RE: Oklahoma Community Anchor Network Application

Dear Administrator Strickling,

Pursuant to the National Telecommunications and Information Administration (NTIA) Notice of Fund Availability, the state of Oklahoma is submitting a Comprehensive Community Infrastructure grant application.

This grant will fund the installation of a fiber backbone of 1058 miles throughout Oklahoma to benefit vulnerable populations and rural communities. The Oklahoma Community Anchor Network proposal demonstrates a strategy for improving educational outcomes, access to health and employment services, and an enriched quality of life for Oklahomans.

This application has been prepared in cooperation with other state agencies, community partners and the private sector. The opportunity for Oklahoma to continue to expand broadband access and services throughout our state is an important tool for us to deliver public services and to promote job growth and development.

As Speaker of the Oklahoma House of Representatives, I am pleased to offer my support to the Oklahoma Community Anchor Network grant application.

Please do not hesitate to contact me should you have questions, comments or require additional information. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink that reads "Chris Benge".

Champions for Effective Municipal Government

March 23, 2010

The Honorable Larry Strickland, Administrator
National Telecommunications and Information Administration
1401 Constitution Avenue, N.W.
Washington, District of Columbia 20230

Dear Administrator Strickland:

I am writing to express my support for the State of Oklahoma's Comprehensive Community Infrastructure grant application, the Oklahoma Community Anchor Network.

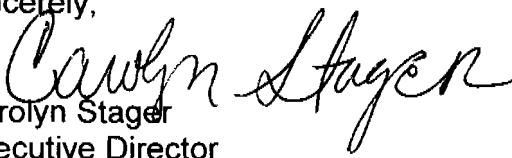

Much of the population of Oklahoma is underserved because the State contains many small municipalities that are rural in character and economy. Therefore, they have not been included in the regular business plans of current providers. Many of our rural citizens face challenges in finding the affordable broadband services that are critical in gaining access to education, health, small business and employment information. By bringing broadband to "the city gate", the Oklahoma Community Anchor Network proposal promises to effectively address these needs.

This proposal demonstrates a coordinated effort involving many state agencies, community partners and the private sector. We have long recognized the importance of broadband expansion in our State. However, Oklahoma, like many other states, is struggling to weather the current economic climate.

This proposal will significantly impact economic development and quality of life in many of this State's communities. As Executive Director of the association of cities and towns in Oklahoma, I am happy to offer my support to this endeavor that will improve the quality of life for our most rural and vulnerable citizens.

Please do not hesitate to contact me should you have questions, comments or require additional information. Thank you for your attention to this matter.

Sincerely,

Carolyn Stager
Executive Director

OKLAHOMA STATE REGENTS FOR HIGHER EDUCATION

Improving our future by degrees

March 24, 2010

Joe Fleckinger
Deputy Director of Information Technology
Office of State Finance
2209 N. Central
Oklahoma City, OK 73105

RE: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

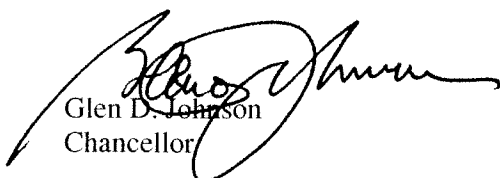

The Oklahoma State Regents for Higher Education (OSRHE) wishes to express its utmost support for Oklahoma's Community Anchor Network (OCAN) and its goal of developing a broadband middle mile fiber infrastructure throughout the state. I understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project, and the OSRHE offers its unequivocal support to this notable grant application.

With a current enrollment of more than 232,000 students, the Oklahoma State System of Higher Education is comprised of 25 colleges and universities – including two research universities, 11 regional universities and 12 community colleges – and 11 constituent agencies and one higher education center. All of these community anchor institutions are served by OneNet, the state's official information and telecommunications network for education and government, which is operated by the OSRHE in cooperation with the Oklahoma Office of State Finance.

Once implemented, OCAN will directly enhance the primary objectives of the OSRHE which is to enhance access and improve the quality of public higher education for all Oklahomans, to increase the number of college graduates and to better prepare students to meet the challenge of a global economy. Specifically, OCAN will substantially upgrade connectivity to targeted higher education institutions and provide more reliability that will enable the OSRHE to better serve Oklahoma's students in a more efficient and effective manner.

In closing, I would like to emphasize the OSRHE's enthusiasm with regard to the grant application. By supporting an initiative such as this, a framework will be established to provide more reliable and advanced broadband infrastructure to higher education institutions throughout all Oklahoma. Accordingly, I strongly encourage the National Telecommunications and Information Administration to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

Glen D. Johnson
Chancellor

REDLANDS

COMMUNITY COLLEGE

OFFICE OF THE PRESIDENT

March 25, 2010

Joe Fleckinger
Deputy Director of Information Technology
Office of State Finance
2209 N. Central
Oklahoma City, OK 73105

Mr. Fleckinger,

Thank you for affording Redlands the opportunity to add our college name to those to be benefited by your project request. Please recognize this letter as a written statement of commitment of interest and planned utilization for the Oklahoma Community Anchor Network (OCAN). We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project and we enthusiastically offer support to this grant application and commit facilities to house key network components vital to the OCAN infrastructure.

Once this grant is funded and implemented, Redlands will benefit greatly from the direct fiber connection. Specifically, RCC will substantially upgrade our connectivity and provide more reliability that will enable Redlands to better serve our students in a more efficient and effective manner.

Beyond enhancing our teaching and learning mission, we anticipate this broadband middle mile route will provide the essential framework that can promote economic development in our area. Through open access to the funded infrastructure, key fiber assets can be made available to local telecommunications companies who can then provide the much-needed last mile component to our rural citizens and businesses.

Clearly, funding this ARRA grant will be a win-win for Redlands and its service area communities. We at Redlands strongly encourage the NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

Dr. Larry F. Devane, President
Redlands Community College

RE: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

Southwestern Oklahoma State University wishes to express its commitment as an Anchor Institution in Oklahoma's proposal to develop a broadband middle mile fiber route throughout the state. We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project and we enthusiastically offer support to this grant application and commit facilities to house key network components vital to the OCAN infrastructure.

Once implemented, SWOSU and the surrounding community will benefit greatly from the direct fiber connection. Specifically, it will substantially upgrade our connectivity and provide more reliability that will enable us to better serve our students in a more efficient and effective manner.

In addition to enhancing our teaching and learning mission, we anticipate this broadband middle mile route will provide the essential framework that can promote economic development in our area. Through open access to the funded infrastructure, key fiber assets can be made available to local telecommunications companies who can then provide the much-needed last mile component to our rural citizens and businesses.

