. Installation of the access equipment is also identified as site work; this work will be undertaken by project partner First Step Internet staff at an agreed upon rate.

8. Demolition and removal - \$0

NA

9. Construction - \$ 453,000

Costs included under construction are tower erection; gird connectivity and placement/set up of the pre fab equipment sheds. The Tribal Employment Rights Office (TERO) on the Nez Perce Tribe Reservation has a process for contractor certification. This project will utilize contractors whom are certified as Indian Owned whenever possible. In addition to being Indian owned, a major part of the certification is a demonstration of readiness to provide services. Currently, there are twenty-six certified contractors; eleven of which are suitable for construction and site development for tower locations and associated control room outbuilding construction. TERO certified contractor listing is available on line at <http://www.nezperce.org/Official/certifiedindianbusiness.htm>

10. Equipment - \$680,684

Test Generators	Fluke DTX - 1800 Kit	15990	1	\$15,990

Switching	Cisco Systems 3560 Series	\$1,415.00	20	\$28,300

\$680,684

Cash Match \$28,300.00

BTOP

Request \$652,384

11. Miscellaneous - \$ 475,623

The miscellaneous line item includes the network transport connectivity from the Nez Perce Tribe Information Systems network to the internet via a frame relay and backhaul circuits; these are in kind contributions to the project by the Tribe total value \$ 427,803 annually.

Additional misc. line items identified are in general supplies (< \$ 5000 value) ; they include the routers, cable and cable kits support access equipment installation and battery back ups.

