10f. Please describe the verification activities you plan to implement ESRI is deploying and hosting our BroadbandStat web application. ESRI hosts the customized application in their highly available, monitored, and managed environment. The scope of services includes setting up a staging environment for data verification and compatibility as well as a production area for client access.						
Connected Nation also collects consumer feedback in the form of broadband inquiries. These inquiries represent any type of communications received from the public regarding broadband service. Once broadband inquiries are received across the state, this information is overlaid with the broadband availability information collected through the SBDD program. This allows for a real-world comparison of the broadband landscape to information received from broadband inquiries. Broadband inquiries are able to provide three types of information: 1) residents who do not have broadband but want it; 2) residents who have broadband but want a different provider; and 3) residents who do not have broadband, but the inventory maps indicate that they do. If residents within a region state that they are without broadband, but the broadband maps show otherwise, this allows Connected Nation to approach providers within that area in an effort to trim their coverage to more accurately represent real-world availability.

March 31, 2011.

During this quarter, the Connect Alaska project received a total of 4 broadband inquiries. Additional information received through email from consumers that can also be used for verification purposes totaled 1 for this quarter.

Connected Nation's staff has conducted extensive field validation tests in Alaska on the following providers: Ace Tekk Wireless Internet, AlasConnect, Inc., Alaska Telephone Company, AT&T, Borealis Broadband, Clearwire Corporation, Copper Valley Telephone Cooperative Inc., GCI Internet, Ketchikan Public Utilities, Matanuska Telephone Association, SPITwSPOTS LLC, and TelAlaska Long Distance Inc.

To date, Connected Nation has completed field validation testing against 12 companies (out of a universe of 22 viable providers) totaling 54.55% within the state.

10i. If verification activities have not been initiated please provide a projected time line for beginning and completing such activities

N/A

Staffing

10j. How many jobs have been created or retained as a result of this project? 2.71

Connected Nation has numerous staff working on the Connect Alaska project, some at only a small percentage of their time. This approach is beneficial to the project in various ways: some staff provide necessary project support, many staff work together utilizing a team approach, and others are subject matter experts in their respective areas and by leveraging their expertise the project benefits by their knowledge and skills without the necessity of supporting a more expensive full-time resource.

10k. Is the project currently fully staffed? Yes No

10l. If no, please explain how any lack of staffing may impact the project's time line and when the project will be fully staffed

The positions not currently staffed are related to Connect Alaska's new broadband capacity, technical assistance, and application development activities that are only just beginning and as such have no impact on the project's time line. The positions are expected to be filled during the second and third guarters of 2011.

10m. When fully staffed, how many full-time equivalent (FTE) jobs do you expect to create or retain as a result of this project?

4.71

Hardware / Software

10u. Has the project team purchased the software / hardware described in the application?

10v. If yes, please list

Hardware/software purchases for the project to date include the following:

- BroadbandStat-\$63,636
- GIS Software Maintenance-\$1,840
- Computers & Software-\$5,826
- Speed Test Software-\$2,686
- Google Earth Pro-\$266