Recognizing the long-term benefits both to SWOSU and the surrounding community, I strongly encourage the NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

RE: LETTER OF COMMITMENT TO STATE OF OKLAHOMA CCI GRANT APPLICATION

Dear Mr. Strickling,

The Oklahoma Office of State Finance (OSF) is committed to the State's proposal to build a broadband middle-mile state fiber ring. OSF will be the grant applicant for the State of Oklahoma. OSF partners in this grant application are the Oklahoma Department of Transportation (ODOT) and OneNet, Oklahoma's telecommunication and information network for education and government. These partners are also responsible for ongoing operations.

This middle-mile broadband fiber ring will promote economic development in the state, increase educational opportunities and make available fiber strands to local telecommunication companies to provide last-mile service to businesses, schools, colleges, universities, hospitals, libraries, government, public safety and citizens.

As the grant applicant, OSF will be responsible for accounting for grant funds, project cost, customer billing and preparation of periodic and annual financial reports to NTIA and partners. OSF will contribute as in-kind match the cost to setup the central financial and management information system to process all grant and operating transactions. OSF will provide accounting and Information Services Division (ISD) personnel as needed to support the grant and ongoing operations after construction. The cabling department of ISD will work with ODOT during construction and support ongoing technical operations of the fiber network.

Recognizing the long-term benefits to citizens, education, health care, public safety and economic development, OSF is committed to the project and will provide the necessary resources to make the project successful. I strongly encourage NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

Summary of Qualifications

Self-motivated results-oriented professional with a proven record of accomplishments in government and industry and as partner and partner in charge of Big 4 accounting and consulting firm. Well versed in information technology, in all aspects of the administration of an information technology organization, financial management and analysis, budgeting, accounting and preparation of financial statements in the governmental and private sector. Significant experience in management information systems, telecommunication, systems planning, hardware and software selection, system implementation, project management, data security, quality assurance, organizational reviews, strategic planning, reengineering and contract negotiations.

Professional Experience

STATE OF OKLAHOMA, OFFICE OF STATE FINANCE, Oklahoma City, Oklahoma 2003 to Present

Deputy Director of Information Technology and Director of Information Services Division

Manage the State's Central Information Technology and Telecommunication systems and operations. Direct the CORE (ERP System) support and implementation, PC support, server support, application development, local and wide-area networks, voice and data communication infrastructure, email, information security, data center operation, helpdesk functions and State portal. Established the security, procurement, quality assurance, helpdesk and project management functions within the Information Services Division. Created a shared services model to support the information technology and telecommunication – PC, servers, networks, imaging, helpdesk – needs of other state agencies. Now support over 67 agencies. Negotiated terms and conditions for hardware, software and consulting services resulting in one-time savings of over \$1.5 million and over \$12.0 million in annual savings. Identified the inability to recover the State's voice and data communications infrastructure and the central data center, and the lack of monitoring of the State's network for cyber attacks. With Homeland Security grant monies was able to mitigate identified weaknesses. Worked with the Legislature on statutes for accessibility, software escrow, improvement in State security including electronic media destruction, and construction of a secured central data center and office complex. Develop and manage the annual operating and capital budget for the Division - \$41.5 million.

FLEMING COMPANIES, INC., Oklahoma City, Oklahoma 1995 to 2002

An industry leader in the wholesale distribution of consumable goods.

Director, I/T Administration and Controller

Directed the quality assurance, security, email, administration, financial, purchasing, training and recruiting functions of the Information Technology Department. Developed and monitored the annual Information Technology operating and capital budget of at least \$90 million and \$100 million, respectively. Established financial, procurement and capital and operating budgeting processes. Negotiated terms and conditions of consulting, software and hardware contracts resulting in reducing on-going annual costs by at least \$200,000 per year. Established and staffed an information security and purchasing department and reengineered the quality assurance function. Responsible for development and monitoring a \$250 million capital budget to replace legacy information systems with best of breed systems, including SAP.

DELOITTE & TOUCHE

A Big 4 accounting and management consulting firm specializing in strategic business analyses for domestic and international companies. Increased revenues in each operation from between 200 percent to more than 500 percent.

Partner in Charge, State of Oklahoma Practice

Computer & Management Advisory Services, Oklahoma City, Oklahoma 1986 to 1994

Directed profit center operations including strategic and profit planning, hiring and developing consultants. Marketed, managed and billed consulting projects. Grew client base, increasing consultants from three to 11.

Partner in Charge, Oklahoma City office, Oklahoma City, Oklahoma 1980 to 1986

Managed the office operations including strategic planning, profitability, developing business, university relationships, training and directing audit and consulting client engagements in the public and private sector. Increased office from 20 to 50 staff members.

Partner in Charge, Austin office, Austin, Texas 1976 to 1980

Managed the office operations including starting a government consulting practice, strategic planning, profitability, developing business, recruiting, training and directed consulting and audit engagements in the public and private sector. Downsized office to meet client base; then rebuilt when client base increased.

Partner in Charge of Practice Development

Partner in Charge of Management Consulting, Houston, Texas

1973 to 1976

Accomplishments

Management Information System

Directed projects to assist a variety of entities, including an HMO, government agencies and wholesaler, select state of the art software and hardware. The projects included definition of user requirements, development of requests for proposal, evaluation of vendor responses, recommendations of software and hardware vendors, and assisted in negotiating contracts with the selected vendors.

Contracts

Negotiated contracts for professional services, equipment, software, office space and office supplies. Evaluated vendor proposals and contracts, identified issues, and provided recommendations to management and legal counsel to ensure compliance with requirements. These negotiations resulted in significant initial savings and ongoing annual maintenance.

Re-engineer Operations

Led a study to re-engineer the operation of the motor pool of a major Oklahoma university. As part of this project, reviewed the cost structure and rates being charged for the maintenance performed. We recommended changes in the method of allocating costs to the services being performed and a methodology for determining charges for these services.

Operations Improvement

Directed the review and evaluation of the operations of a chain of over 200 stores. Our recommendations resulted in \$20,000 improved profitability per store.

Performance-Based Compensation System

Developed a performance-based incentive compensation system for all permanent employees of a Master Planned Golfing Community. The computer-based compensation model included customized performance and management-by-objective criteria, projected next year's salary and year-end bonus allocations based on performance scores, merit increases and bonus pool.

Publications and Presentations

Presentations to various organizations on technical subjects relating to IT, IT auditing and controls, financial management and accounting.