13. Contingencies - \$0

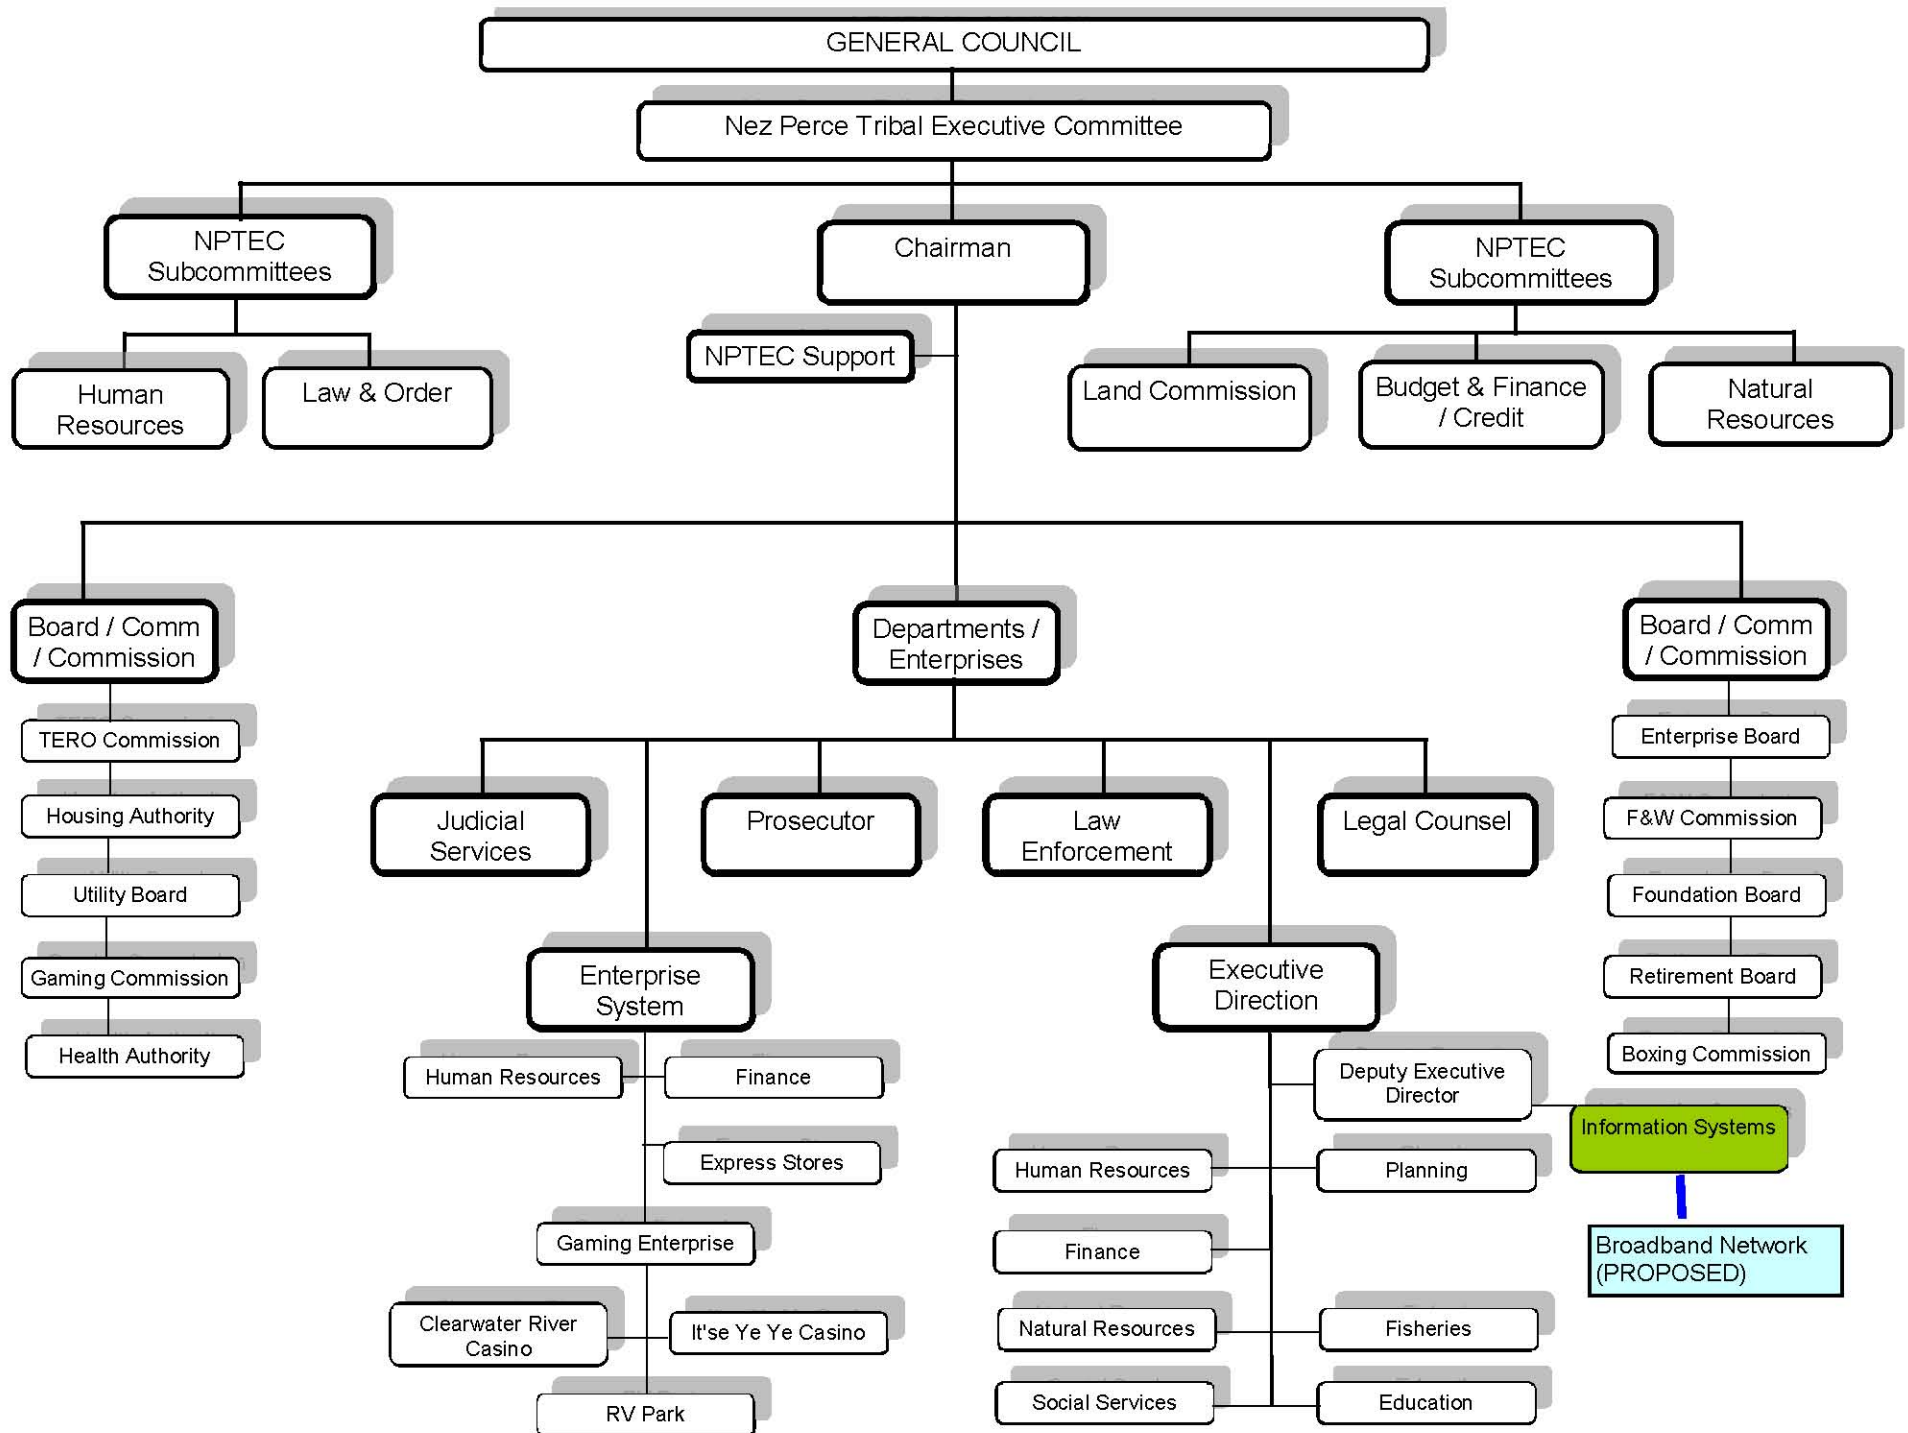

15. Project (program) income - \$0

Addendum

The Nez Perce Tribe and federal government most recent Indirect Cost Negotiation Agreement has been included in the supplemental uploads.

Note: Verify that indirects are calculated correctly and are eligible BTOP costs. To clarify, reasonable indirect costs under BTOP are only allowable for Full Time Employees (FTEs) associated with the construction, deployment, or installation of facilities or equipment used to provide broadband service.

NEZ PERCE TRIBE ORGANIZATIONAL CHART

Danae Wilson

208-843-7307 (work) danaew@nezperce.org

OBJECTIVE

To expand technology management as a professional experienced in operations with oversight of technology planning, advancements and conversions through implementation of new systems from LAN/WAN, Mainframe and custom application. Project Management planning with achievable implementation through scheduling target dates, goals and organization. Oversight of technical team and assist in programming, software/hardware installation and system management. Fiscal planning with organizational goals, objectives and strategic planning utilizing advanced technologies to achieve strategic objectives over short and long term.