10w. Please note any software / hardware that has yet to be purchased and explain why it has not been purchased
Remaining purchases may include SQL server for mapping geodatabase, SQL server software, multiple dedicated storage servers, security application, additional backup replication solution, computers, GPS units BroadbandStat maintenance, ArchInfo/Arc GIS maintenance, and speed test updates as well as computers and software maintenance.
10x. Has the project team purchased or used any data sets?
10y. If yes, please list All data sets used in this project have been contributed in-kind. Data sets used by the project to date and their respective in-kind contribution value are as follows:
 Incorporated Town Boundaries-\$2,000 Federal and State Land Ownership Data-\$7,800 AK Statewide Digital Mapping Initiative's Orthoimagery Dataset - \$177,933 10z. Are there any additional project milestones or information that has not been included?
10aa. If yes, please list * Revised the project schedule, budget, and work breakdown structure with the revised SBDD timeline * Conducted planning discussions on the supplemental grant awarded by the State Broadband Data and Development Grant Program * Submitted project plans to the National Telecommunications and Information Administration (NTIA) for the awarded supplemental grant
* Continued to process speed tests and broadband inquiries from the Connect Alaska website * Updated the project outreach plan * Produced and distributed bi-weekly status reports, data collection activity logs, and website statistics to the Connect Alaska project team
* Created and distributed an electronic newsletter to email contacts throughout Alaska to assist in identifying and collecting data from Community Anchor Institutions within Alaska * Continued to solicit and process broadband coverage datasets from the provider community
* Submitted Alaska broadband provider mapping data updates in accordance with the NTIA semi-annual requirements * Previewed the results of the Connect Alaska business technology survey to Alaska stakeholders and discussed opportunities for a
public release * Created and uploaded broadband provider density maps, provider-reported download speed maps, underserved area maps, and Multi/Single platform maps to the Connect Alaska website
* Updated the BroadbandStat application with coverage additions and new color displays * Created and posted job descriptions for the Connect Alaska Program Manager and Connect Alaska Program Coordinator positions * Interviewed candidates for the Connect Alaska Program Manager and Program Coordinator positions
* Submitted the required quarterly project reports to the NTIA * Attended the inaugural meeting of the Alaska Broadband Task Force and provided an overview of the Connect Alaska program * Investigated aerial imagery data sets belonging to the State of Alaska for use in the Connect Alaska broadband mapping project 10bb. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing
All deadlines have been achieved. There currently have not been any obstacles encountered.
10cc. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project

On September 27, Connect Alaska received notice of a grant award extending SBDD mapping and planning activities for an additional three years. The project plan has been revised to include these new activities and has been formally submitted to NTIA for approval during this quarter.

11. Broadband Planning

11a. Please describe progress made against all goals, objectives, and milestones detailed in the approved Project Plan. Be sure to include a description of each major activity / milestone that you plan to complete and your current status

On behalf of the state of Alaska, Connected Nation (CN) worked with its subcontractors to analyze demand-side data collected through statistical telephone surveys of 817 businesses statewide. Initial data analysis was completed in Q4 2010, and a report containing indepth survey analysis was provided to the state in Q1 2011. CN designed these surveys to measure technology adoption, barriers to adoption, and awareness of available broadband service among Alaska businesses, and those results were compared to statewide availability figures provided by participating Internet service providers.

In addition, CN wrote the survey instrument for the 2011 Residential Technology Assessment telephone survey, incorporating recommendations received from state stakeholders where appropriate. These surveys are designed to measure trends in technology

adoption, barriers to adoption, and awareness of available broadband service among Alaska residents.

Additional Planning Information

% Of Total

11j. Are there any additional project milestones or information that has not been included?

0

Upon approval of the project plan and budget, Connected Nation will conduct a survey that oversamples households that do not subscribe to broadband. This second survey will be in addition to the previously scheduled residential survey. This updated and improved methodology will provide a greater level of analysis regarding barriers to technology adoption among different socioeconomic and demographic groups by surveying non-adopters in Alaska in a way similar to that conducted by the FCC as part of the National Broadband Planning effort. This approach will help create a demographic and socio-economic profile of the population of non-adopters in Alaska, which can then be applied at the local level of detail by area planning teams, to assist in developing local adoption initiatives that will target the barriers that are unique to that area. In Q1 2011, CN developed the analysis methodology and began

0

0

developing this survey instrument.
Connect Alaska composed and submitted the first SBDD Detailed Project Plan, Timeline, and Budget (Project Plan). As of the close of the quarter, the Project Plan has been accepted and recommendations for changes have been received. Those changes are in process with resubmission pending. 11k. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the Project Team is employing
Connected Nation has been relying heavily on Alaska's recommendations to ensure that our work, as well as the work of our subcontractors, exceeds expectations.
11I. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project
All planning costs have been combined with the mapping costs and reported in the mapping section above.

12. Certification: I certify to the best of my knowledge and belief that this report is correct and complete for performance of activities for the purpose set forth in the award documents.