Wrote a monthly column for *C-Store Business* magazine.

Conducted financial, fringe benefit and inventory management seminars for the National Association of Convenience Stores.

Professional Activities

- American Institute of Certified Public Accountants, Current Member
- National Association of State Chief Information Officers, Current Board of Directors
- Oklahoma Society of Certified Public Accountants, Current Member
- Institute of Management Consultants, Former Member
- National Association of Convenience Stores, Former Member
 - Annual Compensation Survey, Seminar Instructor and served on three task forces
- Deloitte & Touche Committees, Retired Partner
 - Partner Compensation Task Force
 - Food and Consumer Product Industry Planning Committee
 - Recruiting Task Force for Management Consultants

Community Organizations

- Allied Arts Foundation, Inc. - - Past Chairman, Secretary-Treasurer, Executive Committee and Board of Directors
- Catholic Foundation of Oklahoma - - Past President, Chairman of Investment Committee and Board of Directors
- Economic Club of Oklahoma - - Current Member - - Past President and Board of Directors
- Junior Achievement - - Past Chairman and Treasurer, Executive Committee and Board of Directors
- Oklahoma City Philharmonic - - Current Past President and Board of Directors

Education

- Tulane University, New Orleans, Louisiana
- Master of Business Administration in Accounting
- Bachelor of Business Administration

Ralph J. Smith Jr.

Objective: Utilizing over 30 years of experience, knowledge and skills in information technology field while working and training others.

Work Experience:

Information Systems Planning Specialist, Level IV

12/06-Present

Assigned responsibilities include overall tactical and long range planning and leadership for developing information systems infrastructure to meet agency requirements for telecommunications and information technology. This includes radio, telecommunications, computer processing systems and other forms of voice and data technology. This includes the statewide backbone fiber and copper infrastructure. Aid users, senior management and others to identify and define long-range information services infrastructure requirements, develop a plan of approach, determine costs and resources required, and provide project leadership for key technology initiatives. Serve as project manager on various telecommunications projects and initiatives in implementing new technologies or integrating systems across agency or technology lines; Identify and define deviations from plan requirements and provide for modifications or changes to meeting user needs. Daily supervised information systems planners to support the statewide fiber and copper infrastructure.

Information Systems Planning Specialist, Level III

12/03- 12/06

As IS Planner III, I planned, managed, provided oversight and quality assurance on data communication cabling projects throughout the State of Oklahoma. Provide knowledge and skills including fiber and copper cabling standards, quality practices and procedures, data communications technology standards, and testing techniques (including associated toolsets). My duties incorporated project management methodology, measurements standards and business practices. Skills and abilities include understanding technical principles, theories, concepts and cabling technologies to complete assigned tasks. Responsibilities included the installation, maintenance and repair of the State Fiber Optic Infrastructure throughout the State of Oklahoma.

Information Systems Network Management Specialist, Level III

09/01-12/03

Designed, developed, administrated and maintained various telecommunications and computer networks. This includes operating systems and related services such as equipment installation, coordination of repair services, and billing/budgeting requirements. My responsibilities included servicing two division branches that consisted of five individual Local Area Networks (LAN) and over 150 workstations with associated peripheral equipment.

Assistant Engineer for Telecommunication Central Office Equipment (COE)

11/00 – 09/01

Assistant Engineer for COE; my primary responsibilities involved assisting senior staff personnel in the planning, designing and coordination of equipment installation for independent rural telephone companies. Provided professional consultation to customers in the procurement, upgrade and maintenance of telecommunication switches and associated peripheral equipment. Accessed client switches to determine proper system configuration, isolate faults and provide corrective action when necessary.

Information Technology Project Manager

10/99 – 11/00

Analyzed requirements, developed, and documented communication optimization plans. Served as project manager for department approved communications network plans while documenting all milestones and maintaining project data in MS-Project format. Installed and removed communications equipment as requested by customers for configuration management. Planned and coordinated remote communication optimization in conjunction with centralized communication

Ralph Smith

office initiatives and support. Planned, wrote, coordinated and directed Level 1 Network support training. Provided operational documentation to Government Technical Management and technical points of contacts as needed. Assisted acquisition personnel in the budgeting and procurement requirements process for automated equipment in branch offices.

Assistant Network Installation Technician

09/98- 08/99

Assistant network installation technician; my responsibilities included organizing and directing network equipment installations and site surveys, supported the assessment and documentation of current communication network configurations and user requirements, directed preparation of engineering plans and site installation technical design packages with associated departments. Prepared, directed and lead preparation of drawings and documentation of configuration installation and test reports for center upgrade projects. Assisted senior technicians during the configuration and installation of personal computer hardware and software as required.

Computer Training Instructor

08/96 – 09/98

Planned, designed, coordinated, managed, and served as lead instructor for network training program created for system network personnel in support of customers. Surveyed trainees to determine future enhancements to the programs and changing in training. Installed and configured network hardware as directed by Senior Network technicians in the installation of Local Area Network hardware including routers, hubs, and concentrators. Determined potential upgrades and enhancements to existing hardware and software by analyzing associated network design of Defense MegaCenter LAN. Installed and configured Quick-tape Magnetic Tape Management System.

Military Experience: United States Air Force

07/93-04/96

Superintendent of the Regional Processing Center; considered a craftsman in the field of telecommunication store and forward system operations. Managed problem analysis functions for 80 assigned personnel in the Defense MegaCenter Oklahoma City, (Regional Processing Center (RPC)). As Unit's Senior Military Advisor, advised Senior Management Staff on issues involving enlisted personnel. Led, guided, interpreted policies and goals for career development of assigned enlisted subordinates. Provided direct consultation to senior management concerning enlisted personnel performance and conduct under military regulations. Coordinated DMC OKC RPC activities for four Major Commands (MAJCOM's) the Air National Guard (ANG), HQ Air Force Reserve (AFRES) and other units across the Midwestern United States. Expertly managed Functional Transition Sub-Team, wrote, coordinated, and implemented comprehensive transition plan for workload transfer to Tinker AFB Base Network Control Center (BNCC). Professionally directed Daily Production Meeting, reviewed operational processes, and identified problems affecting customer service developing fixes to correct those problems. As Non-Commissioned Officer in Charge (NCOIC) of the Customer Service Center, Supervised daily operations providing efficient data processing service for connected customers within the Operations Center. Alerted customer's of planned and unplanned outages utilizing the Responsive Problem Tracking System. Assistant Supervisor for the System Management Center (SMC) DMC-OKC RPC; my responsibility included reporting network and system failures, coordination of network maintenance through commercial vendors and to provide direct customer support to connected clients. Supported connected customers by reporting individual systems failures and outages, scheduled maintenance repair, and troubleshooting to identify problems affecting connected services. Supported system connectivity through five standard base level computer platforms and connected peripheral equipment. Operated advance automated ACD equipment to direct, coordinate and report network and system degradation. While functioning as Special Projects Manager, advised senior (civilian) management on military issues pertaining to administrative affairs, regulations, and commitments. Within a 24-hour time span effectively relocated the SMC Helpdesk staff (19 personnel) and associated equipment.

Education*

Webster University	Master of Arts –Computer Resources & Information Management-	October 2002
Oklahoma City University	Bachelor of Science- Technical Management	May 2000
Project Management Institute	Certified Project Management Professional	May 2009

* **Completed all Degree work from 1996 thru 2002 while working full time position.**

Ralph Smith

Job-Related Honors, Awards, Memberships, etc:

Telecommunications Project Management Association (TPMA) (Inside / Outside Plant) 2008
Adjunct Professor / College for Working Adults: Saint Gregory's University. OK
Oklahoma City University Alpha Sigma Lambda National Honor Society-Omicron Chi

Job Related Training:

Oklahoma City, OK 73105

RE: Letter of Support for Oklahoma's Broadband Stimulus Application

Dear Mr. Fleckinger,

The Oklahoma Council of Two Year Presidents has voted unanimously to support Governor Brad Henry's application to develop and improve broadband infrastructure within Oklahoma.

Community Colleges play a critical role not only in educating and training youth, but also in providing communities with broadband access to the internet. The internet services made available by these anchor institutions are important to low income, elderly, unemployed, disabled and other vulnerable population groups as well as to our students.

Most of Oklahoma's Community Colleges are located in smaller cities and have been unable to keep up with the growing internet demands placed on our campuses. This is particularly true for our institutions with residence halls. Due to restrictions on the amount and speed of available connectivity at many of our sites, we cannot offer the same level of education or training afforded students and community members at more urban settings. Further, reductions in state funding have presented additional challenges in meeting bandwidth and technology demands. Despite our repeated efforts, we have been unable to improve our broadband access at these locations.

Oklahoma's Community College enrollments have increased dramatically by more than 10 percent system wide and as much as 25 percent in some cases. These critical anchor institutions are encountering increased demand for their internet services but have fewer resources to meet those needs. In some instances our institutions are not only falling behind in the types and amount of broadband-based education that can be offered, but are also experiencing "crashes" due to demand exceeding capacity.

Increased funding for significantly upgraded broadband services at Oklahoma's Community Colleges will:

- Allow Community Colleges to provide a more robust offering of online education, including video conferencing and media-rich materials similar to those being offered by our urban counterparts.

- Allow Community Colleges to expand their computer and internet access capabilities for the general public, which is critically important in these times of economic distress.
- Bring additional broadband capacity into the community for local providers to extend to businesses and residences in our community.
- Encourage the purchase of computers and other technology hardware.
- Promote residential broadband adoption, as expanded programs will educate consumers about the use of computers and internet technology and help them become more comfortable adopting these services at home.

Rural Oklahomans will benefit from development and expansion of the broadband infrastructure in the State. Rural citizens in Oklahoma will gain faster and less expensive access to electronic news, weather, and medical and emergency services information. Internet access to weather and traffic information during severe weather will help safeguard lives. Ambulances and first responders with mobile data capability will be better able to quickly respond to emergencies

New opportunities will be opened to our rural citizens and students through the exchange of information and online marketing. Therefore, businesses will be in better positions to compete for jobs globally. Local Governments and schools who decide to use this service will benefit from significantly more network capacity and increased functionality. Short and long term job growth will be stimulated. Fiber installation jobs in the short term and new economic development opportunities for long term growth can be realized. Generally, the quality of life in Oklahoma's remote, un-served and underserved areas will be enhanced as a result of the improved services provided by the broadband infrastructure that will be built with an award of the requested grant.

On behalf of Oklahoma's Council of Two Year Presidents, we heartily endorsed Governor Henry's Broadband Stimulus Application for Oklahoma.

Sincerely,

Paul W. Sechrist, Ph.D.
Chair, Council of Oklahoma Two-Year College Presidents

Gary Davidson

Dear Mr. Fleckinger:

SUBJECT: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

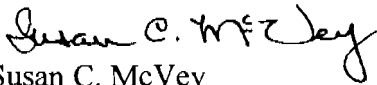

The Oklahoma Department of Libraries wishes to express its commitment as an Anchor Institution in Oklahoma's proposal to develop a broadband middle-mile fiber route throughout the state. We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project, and we are happy to offer support to this grant application.

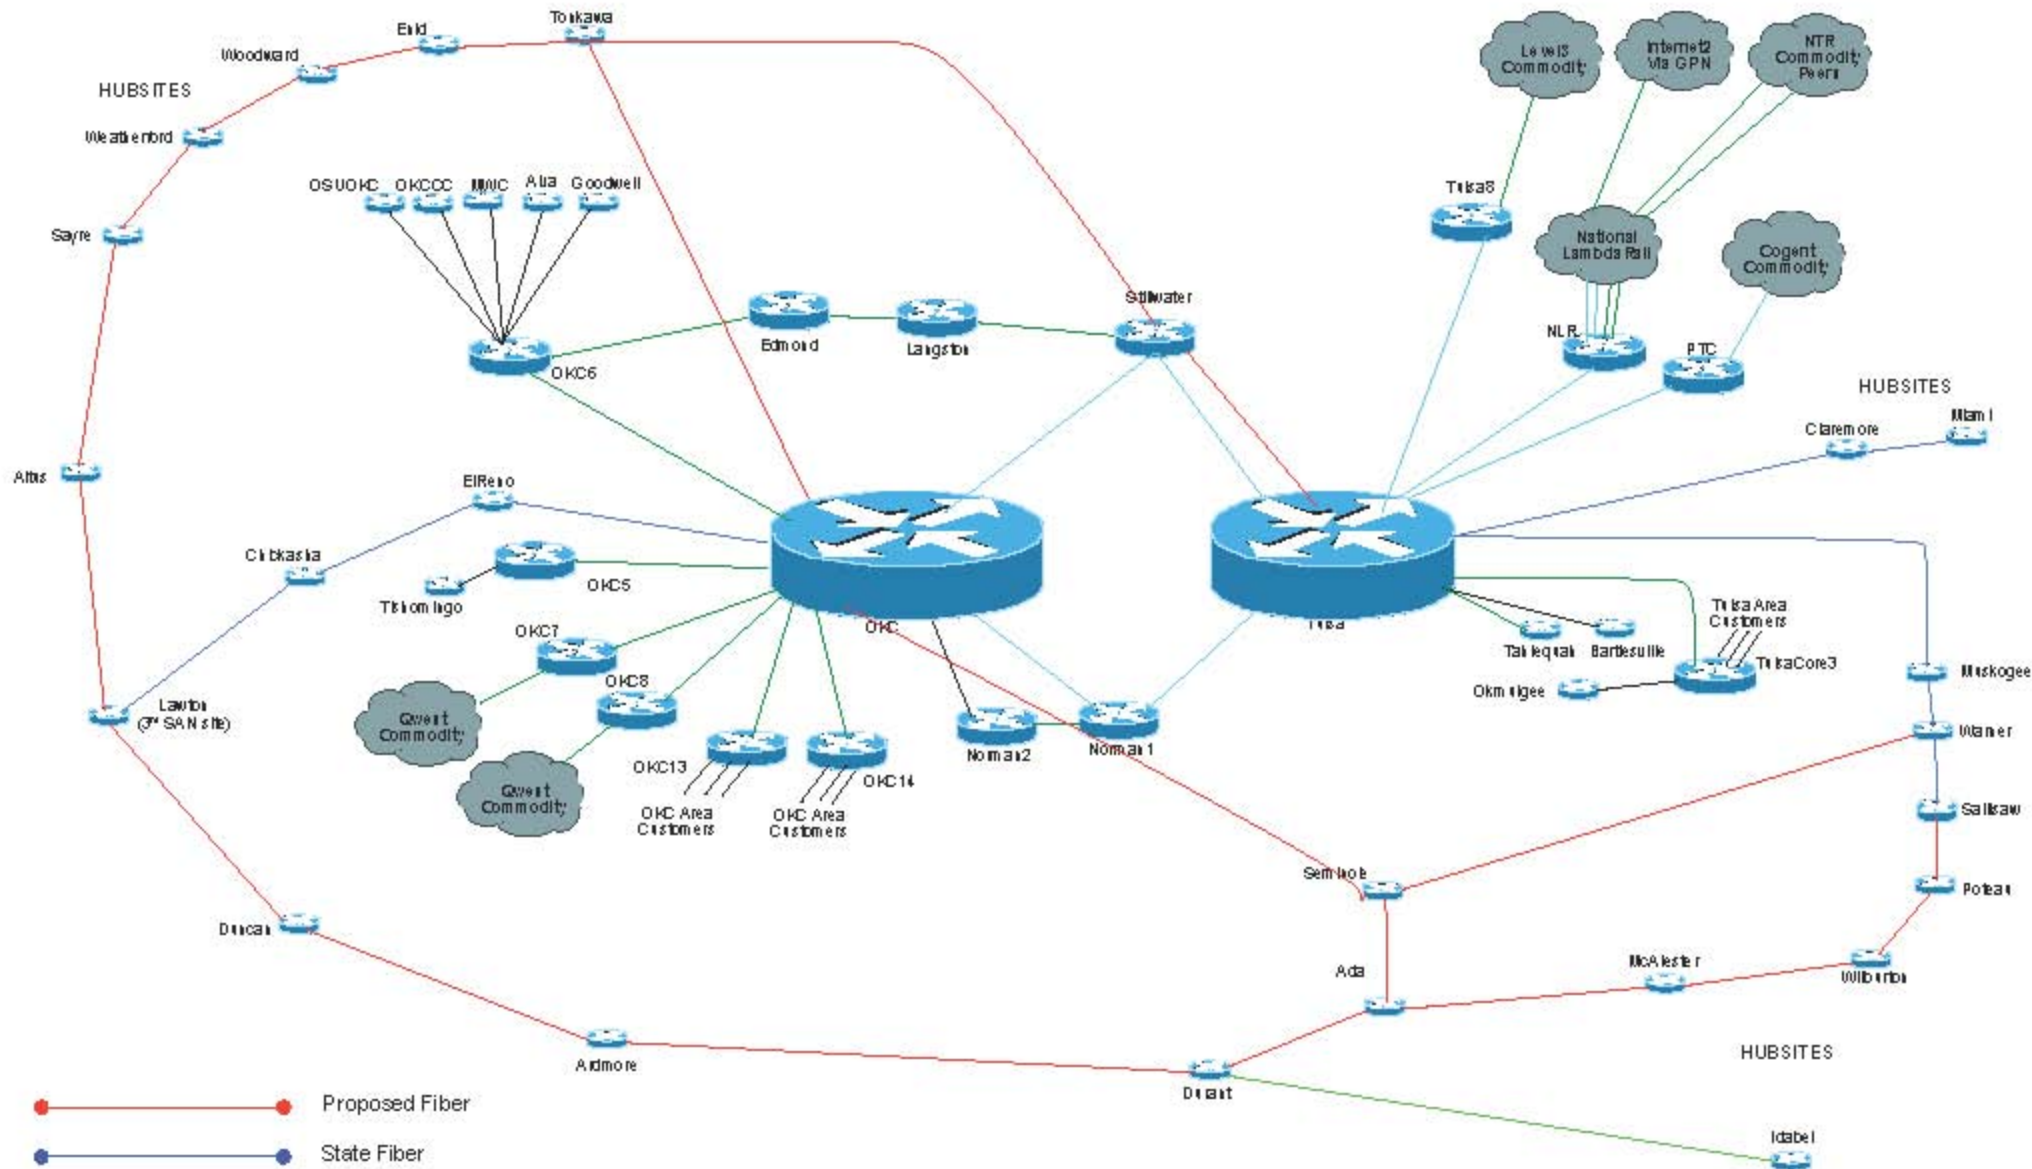

Once implemented, public libraries in Oklahoma will benefit greatly from the direct fiber connection. Specifically, it will substantially upgrade available higher speed connectivity and provide more reliability at an affordable price that will enable libraries to better serve their communities. The Oklahoma Department of Libraries submitted a Public Computing Center grant that is linked to the state's Comprehensive Community Infrastructure application. If both grants are funded, more public libraries will be served than by our grant alone and the costs will be more sustainable.

We anticipate this broadband middle mile route will provide the essential framework that can promote economic development in our state. Through open access to the funded infrastructure, key fiber assets can be made available to local telecommunications companies who can then provide the much-needed last mile component to our rural citizens and businesses.

Recognizing the long-term benefits both to public libraries and the surrounding community, I strongly encourage the NTIA to award grant funding to the state of Oklahoma for this very worthwhile project.

Sincerely,

Susan C. McVey
Director

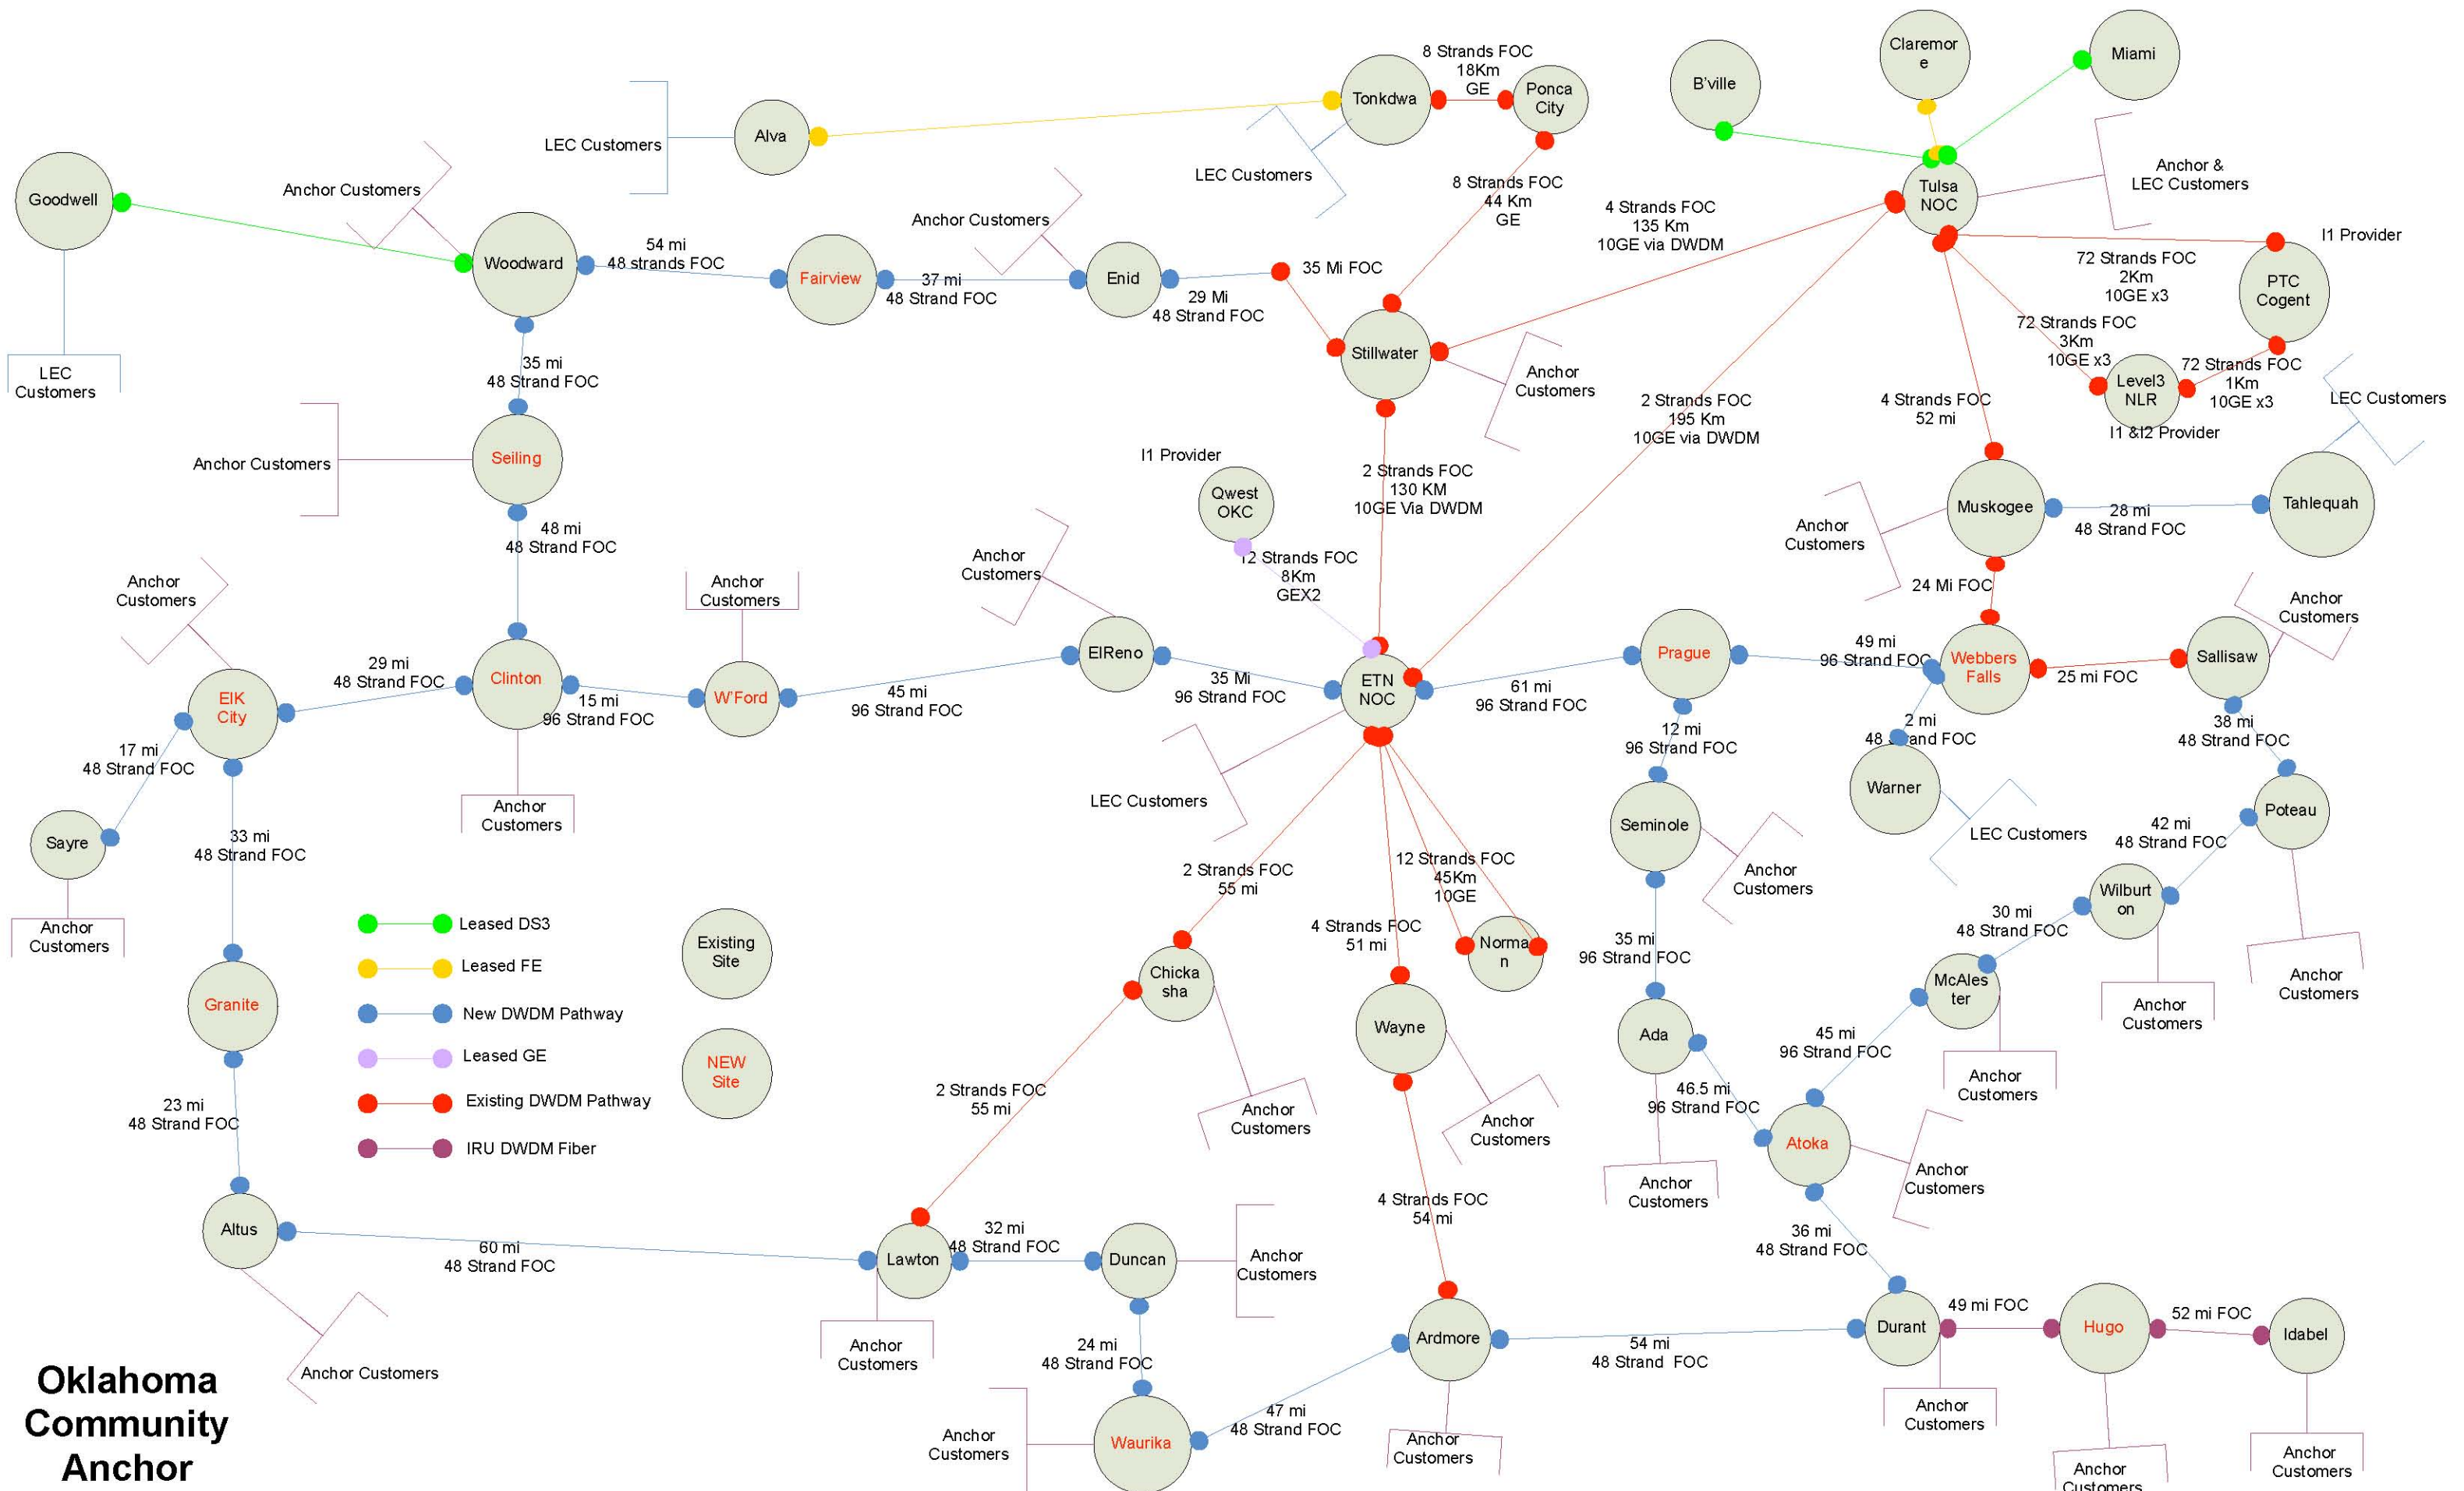

- Proposed Fiber
- State Fiber
- Ten Gigabit Ethernet – 10000 Mbps
- Gigabit Ethernet – 1000 Mbps
- IRU Fiber
- Digital Land Line DS3 - 45 Mbps

Last Revised 3/19/2010

Oklahoma Community Anchor Network

RE: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

The Lawton Indian Hospital wishes to express its commitment as an Anchor Institution in Oklahoma's proposal to develop a broadband middle mile fiber route throughout the state. We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project, and we are happy to offer support to this grant application which will enhance health care delivery throughout all of Oklahoma.

Once implemented, the Lawton Indian Hospital will benefit greatly from the direct fiber connection. Specifically, it will substantially upgrade our connectivity from the current DS-3 to Gigabit and provide more reliability that will enable us to better serve our constituents in a more efficient and effective manner and provide the requisite infrastructure to support telemedicine and electronic medical record applications.

In addition to enhancing our health and welfare mission, we anticipate this broadband middle mile route will provide the essential framework that can promote economic development in our area. Through open access to the funded infrastructure, key fiber assets can be made available to local telecommunications companies who can then provide the much-needed last mile component to our rural citizens and businesses.

Recognizing the long-term benefits both to the Lawton Indian Hospital and the surrounding community, I strongly encourage the NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

Greg Ketcher, CIO
Lawton Indian Hospital

Re: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

Cameron University wishes to express its commitment as an Anchor Institution in Oklahoma's proposal to develop a broadband middle mile fiber route throughout the state. We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project, and we enthusiastically offer support to this grant application and commit facilities to house key network components vital to the OCAN infrastructure.

Once the route is implemented, Cameron University will benefit greatly from the direct fiber connection. Specifically, it will substantially upgrade our connectivity and provide more reliability that will enable Cameron to serve students in a more efficient and effective manner.

In addition to enhancing our teaching and learning mission, we anticipate this broadband middle mile route will provide the essential framework that can promote economic development in our area. Through open access to the funded infrastructure, key fiber assets can be made available to local telecommunications companies who can then provide the much-needed last mile component to our rural citizens and businesses.

Recognizing the long-term benefits both to Cameron University and the Lawton/Fort Sill community, I strongly encourage the NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

Cynthia S. Ross
President

RE: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

The Cheyenne and Arapaho Tribal College (CATC) wishes to express its commitment as an Anchor Institution in Oklahoma's proposal to develop a broadband middle mile fiber route throughout the state. We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project, and we are happy to offer support to this grant application.

Once implemented, CATC will benefit greatly from the direct fiber connection. Specifically, it will substantially upgrade our connectivity and provide more reliability that will enable us to better serve our students in a more efficient and effective manner. With the option of enhanced broadband connections, CATC will be better equipped to provide virtual classrooms and videoconferencing for Native American language education.

In addition to enhancing our teaching and learning mission, we anticipate this broadband middle mile route will provide the essential framework that can promote economic development in our area. Through open access to the funded infrastructure, key fiber assets can be made available to local telecommunications companies who can then provide the much-needed last mile component to our rural citizens and businesses.

Recognizing the long-term benefits both to CATC and the surrounding community, especially the Native American Language Education initiative, I strongly encourage the NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

A handwritten signature in cursive script that reads 'Alden Whiteman'.

Alden Whiteman, Vice President

RE: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

OneNet, an operational division of the Oklahoma State Regents for Higher Education and the state's official telecommunications network, strongly supports and endorses the Oklahoma Community Anchor Network (OCAN) and its goal of developing a broadband middle mile fiber infrastructure throughout strategic areas of the state. As an active partner in the development of the application, OneNet recognizes the true benefits it will bring to both public and private interests throughout the state.

As a Regional Optical Network (RON) and member of the National LambdaRail and Internet2, we enjoy significant bandwidth on a national and international basis. However, middle mile capacity within the state has presented distinct challenges in supporting the telecommunications needs of our community anchor institutions. We have worked closely with the local commercial providers to expand broadband in specific areas, but we have not been able to secure the requisite capacity. The fiber routes and technologies within OCAN will certainly address this critical issue by allowing Oklahoma to enhance its public and private telecommunications infrastructure.

OneNet has a 30-year legacy of supporting distance education throughout the state. In the last academic year alone, the network delivered over 550,000 higher education credit hours originating from our 25 public colleges and universities. OCAN will provide the requisite infrastructure that will enable OneNet to sustain this extraordinary method of delivery – assuring that traditional and non-traditional students have access to educational opportunities, regardless of their location.

In closing, I again want to express our enthusiasm to be an active participant in this exciting endeavor. These vital dollars directed at middle mile infrastructure will enable us to further our mission as a RON and the missions of the constituents we serve.

Sincerely,

A handwritten signature in black ink, appearing to read "Kurt A. Snodgrass".

NATALIE SHIRLEY
SECRETARY OF COMMERCE & TOURISM

March 26, 2010

Larry Strickling, Administrator
National Telecommunications and Information Administration
1401 Constitution Avenue, Northwest
Washington, District of Columbia 20230

Re: Oklahoma Community Anchor Network (OCAN) Application

Dear Administrator Strickling:

Please consider this an enthusiastic endorsement for the State of Oklahoma's OCAN application. As Secretary of Commerce and Tourism, I know firsthand how critical it is for the state to expand its broadband infrastructure for commerce and tourism, the development of a quality and well trained workforce, and improved access to education.

Oklahoma's OCAN application is a collaborative effort among state, local and tribal entities and numerous private sector partners. These business and community leaders understand that the development of comprehensive broadband infrastructure in rural Oklahoma is critical to the sustainability and growth.

Economic development depends on the ability to communicate. For states such as Oklahoma that have a significant rural base and are geographically large, access to broadband provides a greater opportunity for meaningful economic development. From a business development perspective, OCAN's broadband plan will provide the telecommunication tools necessary to connect rural Oklahoma with the global economy.

The successful funding of OCAN's plan for broadband development will provide life changing opportunities for our citizens. I encourage your positive consideration of Oklahoma's application.

Sincerely,

Natalie Shirley
Secretary of Commerce and Tourism

STATE OF OKLAHOMA
OKLAHOMA HEALTH CARE AUTHORITY

March 26, 2010

Joe Fleckinger
Deputy Director of Information Technology
Office of State Finance
2209 N. Central
Oklahoma City, OK 73105

RE: Letter of Commitment for Oklahoma Community Anchor Network (OCAN)

Dear Mr. Fleckinger:

The Oklahoma Health Care Authority (OHCA) wishes to express its support for Oklahoma's Community Anchor Network (OCAN) and its goal of developing a broadband middle mile fiber route throughout the state. We understand the state will apply for a Broadband Technology Opportunities Program ARRA grant to help fund this project, and we are happy to offer support to this grant application.

Once implemented, it is anticipated that OCAN would have the ability to enhance the objectives of my organization which center around providing high quality health care to the SoonerCare (Medicaid) and Insure Oklahoma members across the state. Specifically, it will substantially upgrade connectivity to targeted rural providers and provide more reliability that will enable us to potentially serve our members in a more efficient and effective manner. This could be achieved through advanced telemedicine and, potentially, an integrated, national electronic medical records solution.

In closing, I would like to reiterate OHCA's support to the grant application. By supporting an initiative such as this, a framework will be established to provide more reliable and advanced broadband infrastructure to providers throughout all of Oklahoma. Accordingly, I strongly encourage the NTIA to award grant funding to the State of Oklahoma for this very worthwhile project.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lynn V. Mitchell".

Lynn V. Mitchell, M.D., M.P.H.
State Medicaid Director
